	PAGE No.
PART 1	1
GENERAL INFORMATION ABOUT THIS STUDY	1
1- PURPOSE OF STUDY	1
2- BACKGROUND OF PESHAWAR CITY	1
3- IMPLEMENTATION OF PAK-EPA AND NWFP-EPA	4
3.1 Organization on this study	4
3.2 Location of the Study Area	4
3.3 Scope of the Study	4
3.4 Terms of Study	5
3.5 Others	5
4- IMPLEMENTED SCHEDULE.	5
5- ACTUAL ACTIVITY ON HAYATABAD	8
5-1 General Information of Hyatabad	8
5-2 Data Collection	8
5-3 Field Survey on river water	9
5-4 Field Survey on Solid Waste	12
PART 2	15
IMPLEMENTATION of THIS STUDY	15
1- URBANIZATION	15
1-1 Area of Hayatabad	15
1-2 Land Use	15
1-3 Residential Area of Hayatabad	18
1-4 Green Area (Park area)/Open Space	19
1-5 Population and Household	20
1-6 Percentage/Coverage of Flush Toilet	20
1-7 Water Supply Population/Coverage	21
1-8 Hayatabad Industrial Estate	21
1-9 Urban Planning (Control of Urbanization)	23

2- WATER CYCLE	26
2-1 Rainfall	26
2-2 Field Survey on Water Quality	28
2-2-1 Testing Methods and Procedures	30
2-2-2 Laboratory Test Methods and Procedures	32
2-2-3 Analytical Results and Discussion	33
2-2-4 National Environmental Quality Standards (NEQS) by Pak-EPA (Municipal and Liquid Industrial Effluents)	39
2-2-5 Pollution Load in Hayatabad Water Channel	39
3- Sewage Treatment Plant in Hayatabad	40
3-1 Existing System	40
3-2 Deficiencies of Existing Sewage Treatment Plant	40
3-3 Present Situation	41
3-4 Design Parameters adopted for existing sewage Treatment plant.	41
4- Water Supply	43
4-1 City Water	43
4-2 Industrial Water	44
4-3 Tube wells location and their discharge for Public Service	44
4-4 Ground Water Quality of Hayatabad	44
4-5 Estimation of Number of Private Borehole/Dug wells	46
4-6 Current Water Use and Future Trend	46
5-Hydro-Geological Characteristics	47
5-1 Hydrology	47
5-2 Bore hole logs	47
PART 3	49
SOLID WASTE CHARACTERISTICS	49
1-VOLUME OF WASTE	49
1-1 Discharge Waste at each Section in Hayatabad	49
1-2 Daily Dumped Volume	57
1-3 Total Quantity of Dumped Waste (Topographic Survey)	58
2- QUALITY OF WASTE	61
2-1 Apparent Specific gravity	61

2-2 Composition of Solid Waste	61
3- SOLID WASTE RECYCLING	62
3-1 Quality and Quantity of Picked Waste	62
3-2 Recycle Route and Value	64
SUMMARY	66
PHOTOS	67
ANNEXURE-A NATIONAL ENVIRONMENTAL WATER QUALITY STANDARDS (For Municipal and Liquid Industrial Effluents, published in August 10, 2000)	
ANNEXURE-B LAYOUT PLAN OF HAYATABAD, PESHAWAR WITH LOCATION OF TUBE WELLS	
ANNEXURE-C LAYOUT PLAN OF PHASE VII OF HAYATABAD (Solid Waste Dumping Site)	
ANNEXURE-D TOPOGRAPHIC MAP OF SOLID WASTE DUMPING SITE PHASE VII, HAYATABAD	

LIST of TABLES

PAGE No.

Table-1:	Population of urban and rural areas of Peshawar, 1981 and 1998 Census.	3
Table-2:	Peshawar mid year estimated population by sex, 1997-98 to 2002-2003	3
Table-3:	Implemented schedule	7
Table-4:	List of departments who extended help in the investigation	9
Table-5:	Water Survey points and Location	9
Table-6:	Waste classification	13
Table-7:	Land use analysis of Hayatabad	16
Table-8:	Land use analysis of each phase	16
Table-9:	Percentage distribution of Land use analysis in each phase	17
Table-10:	Land use analysis of Hayatabad Township (5-phases)	17
Table-11:	Distribution and total no. of residential plots	18
Table-12:	Detail of residential plots distribution in Hayatabad	19
Table-13:	Phase wise distribution of green area/open space	19
Table-14:	Population and Household size	20
Table-15:	Sector wise distribution of industries in Hayatabad Industrial Estate Peshawar	22
Table-16:	Monthly Total Rainfall (mm) Data for Peshawar	27
Table-17:	Mean of maximum and minimum temperature at Peshawar	27
Table-18:	Daily rainfall data from 1 st to 31 st January, 2004	28
Table-19:	Methodologies and instruments used for the analysis of water samples	29
Table-20:	Standard solution for color management	31
Table-21:	Analytical Results of Water and Leachate Sample	33
Table-22:	Relative Biodegradability of Leachate	37
Table-23:	BOD and COD Load at Different Sampling Locations in Hayatabad	39
Table-24:	Design parameters adopted for existing Sewage Treatment Plant	42
Table-25:	Yield of Tube wells operated by various agencies in Peshawar region	43
Table-26:	Ground water quality of Hayatabad	45
Table-27:	Per-Capita water availability in selected countries (m ³)	46
Table-28:	Water table depth and draw down within Peshawar region	48
Table-29:	Residential Area Categories	49
Table-30:	Average waste generated per person (Kg) in each category of houses	50

Table-31:	Data collection of solid waste in Hayatabad from different categories/model houses	51
Table-32:	Means of Transportation	57
Table-33:	Capacity Occupied by waste	58
Table-34:	Spare capacity of the dumping site	59
Table-35:	Remaining portion of dumping in the areas marked	59
Table-36:	Key characteristics of solid waste dumping site in Hayatabad	60
Table-37:	Solid waste composition	62
Table-38:	Average and total weight of saleable items for a single day	64
Table-39:	Prices of saleable items	64

LIST of FIGURES

PAGE No.

Figure-1:	Organization Chart of implemented investigation	6
Figure-2:	Survey Points of water channels in Hayatabad Area	10
Figure-3:	Total annual rainfall with mean of maximum and minimum temperature at Peshawar.	26
Figure-4:	Comparison of Dissolved Oxygen at different sampling points in Hayatabad.	34
Figure-5:	Comparison of Odor at sampling sites in Hayatabad	35
Figure-6:	Comparison of Conductivity at different Sampling Sites in Hayatabad	36
Figure-7:	Comparison of BOD at different Sampling Sites in Hayatabad	36
Figure-8:	Comparison of COD at different Sampling Sites in Hayatabad	37
Figure-9:	Comparison of T-N at Sampling Sites in Hayatabad	38
Figure-10:	Solid waste sorting process for quality check	61
Figure-11:	Percent Composition of non-saleable items	63
Figure-12:	Percent Composition of saleable items	63

LIST of PHOTOS

PAGE No.

Photo-1:	Leachate sample is being collected for Lab analysis	11
Photo-2:	Drinking water samples is being collected from Public points from Municipal water supply	12
