Content

- Status of Mongolia under the UNFCCC
- Current status of developing INDC

CURRENT STATUS OF MONGOLIA UNDER THE UNFCCC

The Mongolian government's response to address the issue of climate change has been positive

- Ratification of the UNFCCC (1993)
- Ratification of the Kyoto Protocol (1999)

Undertaken steps to implement UNFCCC's goal

- Initial national communication (1st November 2001)
- Submission of list of NAMAs (28th January 2010)
- Second national communication (10th December 2010)
- **National Action Program on Climate Change (6th January 2011)**
- Technology Needs Assessment (2013)

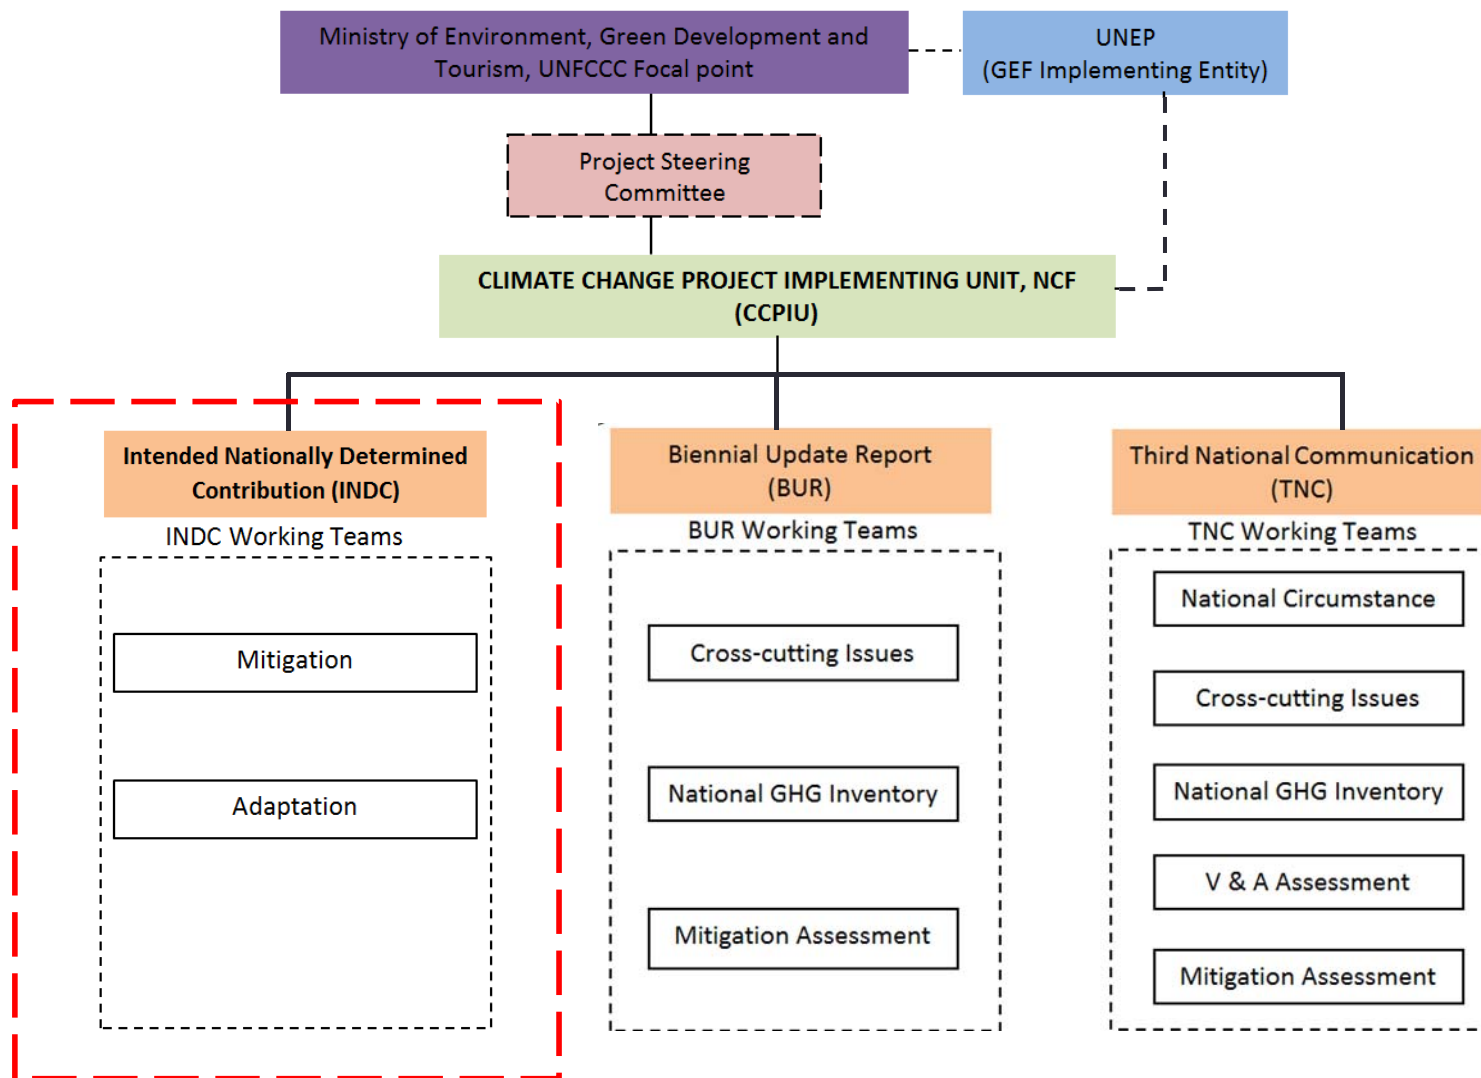

Ongoing projects to fulfill UNFCCC's reporting obligation

- Preparation of Third National Communication (TNC)
- Preparation of first Biennial Update Report (BUR)
- Preparation of Intended National Determined Contribution (iNDC)

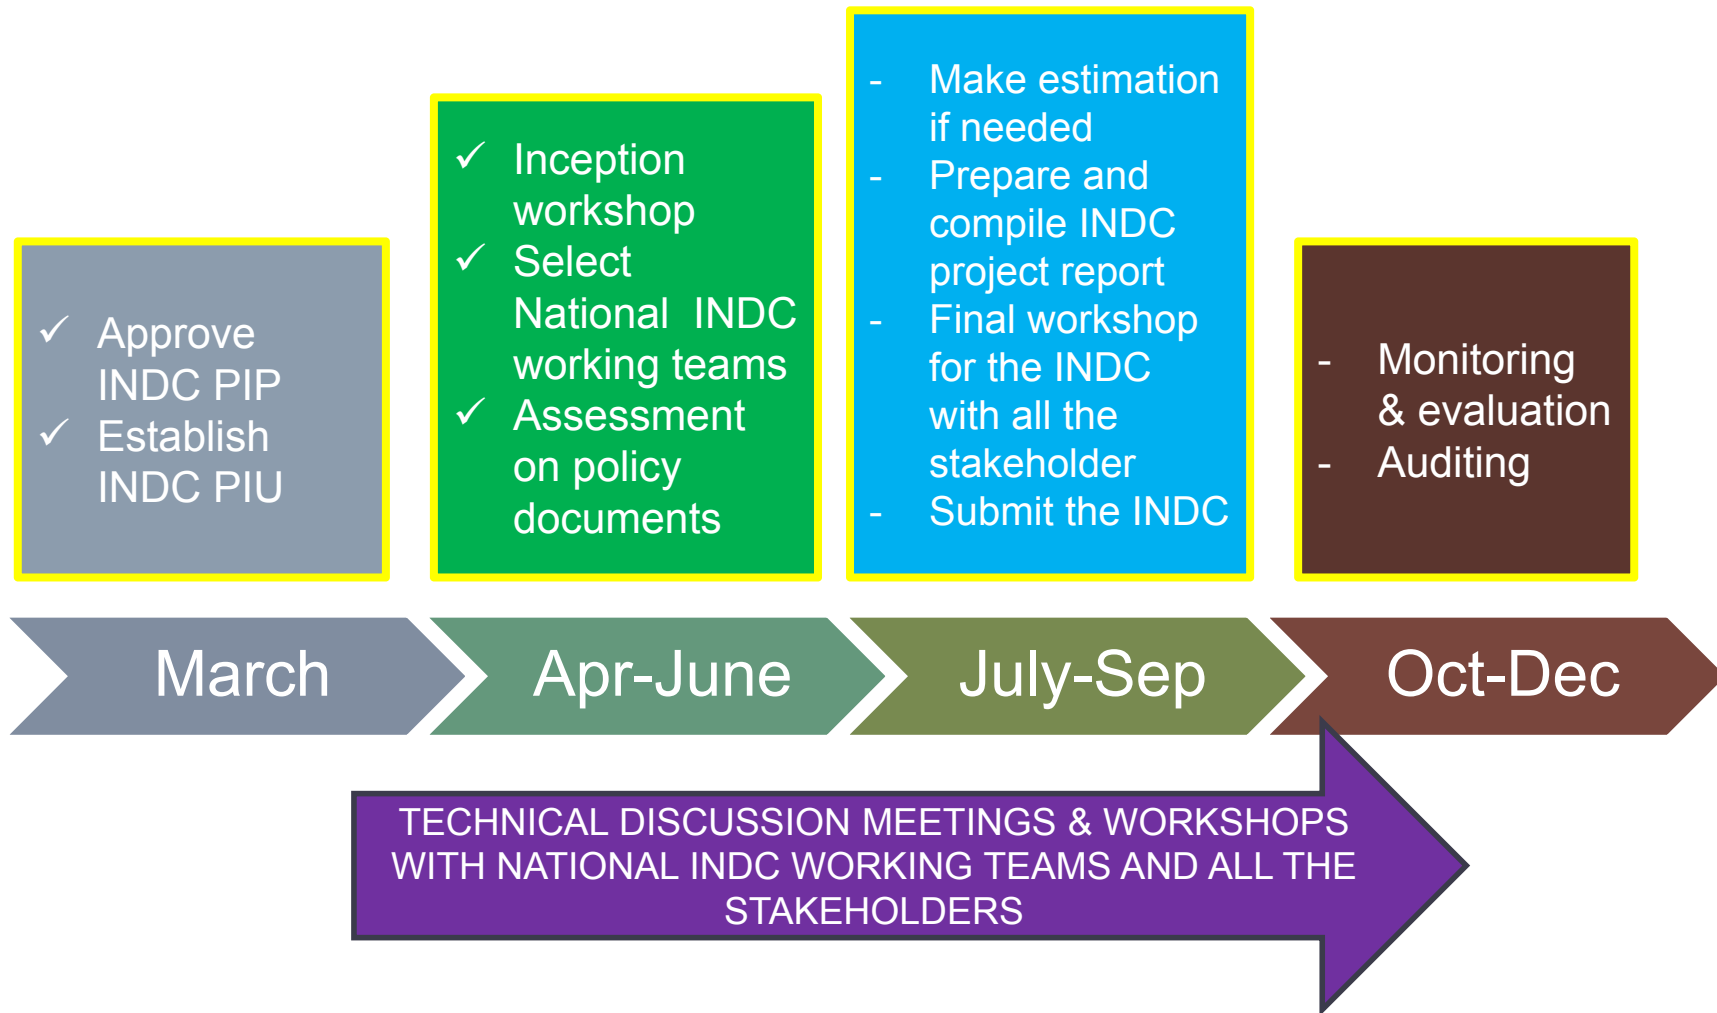

Project Name:	Mongolia: Preparation of intended nationally determined contribution (INDC) to the 2015 Agreement under the United Nations Framework Convention on Climate Change (UNFCCC)
Objective:	To prepare and submit Mongolia's intended nationally determined contribution (INDC) to the 2015 United Nations Framework Convention on Climate Change (UNFCCC)
Project number:	GFL/5070-2724-4F19-2205; PMS: GF/3010-15-01
Type:	Enabling activity
Executing agency:	Climate Change Project Implementing Unit of the Nature Conservation Fund under the Ministry of Environment, Green Development and Tourism
Implementing agency:	The United Nations Environment Programme (UNEP)
Duration:	March 2015 – December 2015 (INDC submission to the UNFCCC Secretariat before October 2015)
Funding:	Total fund USD 220,000 GEF: USD 200,000 / In-kind Government Contribution: USD 20,000
Project components (tentative):	<ul style="list-style-type: none"> - Mitigation - Adaptation - Technology - Finance - Capacity building

INSTITUTIONAL ARRANGEMENT OF INDC MONGOLIA

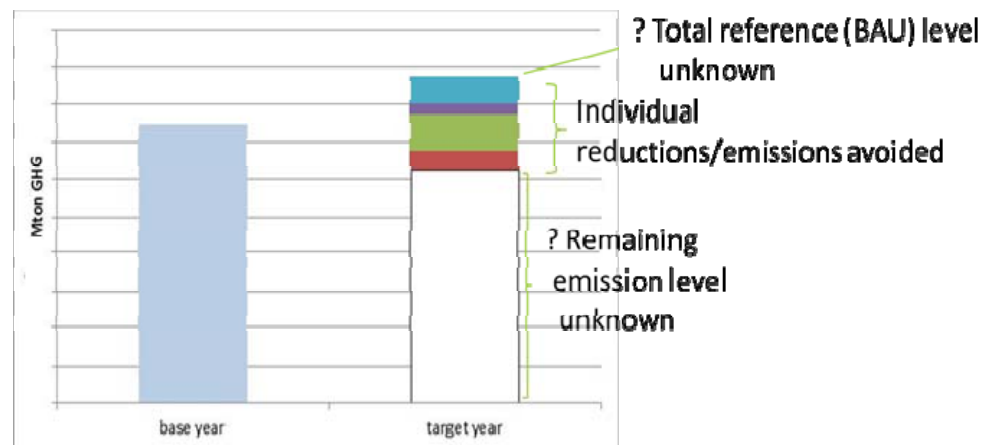

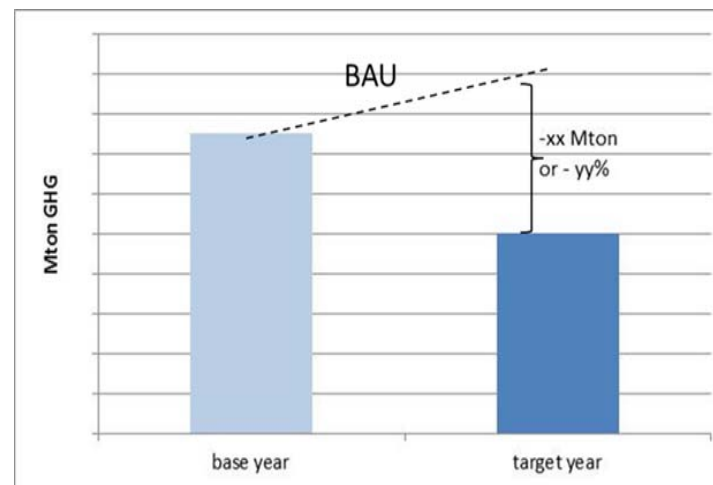

MONGOLIA: “PREPARATION OF INDC TO THE 2015 AGREEMENT UNDER UNFCCC” PROJECT ACTIVITY PLAN

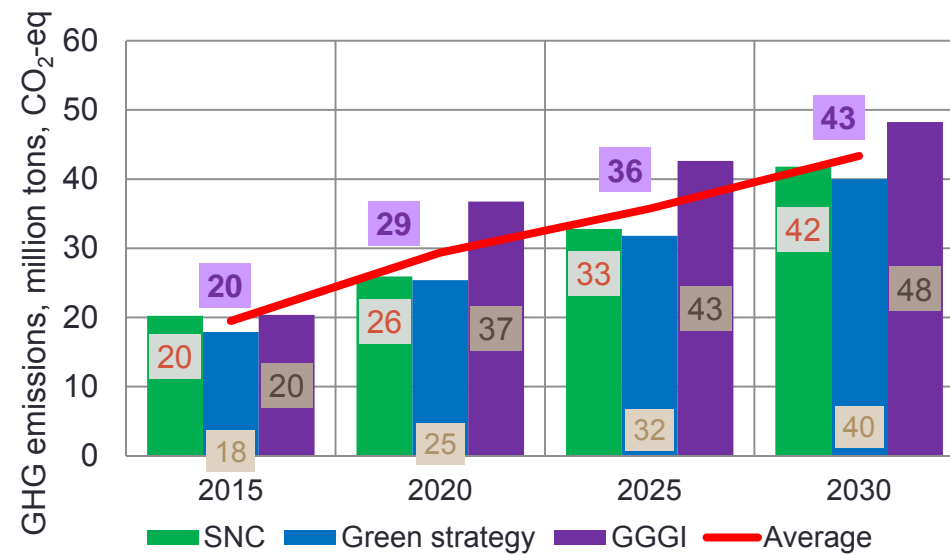

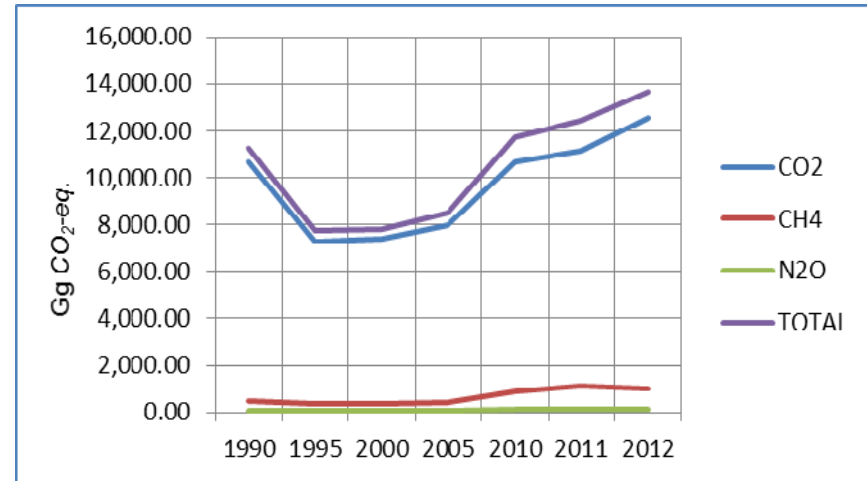

MONGOLIA: OPTIONS FOR MITIGATION

- Type of Contribution:
 - BAU- projects & activities
 - Projects & activities
- Advantages & Disadvantages

INDC: MITIGATION

- Sector: Energy & Industry
- Gases: CO₂, (N₂O)
- Base year: 2012
- Target year: 2030

SNC – Second National Communication
GGGI – Global Green Growth Institute

INDC: ADAPTATION

THE SECTION COULD BE CONSIST OF:

- CC trend, impacts & vulnerability (forest, water resources, animal husbandry8 arable farming, soil, pastureland, natural disaster, human settlement & tourism)
- Need of long term adaptation strategy, objectives, projections
- Current and short term adaptation measures and activities
- Technologies and methodologies to implement adaptation measures and activities
- Constraints, needs & gaps to implement adaptation measures and activities
- Review of financial and technical support
- Methodology for monitoring & evaluation

CHALLENGES:

- Limited timeframe
- Technical and human capacity
- Coordination and communication with key ministries / agencies to engage actively on INDC development
- Understanding the importance of INDC

THANK YOU
