

# 分科会1 サンゴ礁保全

- 地球規模の影響(地球温暖化)と、局所的な影響(赤土、オニヒトデ、漁業等)の両方に対応する必要性
- Need to address both global impacts (climate change) and local impacts (soil runoff, COTS, fisheries, etc.)
- 影響軽減対策の経済学的な正当性
- Economic justification of mitigating the impacts
- 太平洋島嶼における島特有の課題の共通性
- Commonalities of the issues among Pacific island countries
- 流域全体の連携や、分野間の連携(生物学・生態学と経済学・社会学など)の重要性
- Importance of networks on a watershed level and among different disciplines (biology, ecology, economics, sociology, etc.)
- 保全につながるサンゴ礁関連の研究の継続と、意見交換の場の確保
- Need to continue coral-related researches that would lead to conservation and to secure a platform for exchange
