

# Session IV

## Co-benefits Approach

Chair's Introduction

# Co-benefits

## Background

- Development is a priority of developing countries--- it is important that efforts to address climate change that also promotes national & local sustainable development.
- Future framework discussion already includes co-benefits (e.g. preferential treatment for improved CDM, Nature of SD-PAM etc).
- Not only concept level, but actual projects have been already in place, though national and international initiatives in the AP region.

## Session's Structure

Needs and Prospects of Co-benefits in Developing Countries  
(Chaiwat/Thailand)

Current Practice to promote co-benefits(1)  
(Wada/MOEJ)

Current Practice to promote co-benefits(2)  
Urakami/JICA

Current Practice to promote co-benefits(3)  
Kamayana/ADB

Current Status of CDM and its improvement in future  
Iyadomi/IGES

# Key Questions

- What are useful actions to scale up and institutionalize co-benefits in the AP region and a future regime?
- For CDM, what kind of specific steps can be introduced/reduced?
- Technology Transfer through co-benefits-related efforts?
- How do we maximize GHG reduction efforts through utilizing co-benefits?
