TOYOBO CO.,LTD.

	Companies' approach
① Background and purpose of accounting	<ul style="list-style-type: none"> • Toyobo measures the amount of supply chain emissions and leads effective reduction activities in future. • Emission data are disclosed in response to the needs of stakeholders including investors and NPOs, so that stakeholders can deepen understanding for the steps we are taking.
② Utilization of accounting results	<ul style="list-style-type: none"> • We set the target value and goal to cut emissions in the supply chain and reduce emissions. • We present the accounting data to stakeholders through the Integrated report and our website. • We make use of data to answer questionnaires such as CDP.
③ Benefits of accounting	<ul style="list-style-type: none"> • Accounting helps us identify emission hotspots in the supply chain, so we are able to clarify which Scope 3 emission source categories should be targeted and quantify emission reduction.
④ Internal system for accounting	<ul style="list-style-type: none"> • Multiplying emission factor and activity data led to carbon emissions in each category. • Activity data needed for accounting were obtained from the internal system managed by the Finance Department and Human Resources Department. We also used energy consumption data stipulated to report on a regular basis under the Act on the Rational Use of Energy.

2

TOYOBO CO.,LTD.

	Companies' approach
⑤ Efforts to reduce supply chain emissions	<ul style="list-style-type: none"> • In the manufacturing process, Toyobo continues to implement various energy-saving activities at offices and factories, and contributes to customer's reduction activities. • We have started promoting a modal shift and improving logistics efficiency. Logistics network and its system are evolving day by day, so we constantly seek to adjust the system to our company. • We promote the development and sales of environmental friendly products. We establish the company-specific standard for environmental friendly products and evaluate products when developing new products and changing specifications of existing products. • We use Information Technology to improve efficiency.
⑥ Issues in supply chain emissions accounting	<ul style="list-style-type: none"> • Expanding the accounting scope to our group companies and increasing efficiency in accounting requires to build the internal network. We communicate the importance of accounting and establish the system in which relevant departments/parties are willing to offer their data. • We need to improve the precision of accounting by expanding the accounting scope and choosing the accounting methods which is well suited to the actual situations.
⑦ Other	<ul style="list-style-type: none"> • -

a) Emission Factor Database on Accounting for Greenhouse Gas Emissions Throughout the Supply Chain (ver. 3.0)

4

TOYOBO CO.,LTD.

Supply chain emissions : Accounting results

● Supply chain emissions

SCOPE1: Direct GHG emissions by Toyobo
 SCOPE2: Indirect emissions from the use of electricity, heat, or steam supplied by others
 SCOPE3: Indirect emissions other than Scope 1 and Scope 2

*Category 1 includes Category 4: transportation of procurement.
