# What is World Heritage?

### Qu'est-ce que le Patrimoine Mondial?

Yakushima (Kagoshima)

Area: Approx. 10,700 ha Inscription: 1993

Shirakami-Sanchi (Aomori, Akita) Area: Approx. 17,000 ha Inscription: 1993

Shiretoko (Hokkaido) Area: Approx. 71,100 ha Inscription: 2005

Ogasawara Islands (Tokyo) Area: Approx. 7,900 ha Inscription: 2011

Convention Concerning the Protection of the

The World Heritage Convention aims to iden-

tify, protect, conserve, present and transmit to future generations cultural and natural

areas around the world considered to be of

outstanding value. The Convention also sup-

World Heritage properties are the sites of

Outstanding Universal Value (i.e. of particu-

larly important value for all humankind) that

tee\* as assets to be inscribed on the World

Heritage List and be conserved into the

future. There are natural properties, cultural properties, and mixed properties that have

(as of Mar 2022)

both natural and cultural values

\* An intergovernmental body established under UNESCO, consisting of representatives

of 21 countries elected from the State Parties. A Committee term is limited to a maximum

of 6 years (some countries voluntarily shorten their terms to 4 years)

Number of the World Heritage properties

\* Figures in parentheses are numbers for Japan.

State Parties: 194 countries

Total ..... 1154 (25)

Natural heritage ..... 218 (5)

Cultural heritage ...... 897 (20)

What is

World Heritage?

Area: Approx. 42,700 ha Inscription: 2021

#### **Origin of the World Heritage Convention**

In the 1960s, as part of a plan to rescue historical monuments from the flooding produced by the construction of the Aswan High Dam on the Nile River, the United Nations Educational, Scientific and Cultural Organization (UNESCO) initiated an international safeguarding campaign to preserve the Nubian Monuments by dismantling and reassembling them. This action prompted the idea of protecting world cultural assets through international cooperation. In 1965, the United States of America suggested an international framework to support listing and protection of the world's superb natural and scenic areas and historic sites.

In the wake of such movements, the Convention Concerning the

Protection of the World Cultural and Natural Heritage (World Heritage Convention) was adopted at a UNESCO General Conference in November 1972. Japan became a party to the Convention in 1992.

Treasures that should be passed down to future generations

#### **Requirements for Inscription on the World** Heritage List as a Natural Property

The Outstanding Universal Value of the property is evaluated in accordance with the following three conditions:

- The property must meet more than one of the four evaluation criteria (see table below)
- The property must fulfill the condition of integrity (e.g. 2 include all the elements necessary to demonstrate outstanding universal value; contain adequate areas; show little influence of development; and maintain its primary natural value).

The property must be adequately protected and managed in order to maintain its outstanding universal value over the long term.

Those properties that fulfill the above conditions can be inscribed on the World Heritage List, as they are the only places in the world that have such significant value.

#### Criteria for World Heritage (natural property) To be inscribed on the World Heritage List as a natural heritage, the property must meet one or more of the four criteria: natural beauty; geology and geomorphology; ecosystem; and biodiversity.

(vii) natural beauty	contain superlative natural phenomena or areas of exceptional natural beauty and aesthetic importance <b>Yakushima</b>
(viii) geology and geomorphology	be outstanding examples representing major stages of earth's history, including the record of life, significant on-going geological processes in the development of landforms, or significant geomorphic or physiographic features
(ix) ecosystem	be outstanding examples representing significant on-going ecological and biological processes in the evolution and development of terrestrial, fresh water, coastal and marine ecosystems and communities of plants and animals Shiretoko Shirakami-Sanchi Ogasawara Islands Yakushima
(X) biodiversity	contain the most important and significant natural habitats for in-situ conservation of biological diversity, including those containing threatened species of Outstanding Universal Value from the point of view of science or conservation. Shiretoko Amami-Oshima Island, Tokunoshima Island, Northern part of Okinawa Island, and Iriomote Island

#### Process for the inscription of the properties on the World Heritage List

The State Party submits the nomination dossier to the UNESCO World Heritage Centre

The International Union for Conservation of Nature (IUCN), an advisory body to the World Heritage Committee, conducts a field mission and external review of the documents, and produces a technical evaluation report containing a recommendation.

## as irreplaceable assets shared by all humankind

#### **Protection and Management of Natural World** Heritage Properties in Japan

Natural World Heritage properties must be appropriately protected and managed to maintain their values into the future. For this reason, protection and management measures in accordance with the national laws and systems are taken on those properties, through the status of National Parks, Nature Conservation Areas, Forest Ecosystem Reserves, and/or Natural Monuments for which the government has the management responsibility.

#### Framework for Protection and Management of **Natural World Heritage Properties in Japan**

On the natural World Heritage properties, appropriate protection and management is necessary to be implemented on the basis of scientific knowledge and with close cooperation among relevant parties, including local organizations, academic experts, and government bodies that have jurisdiction over protection and management of the natural environment. For each World Heritage property, a Regional Liaison Committee and Scientific Committee are established and operate to develop a Management Plan and advance protection and management efforts for that property.

#### Structures pour la protection et la gestion des sites du Patrimoine naturel mondial

Sur les sites du Patrimoine naturel mondial, une protection et une gestion adéquates doivent être mises en oeuvre sur la base des connaissances scientifiques les plus récentes et dans le cadre d' une coopération étroite entre les différentes parties concernées (administrations ayant compétence sur la protection et la gestion des environnements naturels, organisations locales, experts académiques, etc.). Pour cela, un Comité de liaison régional et un Comité scientifique sont mis en place et gérés sur chaque site du patrimoine mondial afin d' élaborer le plan de gestion et de promouvoir les efforts de protection et de gestion du site.

Regional Committe		The Regional Liaison Committee is comprised of the Ministry of the Environment, Forestry Agency, local governments and other relevant parties. The committee serves as a vehicle for liaison and coordination and consensus build- ing for management of the World Heritage property.
Scientific Committe		The Scientific Committee is composed of experts in the natural and social sciences. On the basis of scientific knowledge, the com- mittee provides the advice for appropriate protection and management of the property.
Managen Plan	nent	The Management Plan clearly lays out pol- icies and structures promoting the applica- tion of various schemes for protection and management. The appropriate protection and management programs are promoted through close cooperation and consultation among relevant stakeholders.

3

The World Heritage Committee (held once a year) determines whether to inscribe the property on the World Heritage List.
