(Note 1) "Others" under medium are precipitation and indoor air.

(Note 2) The number of target chemicals in each fiscal year indicates the number of chemicals surveyed in the concerned year; the total does not agree with the simple sum of the figures in each medium column because some chemicals were surveyed in several media.

(Note 3) "Number of new chemicals" indicates the number of chemicals designated as target chemicals for the first time in the concerned fiscal year among the number of chemicals in the "total" column.

(Note 4) "Total number of target chemicals for each medium" indicates the number of chemicals surveyed for the concerned medium, and does not agree with the simple sum of the figures in each fiscal year because some chemicals were surveyed over several fiscal years. The simple sum is given in parentheses.

(Note 5) The total "1,208" is the total number of chemicals surveyed from FY 1974 to FY 2009, and does not agree with the simple sum of the figures in each column because some chemicals were surveyed in several media over several fiscal years. The simple sum is given in parentheses.

**Table 4-2 Stocktaking of the detection in the Environmental Survey and Monitoring of Chemicals (FY 1974 – FY 2009)**

	Surface water	Sediment	Wildlife	Air	Food	Others	Total number of chemicals surveyed
Number of chemicals surveyed	1,056	1,012	454	432	27	26	1,208
Number of chemicals detected	349	455	273	301	21	13	671
Percentage of detected chemicals (%)	33	45	60	70	78	50	56

(Note 1) Since FY 1985, the detection limit for surface water, sediment, and fish has been uniformly treated.

(Note 2) The total number of chemicals surveyed “1,208” is the total number of chemicals surveyed in one or more media from FY 1974 to FY 2009, and the total number of chemicals detected (“671”) is the number of chemicals detected in one or more media as a result of the survey.

(Note 3) “ Others” means precipitation and indoor air.
