## Results of Radioactive Material Monitoring of Groundwater in Fukushima Prefecture (Report No. 2)

Thursday, August 4, 2011  
Office of Groundwater and Ground Environment,  
Soil Environment Division,  
Environmental Management Bureau,  
Ministry of the Environment  
Direct line: 03-5521-8309  
Switchboard: 03-3581-3351  
Director: Shinsuke Unisuga (ext. 6670)  
Deputy Director: Kazuhisa Matsuda (ext. 6671)

As an emergency response to the Great East Japan Earthquake, the Ministry of the Environment (MOE) is conducting water quality monitoring surveys of hazardous materials, etc. in groundwater in the disaster-afflicted areas.

In conjunction with surveys of hazardous materials, groundwater in Fukushima Prefecture has been surveyed to measure activity concentrations. The results of the completed portion of the measurement are released here as Report No. 2 (for samples collected on June 21, 22, 23, and 24).

### ○ Outline of Results

I-131, Cs-134, and Cs-137 were not detectable at some of the locations surveyed in Fukushima Prefecture (32 locations) or at any of the locations surveyed in Iwaki City (nine locations) (detection limit: 10 Bq/L). (See Annex for details.)

### ○ Future Plans

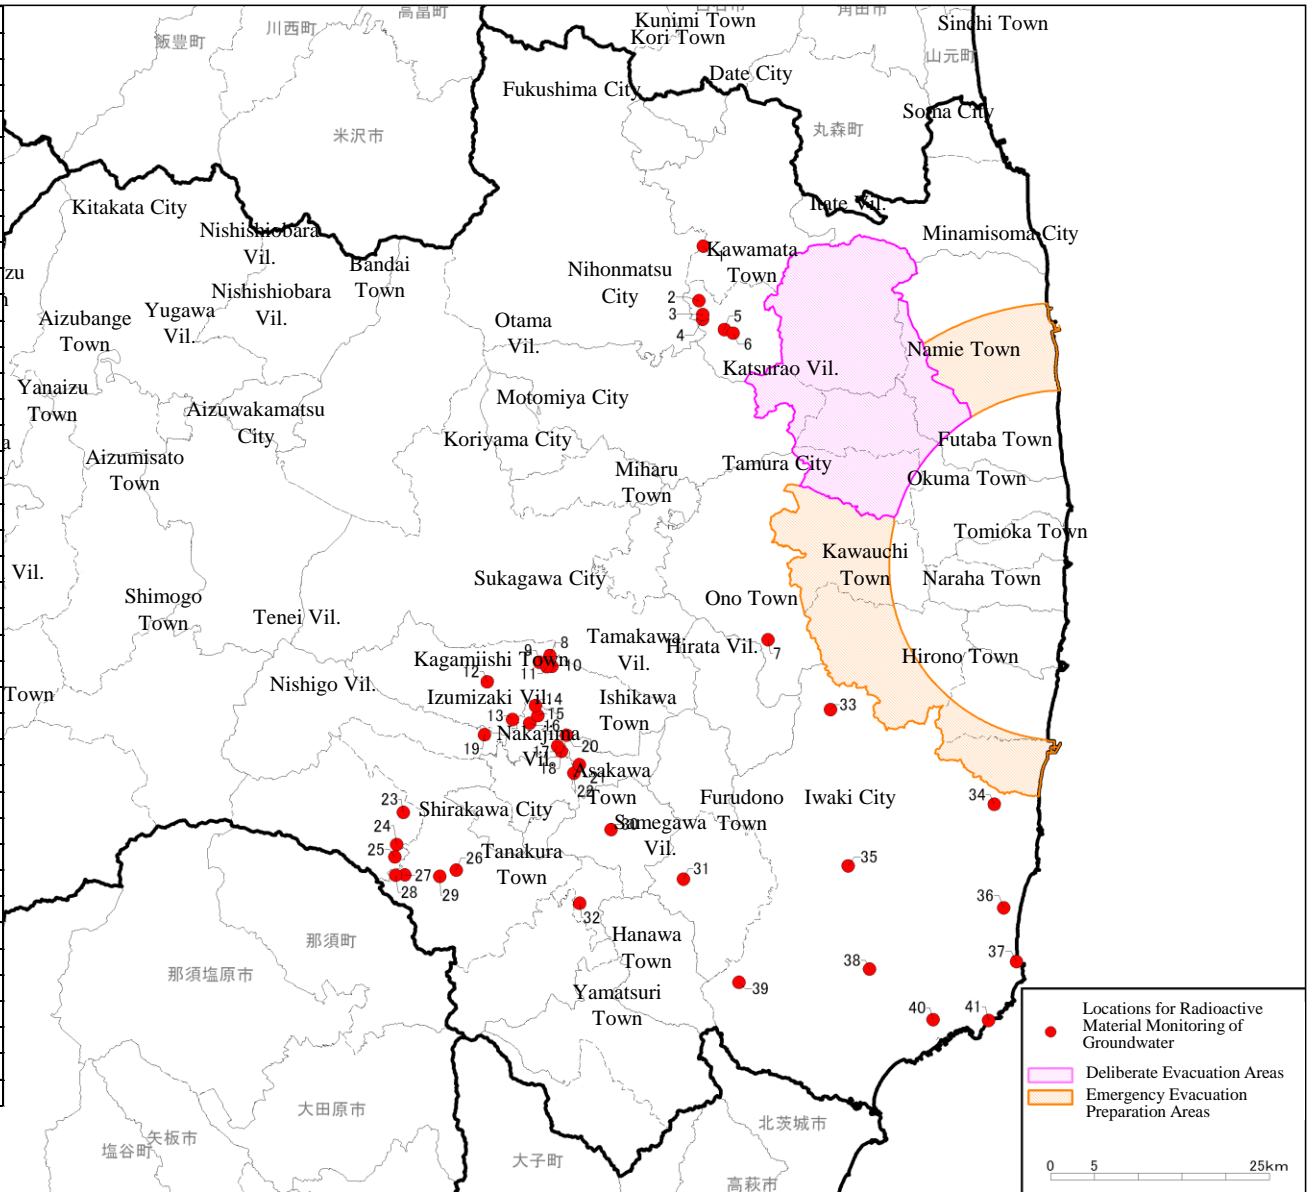

Sampling has been completed at 101 locations, including those surveyed so far, within Fukushima Prefecture by the end of June. The results for the remaining samples and those to be collected in the scheduled locations will be released when available.

Location (41 Points)		Sampling Date	Activity concentration (Bq/L)			Remarks	
Municipality	Location		I-131	Cs			Other detected radionuclides
