

**A practice of wise use,
achieved by collaborative work with
different sectors in Asahidake area,
Daisetsuzan National Park**

Kazuhiro ARAI

A director of NEOS (Nature Experience Outdoor School Hokkaido)

What is NEOS?

- We are a “Nature Experience Outdoor School”. Users of nature.
- Aim : supporting sustainable community development by experiential learning in nature and community.
- Our specialty is experiential learning in nature
- Main project: 1 E.E. / O.E. (ex. summer camp for children)
 - 2 Eco-tours
 - 3 Education and training for leaders or guides.

Mt. Asahidake Area in Daisetsuzan National Park

The largest N.P in Japan = 226,000 ha

Mt. Asahidake area

Sugatami circuit

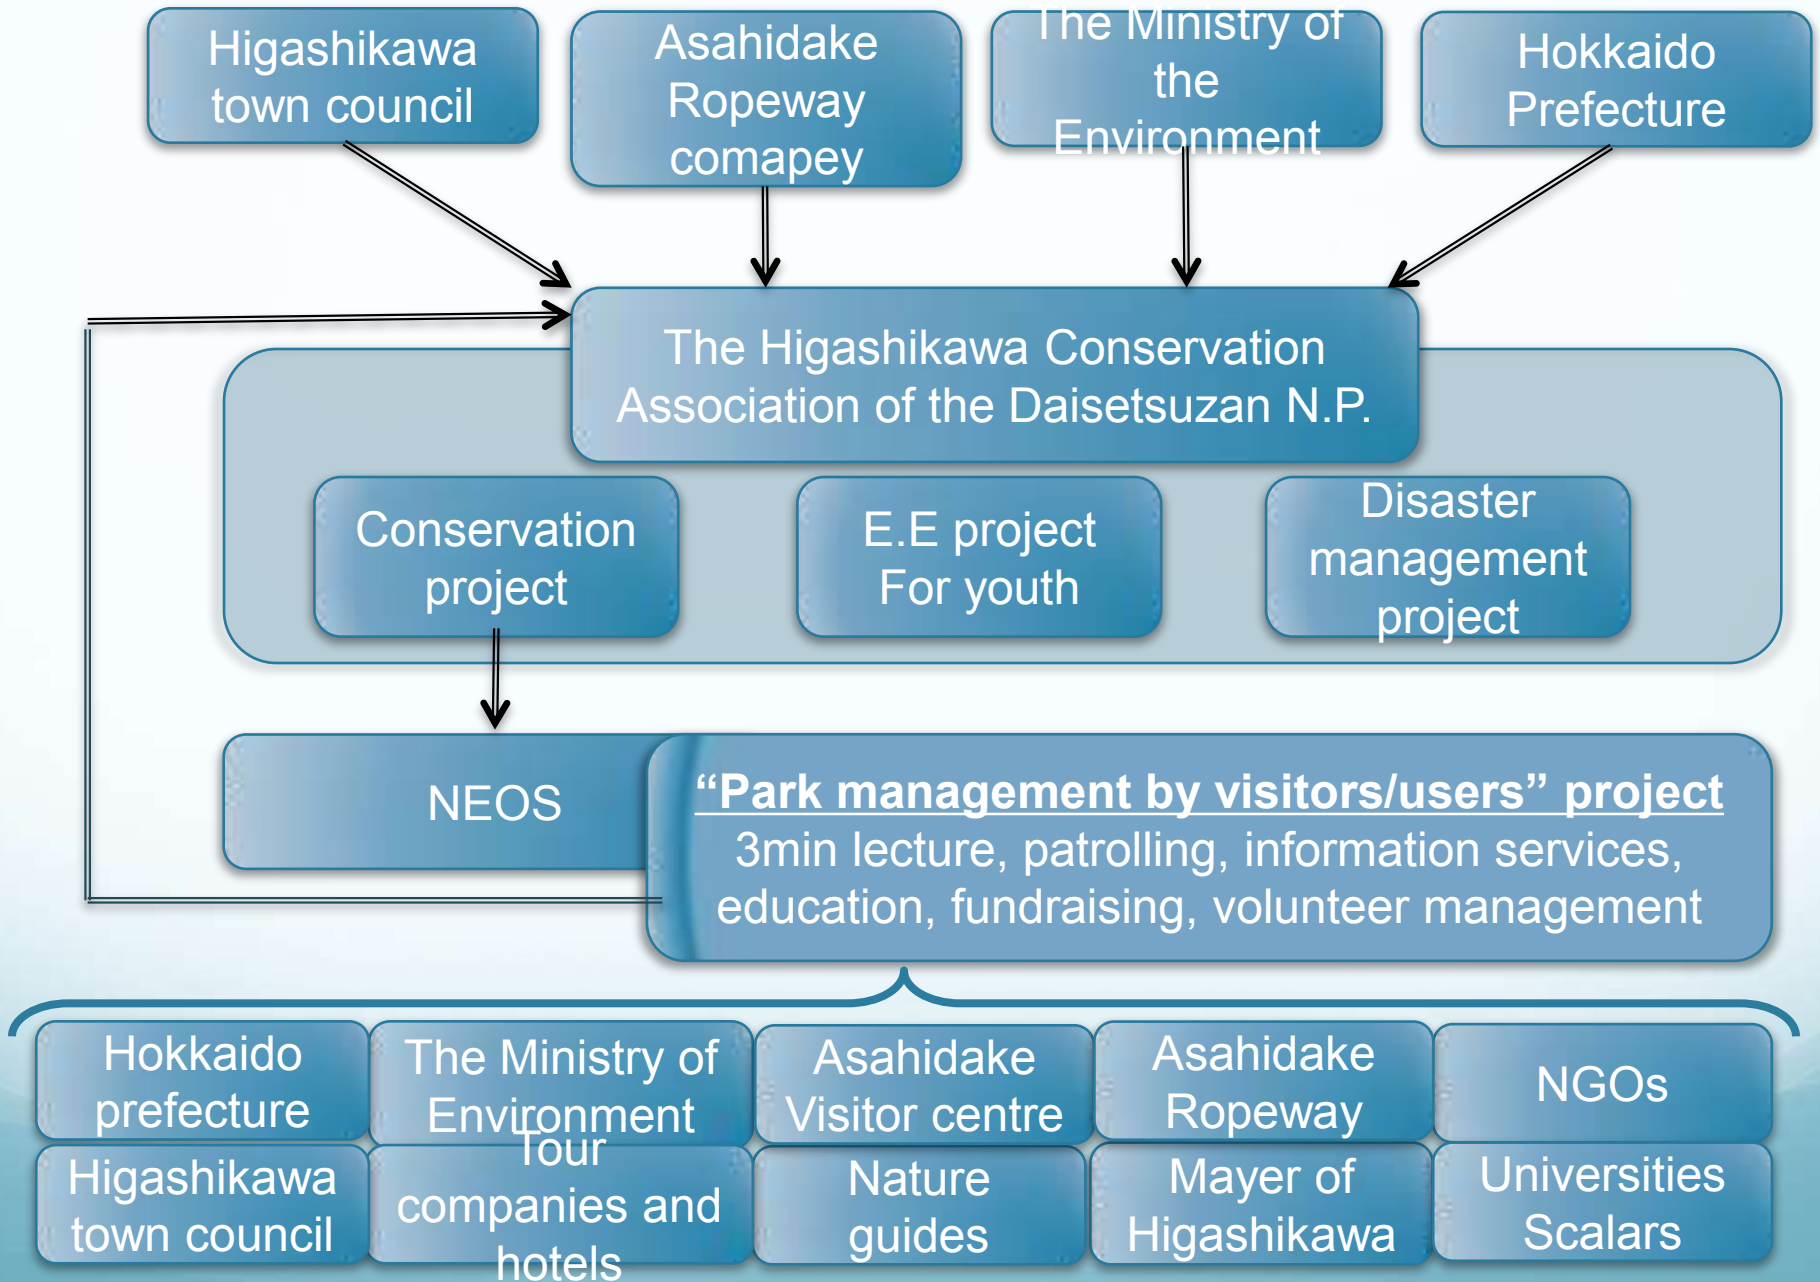

- 1600m height
- Ropeway access.
- 13,000 ropeway ride /season
- A gate to Mt. Asahidake
- 1.7km around
- Various alpine flora
- Maintained track

Data of our project

- **Period:** from the 15th May to the 15th of November (6months)
- **Area:** Sugatami circuit(1.7km) + surrounding tracks (8km) in Mt. Asahidake area (Higashikawa town district) in Daisetsuzan National Park.
- **Staff:** 7rangers. 4 full time (5days a week) + 3 part time (3days a week)
- **The organisation and the stakes holders:** the next page
- **work:** the next page.

The organisation & the stakes holders

The work

- Keeping the park clean and tidy.
- Patrolling stealing plants and animals
- Track maintenance
- Supporting researches
- Information service desk
- 3 minutes lecture (every 15min)
- Training the rangers and volunteers
- Fundraising (donation, rental gumboc

Achievements; Information service

- Providing the lecture & setting up the info counter (the ropeway company)
- Collecting flowering data and accumulate it for the flowering calendar (Asahidake visitor centre)
- Weekly “Nature letter” in 4languages -English, Chinese, Korean, Japanese- (to other NGOs)

freezing. Town ro:

Achievements; Fundraising

- Lecture and guide's comments, encourage donation. (guides, tour operators)
- Gumboots rental: visitors are happy to pay for the service and the environment. (ropeway company buys us the gumboots)

Track maintenance

「近自然工法」
「Naturnaher」

Use natural rocks
from the surrounding

Steps are at the both
sides and less than
50cm.

Hikers volunteer to
carry the rocks.

Making the way what
people want to walk.

Track maintenance

Putting the course rope up.

The rope are height of knee and hip.

Signs to go back to the ropeway during snow season.

Setting

Practical skills

- Steps are within 50cm, and are placed both sides of the track.
- The height of the course ropes are at the knee and hip.
- Listening to the lecture together with other visitors creates a mutual resistant. Visitors check each others behavior.
- Not give them restrictions, but let know supportive info of what they want to do.
- Inform to walk clock way at the lecture. (according to a research of prof. Aikoh from Hokkaido Uni.)

The concept/ main idea

“Park management by visitors/users”

• Past Visitors VS rangers

Visitors feel no responsibility to the park mgmt and complain. Rangers prohibit using the uncontrolled, unmaintained area.

• Now Visitors = rangers

visitors use the park wisely with controlling their behaviors which reduce the impact to the environment. Not only nature but social environment, like noise.

“Reducing the management cost, increasing the income”

▪ Reducing the cost: volunteer, double achievements in single task. ▪ increasing the income: providing better services

challenges

- Cost of coordinator
- Communication with the stakeholders
- Service for various types of visitors (disabled, oversea visitors)

In the next a few years

- Organising “Daisetsuzan supporters’ club”
Fundraising/promotion organization
Asking all the uses of Daisetsuzan. Not only the visitors. (ex., farmers, Sake factories = using water)
- Developing the management skills and share them to other parks and areas.
