

UNIDO Support for Industry under the Climate Convention

Dr. Peter Pembleton
Project Manager

31/7/2002

Issues

- UNIDO programme aims to mobilize national & (sub-) regional capacity & develop mechanisms that support industry in the context of the CDM (including pre-project, project and post project launch issues)
- Previous efforts largely ignored industry and its potential to assist NAIs in achieving CC/CDM goals

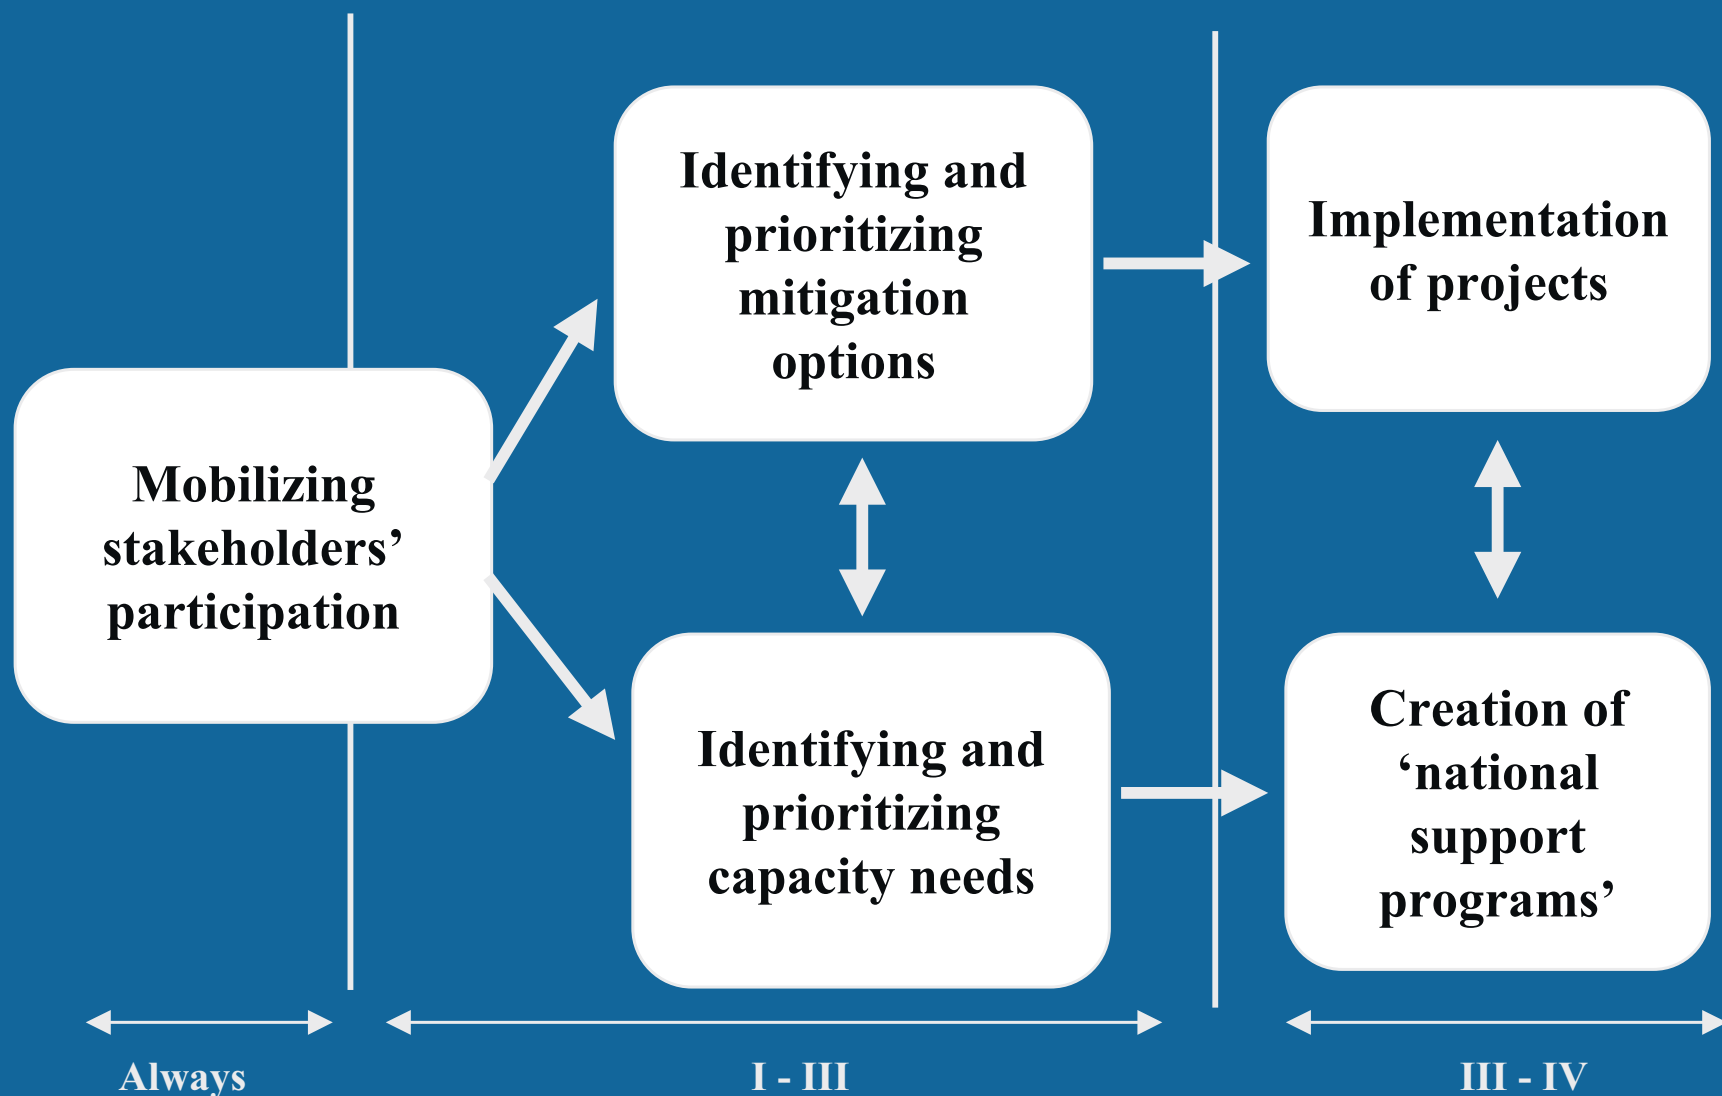

Phases

- 3 phases
 - Phase I: National review of industry & past CC/CDM activities—background studies
 - Phase II: Detailed capacity & targeted technology needs assessments—**preparatory assistance** (to develop programme to submit to donors / donor agencies)
 - Phase III: Programme implementation—learning-by-doing

Programme framework

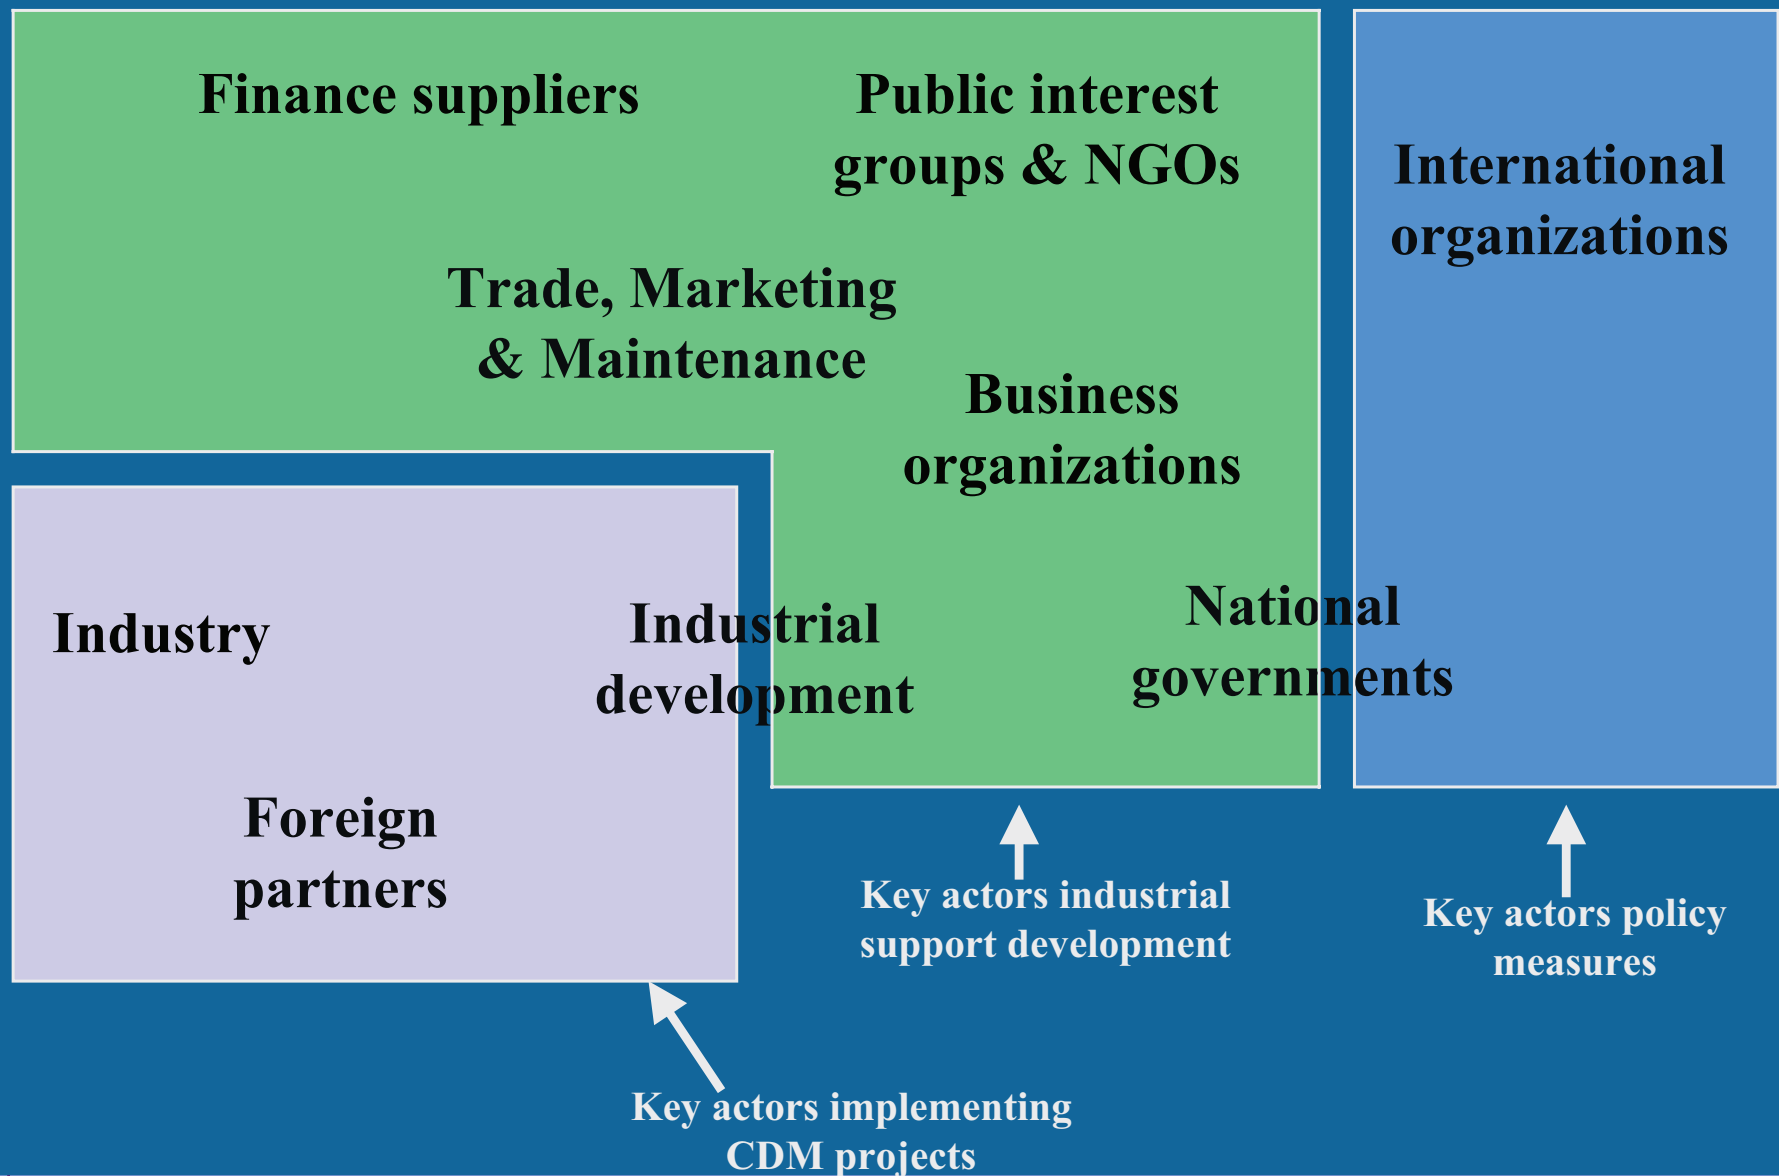

Teams

- Africa teams
 - Ghana, Kenya, Nigeria, Senegal, Zambia & Zimbabwe (Phases I & II)
 - Tanzania, Congo – Brazzaville (Phase I)
- Asian teams
 - Indonesia, Malaysia, Philippines, Thailand, Vietnam (Phase I)
- Associated with
 - Government, private sector, research / academia & NGOS

Partners needed

Phase I & II activities

- National reviews of needs for (national experts consulting with key stakeholders) technology in (2) energy-intensive industrial sectors / country +
 - Related capacity
 - Barriers to be removed
 - Determination of key stakeholders
 - Examination of SD / SID objectives & indicators

Phase I & II activities

- National development of (teams of national experts in full consultation with key stakeholders) preliminary portfolio of industrial CDM projects +
 - Barrier removal strategies
 - ‘Integrated’ capacity building programme
 - Public–private partnerships
 - Network & knowledge base

Phase I & II activities

- Supportive studies (to date)
 - Key infrastructure requirements for industrial projects
 - Integration of MEAs into national legislation
 - Financing of (large– and small–scale) industrial projects (under the CDM)
