

**Joint Side Event at UNFCCC-COP19**

# **REDD+: Study Safeguards from Field Experiences NOW!**

**Date : Friday, 15 November 2013**

**Time: 9:00-11:15**

**Venue : Japan Pavilion, Warsaw**

**ITTO / JICA Joint Side Event at UNFCCC-COP19**

# **REDD+: Study Safeguards from Field Experiences NOW!**

**GOSEKI Kazuhiro**

**Global Environment Division**

**JICA**

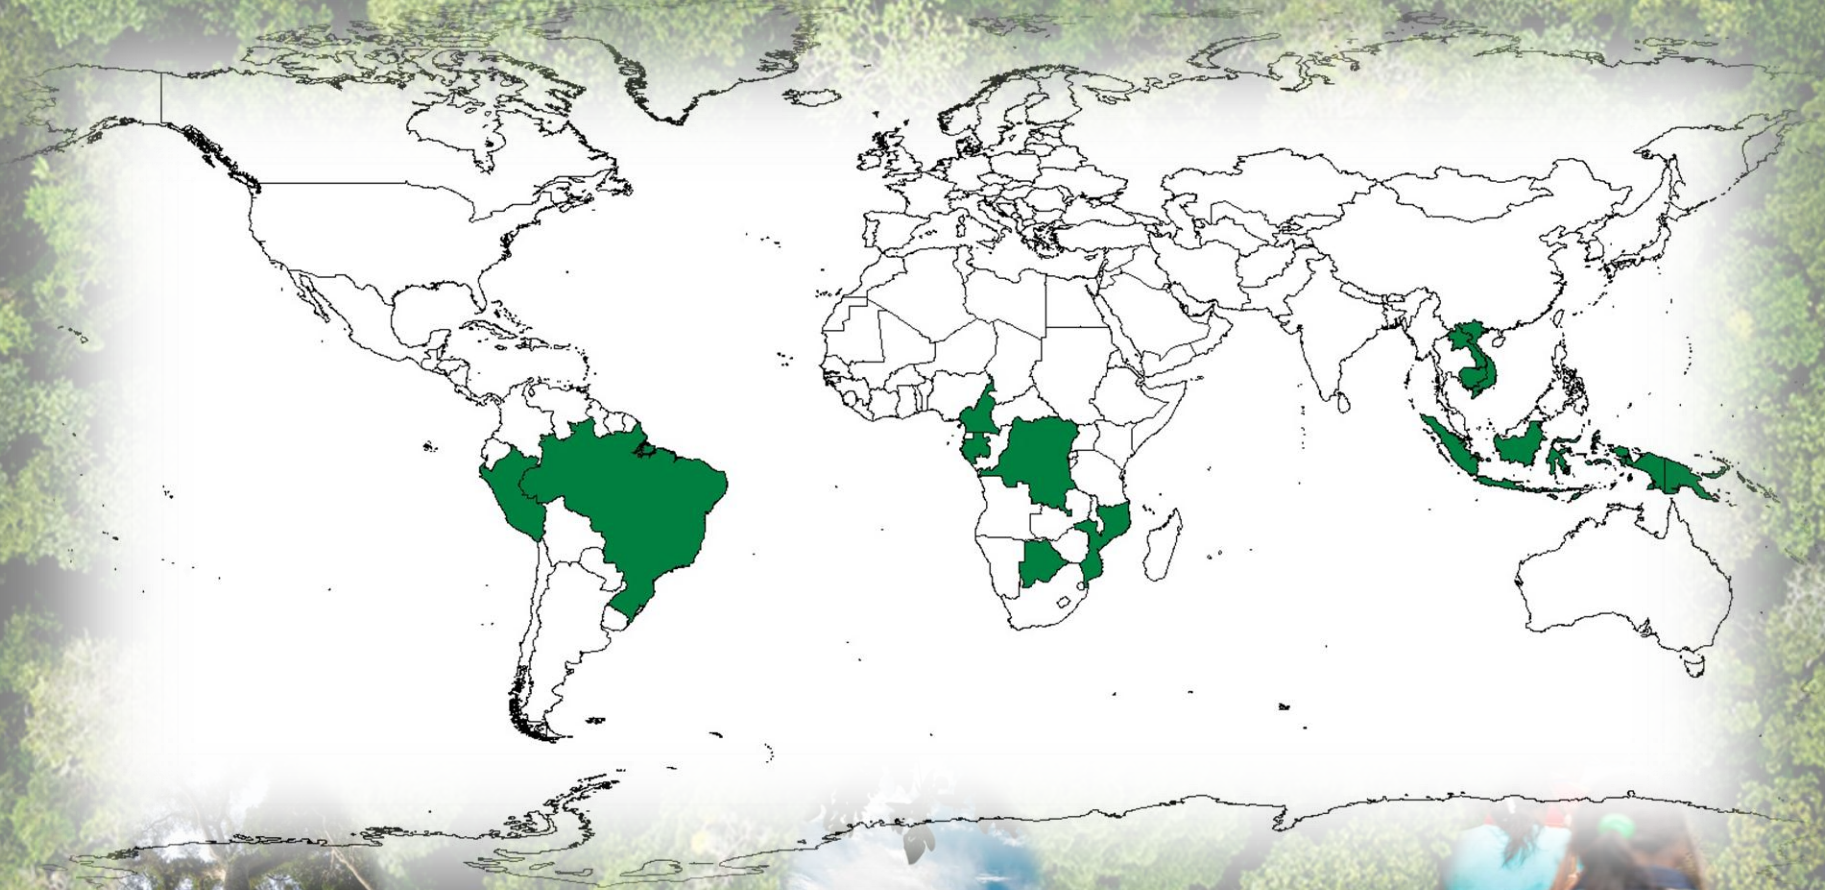

# History of REDD+

- **Durban Agreement (2011):** A new frame work (including **REDD+**) should be **completed by 2015** & put into **effect in 2020**.
- Since **Bali (2007)**, **various field REDD+** activities have been carried out.
- **Lessons learned from the field** activities must be **studied NOW!**

# JICA's REDD+ Related Projects

# Examples of Lessons Learned from JICA's REDD+ Field Activities

- **National Forest Monitoring & MRV:** overcoming limited human resources & road accesses by **remote sensing & ground truth (PNG)**
- **REL/RL:** establishing **taking the country's early actions into account (Vietnam)**
- **National/Sub-national Frameworks:** developing **on the traditional systems (Mozambique)**

# Current Status of Safeguards

- **Cancun Agreement (2010): Principles for promoting/supporting safeguards** were listed.
- **COP 17 (2011): Guidance on systems for providing information** on how safeguards are addressed & respected was adopted.
- **SBSTA 38 (2013): Continuing building experiences/best practices** for providing information on the safeguards was encouraged.

# Study Safeguards from Fields Now!

- **SBSTA 41 (2014):** the **needs for further guidance will be considered** taking into account the experiences/ lessons learned from **the development of “systems for providing information”**  
(= making clear **what should be addressed and respected** in the fields)

# Objective of This Side Event

- **Share the safeguards experiences & lessons learned** from the ITTO/JICA's field activities
- **Identify key issues** need to be considered to address & respect the safeguards in a practical manner
- **Contribute to the process to develop REDD+ implementation mechanism**
