

Session III

GHG Inventory

Chair's Introduction

GHG Inventory

Background

- GHG Inventory is a fundamental vehicle with which countries stock-take the situation of GHG emission and sinks.
- It is pointed out that one key of MRV mitigation actions is GHG Inventory. But it needs to be clarified how they can utilized.

Session's Structure

Developing country efforts, challenges and opportunities (1)
(Thou/Cambodia)

Developing country efforts, challenges and opportunities (2)
(Goco/Philippines)

Support for Developing Country
(Tanabe/NIES-GIO)

GHG Inventory as a key to NAMAs in a MRV manner
(Tanabe/NIES-GIO)

Key Questions

- What are challenges of developing GHG inventory for developing countries?
- How should we strengthen supports to developing countries?
- How can MRV be built on GHG inventory?
