#### **Yokohama Declaration**

#### - Environmental matters -

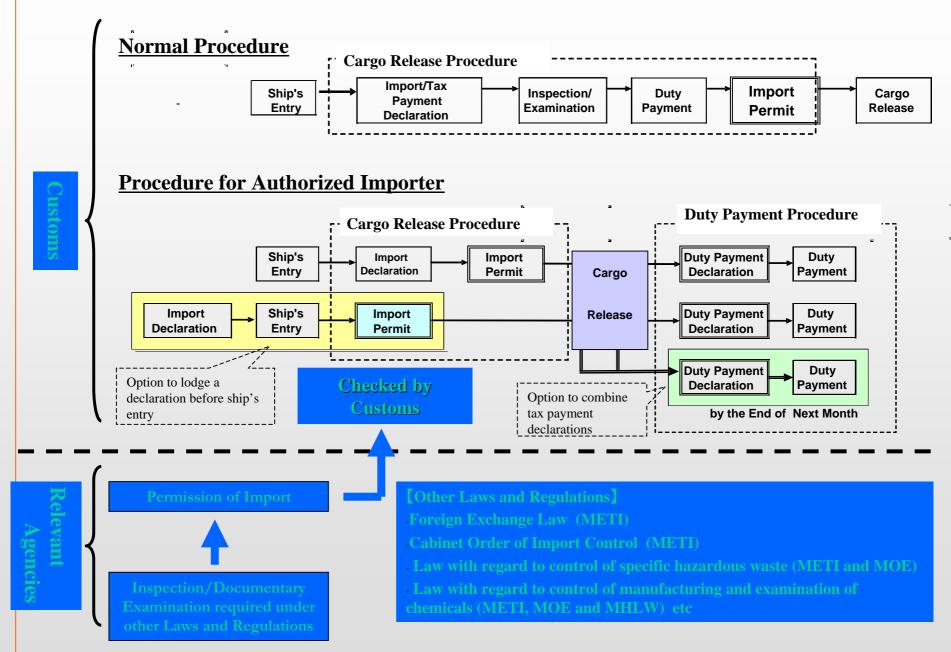

- Environmental issues are universal challenges that are essential to assure human security and quality of life, to protect the ecosystem and global environment, for which international efforts are indispensable. ASEM has focused on this challenge of utmost importance, releasing for example "the ASEM 6 Declaration on Climate Change" at the last ASEM Summit in 2006.
- Recognizing that ASEM Customs should also respond to this challenge, the 7th ASEM Customs DG-Commissioners Meeting discussed this issue for the first time, which
  - confirmed that ASEM Customs should strictly enforce the Multilateral Environmental Agreements (MEAs) such as the Basel Convention, the CITES, and the Montreal Protocol, in cooperation with related international organizations.
  - <u>agreed to continue international dialogue and cooperation</u> through the exchange of information on MEA enforcement, and to make further efforts towards solving these global problems.
