

Sanriku Reconstruction (*Fukko*) National Park Initiative

—Re-formation of natural parks in the disaster-affected area—

Natural Parks on the Pacific coast in Tohoku

Concrete Measures toward Reconstruction

1. Re-formation into the New “Sanriku Reconstruction (*Fukko*) National Park (tentative)” in *satochi-satoumi* style in cooperation with fishery
2. Long trail and afforestation as a symbol of reconstruction
3. Place to report and pass on stories on disaster and monitoring

The Basic Points of building a New Park

- Biodiversity and Linkage with forest/sato/ocean
- Cooperation with agriculture, forestry and fishery, and collaboration with the region
- Cooperation with disaster-prevention and passing on stories of tsunami disaster
- Global Geoparks Network
- Promotion of tourism, eco-tourism, and local employment

Contribute to the Reconstruction of disaster-affected areas by establishing a new type of National Park, which is closely connected with disaster management and fishing industry
