

OPENING REMARKS

H.E. Mr. KOUICHI YAMAMOTO

**Minister of the Environment,
JAPAN**

Japan's Assistance Initiatives to address Climate Change

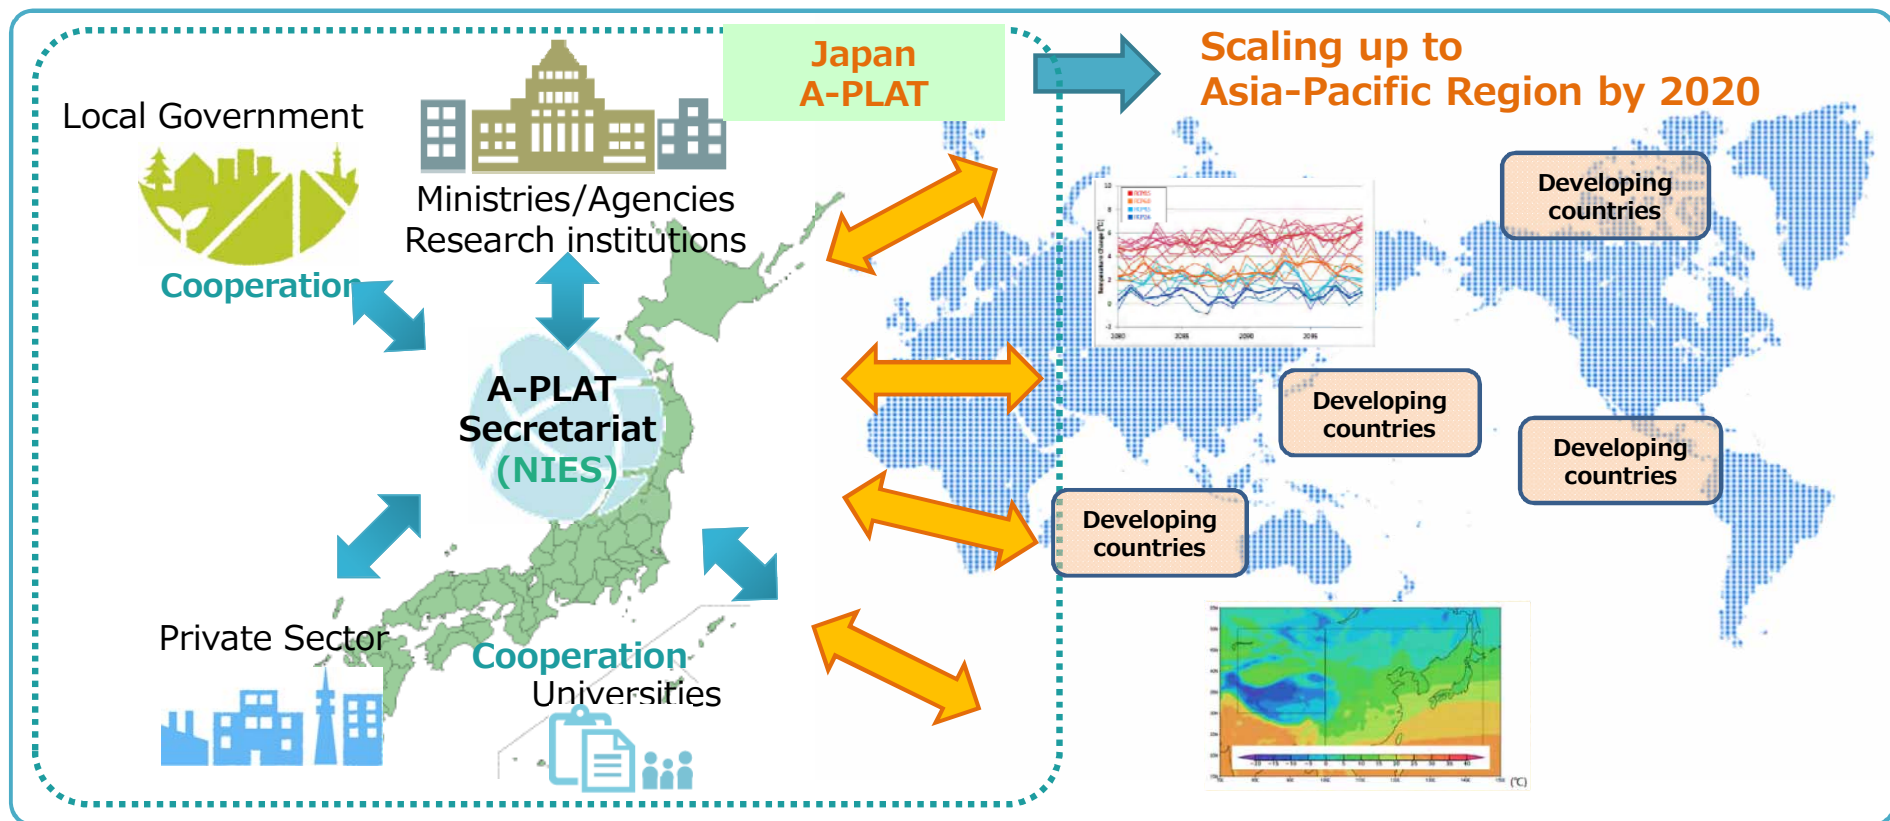

Responding to Needs of the Developing Countries

-  1. Mitigation: Diffusion of superior low-carbon-emission technologies
-  2. Adaptation: Sharing of Japan's experience and cases
-  3. Transparency: Human resource development for inventory enhancement, etc.
-  4. Measures against fluorocarbons: Comprehensive measures for controlling emission of fluorocarbons
-  5. SDG s: Support for sustainable societies

Asia-Pacific Adaptation Information Platform

- **Asia Pacific Adaptation Information Platform** will be established by 2020 to share **climate risk information** via online with research institutes/universities in both developing/developed countries.
- This platform will be established based on Japan's A-PLAT starting its operation in Aug 2016
- To support adaptation measures by providing advanced scientific climate risk information
- Japan will take a lead in the following activities under the Platform
 - ① Develop dataset on projection of climate change impacts in the region through bilateral & intensive studies
 - ② Develop supporting toolkits for officials and stakeholders engaged in adaptation planning
 - ③ Build capacity on climate change impact assessment/ adaptation planning
- **Calling for participation** from the countries in Asia Pacific and other Regions

5th Asia Pacific Adaptation Network (APAN) Forum

@Colombo under Sri Lanka NEXT October 17-19 2016
