

Schedule for the Minamata Visit **Full-Day Programme** on 9 October 2013

- On Wednesday, 9 October 2013, the Government of Japan will organize a one-day 'Minamata Visit' programme, during which participants are able to visit Minamata city, the site of the Minamata Disease outbreak caused by contamination from methyl mercury-containing effluent from chemical plants that occurred more than fifty years ago.
- Among the many events, a "remembrance" and a "floral tribute" are planned at the Cenotaph for Minamata Disease Victims in Eco-Park in Minamata city. Also, there will be an opportunity to learn the history and lessons of Minamata Disease and current activities for revitalization of Minamata through a visit to the Minamata Disease Archive, Municipal Museum, and Prefectural Environmental Center.
- In the evening of 9 October, a Ceremonial Opening of the Diplomatic Conference will be held, where a "Lecture by storyteller" will be performed. A reception hosted by Japan will follow the Ceremonial Opening.
- For the full day programme, in addition to the above, participants can visit a small-scale care facility to dialogue with patients or a private museum to learn more about the history of Minamata Disease.

Note

- The display of conference badges is mandatory to gain access to the venues in Minamata city. Participants are requested to register and receive their badges at the registration counter of the Hotel Nikko Kumamoto before departure to Minamata.
- Dress Code: Business casual, but walking attire is preferable since Eco-park is a wide-open coastal space.
- Transportation between Kumamoto and Minamata will be provided by the Japanese Government.
