

Annual Report on Environmental Statistics 2015

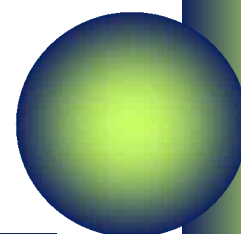

Edited by

Ministry of the Environment

Government of Japan

Environmental Policy Bureau

Chapter 1 Society and Economy in General

	page
1.01 Population, area, gross production and electricity consumed by prefecture	1
1.02 Population by city (as of March 31, 2012)	5
1.03 None	6
1.04 Transition of total amount of domestic primary energy supply	7
1.05 Transition of domestic final energy consumption	8
1.06 Final energy consumption by consumer sector energy	9
1.07 Food supply and demand	10
1.08 Steel product supply and demand	13
1.09 Gross domestic expenditure (Standard National Accounts Statistics in 2005: Chained method)	14
1.10 Population · Labour · Prices	15
1.11 Manufacturing energy consumption (industry specification)	16
1.12 Production indices of Manufacturing (Industry specification/additional value weight IIP)	17
1.13 Unit of energy consumption per IIP manufacturing	18
1.14 Residential sector energy consumption (separated by purpose)	19
1.15 Residential sector energy consumption (separated by source of energy)	20
1.16 Residential sector energy consumption (separated by purpose per household)	21
1.17 Residential sector energy consumption (separated by purpose and source of energy per household)	22
1.18 Spreading Status of equipment of energy consumption for home use	23
1.19 Business sector energy consumption (separated based on purposes)	24
1.20 Business sector energy consumption (separated by source of energy)	25
1.21 Business sector energy consumption (separated by type of business)	26
1.22 Business sector energy consumption (separated by purpose per floor area)	27
1.23 Business sector energy consumption (separated by purpose and type of business per floor area)	28
1.24 Business sector total floor area	29
1.25 Transport sector energy consumption (separated by transportation)	30
1.26 Unit of transport sector energy consumption (separated by transportation)	31
1.27 Transition of scale of assessments for electric power generation	32
1.28 Transition of rate of utilization for nuclear power plant	33
1.29 Transition of unit for electric power emission	34
1.30 Transition of supply quantity of new energy	35
1.31 Deployment result of cogeneration equipment	36
1.32 Actual result of Sales and Construction solar system	37
1.33 Construction results of solar system by purpose	38
1.34 Deployment quantity of solar power, wind power and waste power generation	39
1.35 Deployment quantity of new energy	40
page	
1.36 Population, Area and GDP by country and region	41
1.37 Transition of world population	43
1.38 Major urban population	44
1.39 Major national environmental data	45
1.40 Total amount of export and import by country and region	47
1.41 Energy balance by countries and regions (production amount, consumption amount)	48
1.42 Consumption of coal, oil , natural gas and electric power	51
1.43 Production of mining industry (energy resource)	52
1.44 Electric power production	53
1.45 Reserve of coal, crude oil, natural gas and uranium	54
1.46 World new energy supply	55
1.47 Railway transport volume	56
1.48 Present road conditions	57
1.49 Car ownership in each country	58
1.50 Supply of calorific value (2003)	59
1.51 Production quantity of marine products (classified by species)	60
1.52 Social and environmental indicators in developing countries.(vol.1)	64

Chapter 2 Global Environment

	page
2.01 Transition of each greenhouse gas emission in Japan	66
2.02 Transition of Carbon Dioxide Emissions by Sectors in Japan	67
2.03 Transition of Major Socioeconomic Activity Amount and Carbon Dioxide emissions	68
2.04 Transition of carbon dioxide emissions by energy use by major countries and regions	70
2.05 Carbon dioxide emissions by sources in major countries and each region	72
2.06 Atmospheric concentrations and anthropogenic emission of CO ₂	73
2.07 Individual greenhouse gas emissions by country and region (2005)	74
2.08 Penetration rate of major consumer durables i.e.(general households)	75
2.09 Average year differences of annual average surface temperature of the World and Japan	77
	page
2.10 Transition of shipping volume of CFC in Japan	78
2.11 Transition of production and consumption volumes of HCFC in Japan	81
2.12 Transition of production volume of CFC in the world	82
2.13 Emissions of Ozone Depleting Substances by PRTR	83
2.14 Changes of Background Concentration over the Years in the Atmosphere of Specified Substances in Hokkaido	84
2.15 Transition of annual average of total ozone over Japan	86
2.16 Transition of ozone hole area in the Antarctic	87
2.17 Status of CFC Recovery and Destruction	88
2.18 Japan's contribution to the Montreal Protocol Multilateral Fund	89
	page
2.19 Transition of emission of sulfur dioxide (SO ₂) in each country	90
2.20 Transition of emission of nitrogen oxide (NO _x) in each country	91
2.21 Status of acid deposition in Europe.(Annual average of pH value in rainwater)	92
2.22 Status of Acid Deposition in Japan (Annual Average of pH in Precipitating water)	93
2.23 Annual average pH in the measurement points of East Asia acid deposition monitoring network (EANET)	94
	page
2.24 Water quality of rivers	95
2.25 Water quality of lakes	96
2.26 User population of sewage treatment facilities	97
	page
2.27 Amount of water intake and fresh water resources in each country	98
	page
2.28 Oil spill accident from tankers 1975 - 2003	100
2.29 Transition of Waste Disposal into the Sea	101
	page
2.30 Consumption of fertilizer in each country	102
	page
2.31 Change of land-use in each country	103
2.32 Number of endangered species in each country	104
	page
2.33 Agriculture land area by country	107
2.34 Forest area in each country	108
	page
2.35 Major causes of soil degradation by region	109
	page
2.36 Generated amounts of waste by sectors in each country (latest data after 1993)	110
2.37 Amount of general waste in each country	111
2.38 Configuring percentage of general waste in each country	112
2.39 Status of general waste disposal in each country	113
2.40 Recycling rate of waste in each country (paper and paperboard)	114
2.41 Recycling rate of waste in each country (glass)	115
	page
2.42 Moving status and occurrence of hazardous waste in each country	116
	page
2.43 Performance records of Environment-related ODA	119

Chapter3 Natural Environment

	page
3.01 Area of forest converted by purpose	120
3.02 Area of five regional categories on Basic Land Use Planning by prefectures (March 31, 2009)	121
3.03 Composition Ratio of Vegetation Categories by Region	122
3.04 Vegetation Composition and its Naturalness by Region	123
3.05 Changes in Vegetation Composition and its Naturalness over time	124
3.06 Forest areas by prefectures and type of business	125
3.07 Area of forest used for public benefit by prefectures	126
	page
3.08 Transition of Annual number of Users and the Number of Natural parks	127
3.09 Number of users in each national park	128
3.10 Number of users of quasi-national parks	131
3.11 Number of Applications for National Parks Permits (Numbers of Approvals by the Ministry of the Environment)	135
3.12 Area of Natural Parks by Prefecture	136
3.13 Area of Natural Parks by Region	137
3.14 Sea Parks located in the National Parks and the Quasi-National Parks	138
3.15 Area of Wilderness Areas, Nature Conservation Area	140
3.16 Area of World Natural Heritage Area	142
	page
3.17 List of Interannual Survey of Administrative Controls (from FY 2002)	143
3.18 Survey on the Administrative Controls based on Hot Springs Law in 2012(by prefecture)	144
3.19 Interannual Change of Utilization of Hot Springs	147
3.20 Utilization of Hot Springs by prefecture	149
	page
3.21 Status of city parks (by prefecture)	151
	page
3.22 Transition of the nationwide Coastline	154
3.23 Status of Lake shorelines Alteration	155
3.24 Extension of the coast by prefecture	156
	page
3.25 States of Distribution of Extant Tidal flats (by sea area)	157
3.26 Transition of Nationwide tidal flats area	159
3.27 Status of Distribution of Extent Sea grass Bed (by sea area)	160
3.28 Area of Hermatype by prefecture	162
3.29 Registration Status of Ramsar sites in Japan	163
	page
3.30 Threatened Wildlife Species in Japan (The species red-listed by the Ministry of the Environment)	164
3.31 Specifying Number of National Endangered Species of Wild flora and fauna and the Number of the Programs for the Rehabilitation of Natural Habitats and Measures	165
3.32 Designation of Natural Habitat Conservation Area	166
3.33 Status of Wildlife Protection areas and Hunting designated areas	167
3.34 Number of Hunting Licenses and Captured Wildlives	168
3.35 Removal Confirmation and Approved Cases on Designated Categories of Invasive Alien Species, based on Invasive Alien Species Act	169
	page
3.36 Registration Status of the Animal Handling Business Operators	170
3.37 Interannual Change in the Number of Dogs and Cats for Adoption, Surrender, Reunion with Owners, and Euthanasia	172

Chapter 4 Material flow

	page
4.01 Material Flow in Japan	173
4.02 Transition of Material Flow Indicators in Japan	174
	page
4.03 Waste Disposal Flow Sheet (Performance in FY2011)	175
4.04 Transition of Total Emissions of Waste	176
4.05 Transition of Emissions of Waste per person per day	177
4.06 Current Status of Waste Disposal by Prefecture (Actuals for FY2010)	178
4.07 Transition of the number of waste incineration plants by type and the operating capacities	180
4.08 Development Status of Waste Incineration Plants by Prefecture (Actuals for FY 2010)	181
4.09 Development Status of Recycling Facilities	182
4.10 Development Status of Recycling Facilities by Prefecture (Actuals for FY2009)	184
4.11 Transition of Development Status of Bulky Waste Disposal Facilities	185
4.12 Development Status of Bulky Waste Facilities by Prefecture (Actuals for FY2010)	186
4.13 Transition of Total Volume of Waste Final Disposals	187
4.14 Development Status of Final Disposal Sites by Prefecture (Actuals for FY2010)	188
4.15 Transition of Annual Expenses for the Waste Management	190
4.16 Transition of Expenses of Waste Management Program	191
	page
4.17 Recycling Process Flow of Industrial Waste (in FY 2009)	192
4.18 Emissions of Industrial Waste by Industrial Sector	193
4.19 Emissions of Industrial Waste by Type	196
4.20 Transition of Disposal Treatment of Industry Waste	198
4.21 Transition of the Number of Permissions of the Industrial Waste and the Remaining Periods of the Capacity of the Final Disposal Sites	199
4.22 Number and Amount of Illegal Dumping of Industrial Waste by Prefecture (including Newly-detected cases)	200
4.23 Survey on Environmental deterioration of Illegal dumping and the Preventive measures by prefecture (the outstanding cases as of the end of 2011)	203
4.24 Illegal dumping categorized by group	204
4.25 Number of the Remaining Cases of Illegal Dumping and Outstanding Amount (as of the end of FY2011)	205
4.26 Number of the Remaining Cases of Illegal Dumping and Outstanding Amount by Prefecture (as of the end of FY2011)	206
4.27 Improper Disposal of Sulfate Pitch (Status as at the end of 2011)	207
	page
4.28 Status of Regional Waste Management (2010)	208
4.29 Status of Regional Waste Management (FY2010)	209
	page
4.30 Percentage of Containers and Packaging in Household Waste	210
4.31 Transition of shipping volume of glass bottles	211
4.32 Production and emission of plastics	212
4.33 Transition amounts of aluminum cans and recycling ratio	213
4.34 Transition of consumption and recycling rate of steel cans	214
4.35 Transition of recovery rate of cardboard	215
4.36 Transition of production volumes and recovery ratios of PET bottles	216
4.37 Utilization of products from recycled plastic bottles	217
4.38 Transition of sales volume and collection rate of household cartons	218
4.39 Actual Achievement on Sorted Collection and Recycling based on the Containers and Packaging Recycling Act	219
4.40 Transition of production volume and recycling rate of foamed polystyrene	220
	page
4.41 Implementation status of Recycling of Specified Home Appliances	221
	page
4.42 Emission by type of construction waste (FY2008)	223
4.43 Recycling status of construction waste by items	224
	page
4.44 Generation of food waste and treatment status	225
	page
4.45 Performance of collection of used cars	226
4.46 Rate of recycling of Shredder dust and the like by automobile manufacturers	227
	page
4.47 Performance of voluntary collection and resource regeneration of PC and small rechargeable batteries (in fiscal year 2008)	228

Chapter 5 Water Flow

	page
5.01 Number of specified legal sites in accord with the Water Pollution Control Act	229
5.02 Number of specified legal sites by prefecture in accord with Water Pollution Control Act	230
5.03 Total research results of emission of water pollution substances (fiscal year 2007)	231
5.04 Achievement status of the environmental quality standards on health issues (non-achievement rate)	232
5.05 Transition of achievement results of environmental standards (BOD or COD)	233
5.06 Status of water quality of enclosed sea area (annual average of COD)	234
5.07 Transition of status of water quality in the specified lakes (COD)	235
5.08 Transition of Achievement Status of Environmental Quality Standards for total nitrogen and total phosphor in marine waters	236
5.09 Transition of Achievement Status of Environment Standards of total nitrogen and total phosphor in lakes	237
5.10 Transition of pollutant load generation in designated pollution control areas and pollutant load reduction target volumes	238
5.11 Number of occurrences of Red Tides in Seto Inland Sea	239
5.12 Licensed landfill area of Seto inland sea	240
5.13 Amount of sea gravel in coastal prefectures in Seto Inland Sea	241
	page
5.14 Number of excess cases of confirmed groundwater contamination incidents by determined fiscal year	242
5.15 Itemized breakdown of groundwater contamination cases (as of the end of fiscal year 2012)	243
	page
5.16 Results of water quality survey of groundwater	244
	page
5.17 Transition of number of confirmed marine pollution cases sea	249
5.18 Transition of number of detained of marine environmental laws violations	250
	page
5.19 Urine treatment flow sheet (result in fiscal year 2011)	251
5.20 Transition of Population of flush and treatment volume of urine	252
5.21 Current situations of excreta disposal treatment facilities by prefectures (Performance in FY2011)	254
5.22 Transition of maintenance states of excreta disposal treatment facilities (by types, nationwide, construction bases)	256
5.23 Transition of number of installed septic tanks (Nation wide)	257
5.24 Current maintenance states of excreta disposal treatment facilities (according to facilities established by municipalities and administration associations)	258
5.25 Usage state of septic tanks and community plants according to prefectures (as of the end of FY2012)	259
5.26 Coverage state of population served by waste disposal system by year	260
5.27 Transition of expenses of urine treatment project	261
	page
5.28 Production of major agrochemicals	262
5.29 Transition of registered number of agrochemicals by year	263
5.30 Production of chemical fertilizer	264
5.31 Transition of numbers of incidents that exceed Environmental Quality Standards (EQS) for soil pollution	265
5.32 Number of soil contamination investigations and countermeasures taken by prefectures in FY2011	266
5.33 Progress status of countermeasures taken against farmland contamination	267
5.34 Area of designated areas and pollution prevention projects completed areas	268
	page
5.35 Usage conditions of the country's ground water	269
5.36 Transition of nationwide ground subsidence	270

Chapter 6 Atmospheric Environment

	page
6.01 Transition of number of facilities with apparatus exhausting flue gas	271
6.02 Number of facilities with apparatus exhausting flue gas by prefectures	272
6.03 Transition of number of dust discharging facilities (general dust/specified dust)	273
6.04 Number of general dust discharging facilities by prefectures	274
6.05 Conditions of air pollutant emission (Stationary sources)	275
6.06 Sulfur oxide emissions (breakdown according to different facilities)	276
6.07 Nitrogen oxide emissions (breakdown according to different facilities)	277
6.08 Dust and soot emissions (breakdown according to different facilities)	278
	page
6.09 Transition of number of cars owned	279
6.10 Total gross traffic/Traffic volume by prefectures and number of vehicles owned	286
6.11 Transition of freight transportation	287
6.12 Transition of passenger transportation	289
6.13 Transition of transport sharing ratio by transportation	291
6.14 Status of development and coverage rate of national highways by prefecture (as of April 1st, 2012.)	293
6.15 Traffic Volume of National Expressways, Urban Expressways and Public Highways	296
6.16 Changes in Kilometers Traveling (one million kilo)	298
6.17 Transition of Passenger cars (private use/business use) increasing in size (and weight)	299
	page
6.18 Transition of number of registered environmentally friendly vehicles	300
6.19 Transition of facility numbers for providing fuel to environmentally friendly cars	301
	page
6.20 Transition of yearly average of CO2 concentrate (General Environment Air Monitoring Stations/Motor Vehicle Exhaust Monitoring Stations)	302
6.21 Transition of environmental standards achieved (General Environment Air Monitoring Stations/Motor Vehicle Exhaust Monitoring Stations)	303
	page
6.22 Transition of yearly mean of Carbon dioxide and Carbon Monoxide concentrate(General Environment Air Monitoring Stations/Motor Vehicle Exhaust Monitoring Stations)	304
6.23 Transition of Nitrogen dioxide environmental standards achieved	305
6.24 Transition of Nitrogen Dioxide environmental standards achieved according to prefectures(General Environment Air Monitoring Station)	306
6.25 Transition of achievement status of environmental standards of Nitrogen Dioxide according to prefecture(Motor Vehicle Exhaust Monitoring Station)	307
	page
6.26 Transition of yearly mean value of suspended particulate matter concentrate(General Environment Air Monitoring Station/Motor Vehicle Exhaust Monitoring Station)	308
6.27 Transition of achievement status of Environmental Standard of Suspended Particulate Matter (General environment air monitoring station/Motor vehicle exhaust monitoring station)	309
6.28 Yearly average value of Suspended Particulate Matter	310
6.29 Environment achievement status of Suspended Particulate Matter according to prefectures (General Environment Air Monitoring Station)	311
6.30 Environment achievement status of Suspended Particulate Matter according to prefectures (Motor Vehicle Exhaust Monitoring Station)	312
	page
6.31 Transition of Yearly Mean Value of Carbon Monoxide Concentrate(General Environment Air Monitoring Station/Motor Vehicle Exhaust Monitoring Station)	313
	page
6.32 Transition of Yearly Mean Value of Non-Methane Hydrocarbon Concentrate(General Environment Air Monitoring Station/Motor Vehicle Exhaust Monitoring Station)	314
	page
6.33 Transition of national mean concentrate of hazardous air pollutants among which environmental standards are set	315
6.34 Transition of the Environmental Quality Standards Status of Hazardous Air Pollutants among which Environmental Standards are Set	316
6.35 Transition of national mean concentrate of hazardous air pollutants among which guidelines are set	317
6.36 Transition of the guideline status of hazardous air pollutants among which guidelines are set	318
	page
6.37 Transition of number of days when photochemical oxidant advisories were issued and number of people who reported the damage	319
6.38 Transition of number of days where photochemical oxidant advisories were issued by prefecture	320
	page
6.39 Transition of the number of specified facilities under the Noise Regulation Law	322
6.40 Transition of number of specified facilities under Vibration Regulation Law	323
6.41 Transition of number of specified facilities under Noise Regulation Law by prefecture	324
6.42 Transition of number of specified facilities under Vibration Regulation Law by prefectures	325
6.43 Transition of number of complaints regarding noise, vibration and odor	326
6.44 Achievement status on environmental standard of noise caused by automobiles, airplanes and Shinkansen	327

Chapter 7 Chemical Materials

	page	
7.01	Dioxins emission inventory	328
7.02	Result of environmental survey on dioxins in FY 2012	330
7.03	Transition of total daily intake of dioxins over time	331
7.04	Transition of daily intake of dioxins over time originated from total diet samples	332
7.05	Status of applications submitted from specified facilities based on the Law concerning Special Measures against Dioxins (according to prefectures, designated cities, and regional core cities)	333
7.06	Status of applications submitted from facilities under air control standards, based on the Law Concerning Special Measures against Dioxins (according to contents of applications)	335
7.07	Status of applications submitted from facilities under water control standards, based on the Law Concerning Special Measures against Dioxins (according to contents of applications)	336
		page
7.08	Number of applications for new chemical compounds submitted according to the Law Concerning the Examination and Regulation of Manufacture	337
7.09	Result of the initial environmental survey for Environmental Survey and Monitoring of Chemicals	338
7.10	Environmental survey details of the chemical environment in fiscal year 2011	339
7.11	Results of Environmental Monitoring in FY 2011	340
7.12	PRTR releases and transfers according to industry (FY 2011)	343
7.13	PRTR releases and transfers according to prefecture (FY 2011)	344
7.14	PRTR reported releases and releases outside notifications according to prefecture (FY 2011)	345
7.15	PRTR top ten substances of reported releases and transfers (FY 2011)	346
7.16	PRTR top ten substances of reported releases and releases outside notifications (FY 2011)	347

Chapter 8 Environmental Measures in General

	page	
8.01	Budget for competitive funding on environmental research and environmental technology development	348
8.01	Number of employees in environmental offices of local governments by prefecture	349
8.02	Transition of the Number of Trainees at the National Environmental Research and Training Institute, Ministry of the Environment	351
8.03	Transition of number of arrests due to environmental crime	352
8.04	Number of arrests due to Waste Disposal Act violations by type (2012)	353
8.05	Transition of general personnel and processing personnel of environmental laws violation cases	354
8.06	Pollution measure expenses of local governments (FY2010)	355
8.07	Regions under the Regional Environmental Pollution Control Programs	356
8.08	The Costs relating to the Pollution Prevention Projects, and Additional Subsidies	357
8.09	Existing number of Patients by Region, subject to Law Concerning Pollution-Related Health Damage Compensation and other Measures	358
8.10	Transition of Existing number of Patients by Region, subject to the Pollution Damage Compensation Act	359
8.11	Number of certified persons according to Act on Compensation, etc. for pollution related health damage (Status of application process for Minamata disease certification)	361
8.11	Judgement result on relief measures based on the Law Concerning Special Measures for Compensation of Minamata Disease	362
8.12	Status of accepting applications and certifying according to the Act on Asbestos Health Damage Relief	363
8.13	Rate of green purchasing in local governments and enterprises	364
8.14	Enforcement status of performed environmental impact assessment under Environmental Impact Assessment Law	365
8.15	The number of cases completed in an environmental impact assessment procedures under Environmental Impact Assessment Law (as of the end of 2012)	366
8.16	Status of formulating basic articles of Environmental Policy	367
8.17	Status of formulating basic plans of Environmental Policy	368
8.18	Status of environmental policies local governments are focusing on	369
		page
8.19	Business conditions of Environmental business in Japan	370
8.20	Top 5 Environmental business that are expected to grow (total of all enterprise scale)	371
8.21	Business outlook (Diffusion Index)	372
8.22	Environmental business outlook (by capital and by environmental business)	373
8.23	Initiatives toward environmental management (Listed companies)	374
8.24	Companies that disclose environmental information	375
8.25	Status of compiling and disclosing of environmental reports	376
8.26	Conditions of introduction of environmental accounting	377
8.27	Transition of test results for Pollution Control Manager and other National examinations	378
		page
8.28	Number of Environmental NGO and the like	379
8.29	The funding status of Japan Fund for Global Environment	380
