

(News Release)
The Results of Radioactive Material Monitoring Surveys of Aquatic Organisms
(2012 Fall Samples)

<Simultaneously released to the Fukushima Prefecture Press Club>

Friday, May 31, 2013
Water Environment Division,
Environment Management Bureau,
Ministry of the Environment
Direct line: 03-5521-8316
Switchboard: 03-3581-3351
Director: Masanobu Miyazaki (ext. 6610)
Deputy Director: Saori Nagasawa (ext. 6614)
Coordinator: Katsuhiko Sato (ext. 6628)

In accordance with the Comprehensive Radiation Monitoring Plan determined by the Monitoring Coordination Meeting, the Ministry of the Environment (MOE) is continuing radioactive materials monitoring in surface water and its sediment (rivers, lakes and headwaters, and coasts).

Samples of aquatic organisms taken mainly in Fukushima Prefecture (fall survey: sampling period: September 12-November 25, 2012) have been measured as part of MOE's efforts to monitor radioactive materials; the results have been compiled and are released here.

The monitoring results of radioactive materials in surface water bodies carried out to date can be found at the following web page: <http://www.env.go.jp/jishin/rmp.html#monitoring>

1. Survey Overview

(1) Survey Locations

| Type | Surveyed Areas | | Survey Locations, etc. | Survey Date |
|-----------|----------------|--|------------------------|--|
| Rivers | A | Abukumagawa River | | Near Shinfunahashi Bridge, Harasegawa River (Tributary) |
| | B | | | Surikamigawa River (Tributary) |
| | C | Udagawa River | | November 6, 7, 2012 |
| | D | Manogawa River | | October 24, November 5, 2012 |
| | E | Niidagawa River | | October 26, 31, 2012 |
| | F | Otagawa River | | September 12, November 8, 25, 2012 |
| Lakes | G | Hayamako lake (Mano Dam) | | October 23, 2012 |
| | H | Akimoto Lake | | October 22, November 16, 2012 |
| | I | Inawashiroko Lake | North Shore | October 24, November 15, 2012 |
| | J | | South Shore | October 22, November 16, 2012 |
| Sea Areas | K | Offshore of Abukumagawa River Estuary | | October 31, 2012 |
| | L | Somashi City Offshore (Matsukawaura Lake) | | October 30, 2012 |
| | M | Iwakishi City Offshore (Hisanonama Beach Offshore) | | November 5, 22, 2012 |

(Map attached)

(2) Survey Method

Samples of aquatic organisms (aquatic insects, algae, crustaceans, shellfish, fishes, etc.) were collected and the concentration of radioactive materials (radioactive cesium (Cs-134 and Cs-137), etc.) in each type of organisms was measured.

2. Survey Results Summary (See Annex for details)

(1) Rivers and Lakes (Lower row in each case shows the results of 2012 summer surveys)

There are variations between each body of water and the types of organism collected, but in general, a decline in the concentrations of radioactive cesium can be seen compared to the 2012 summer survey. Furthermore, just as in previous surveys, the concentration of radioactive cesium in rivers and lakes is higher than in sea areas.

| | | | Plants (algae) | Aquatic insects | Crustacean | Shellfish | Fishes | Amphibians | CPOM (dry leaves, etc.) | Unit: Bq/kg-wet | |
|-----------------------------|---|----------------|------------------------|------------------------------|------------------------|-----------|---------------------------|-----------------------------|----------------------------|-----------------|--|
| Abukumagawa River System | Abukumagawa River A | Fall 2012 | 9.3 | 54 (1 species) | 30 | 24 | 33-172 (7 species) | 52, 720 (2 species) | 350 | | |
| | | Summer 2012 | 94 | 199 (8 species mixed) | 107, 156 | 39 | 34-70 (3 species) | 104 (3 species mixed) | 1,330 | | |
| | Abukumagawa River B | Fall 2012 | 68 | 14-208 (4 species) | 54 | 63 | 35, 103 (5 species) | 470 | 237 | | |
| | | Summer 2012 | 360 | 139 (8 species mixed) | - | - | 56-600 (13 species) | 87, 750 (2 species) | 270 | | |
| | Udagawa River C | Fall 2012 | 300 | 17-680 (4 species) | 74, 74 (2 species) | - | 83-430 (4 species) | - | 101 | | |
| | | Summer 2012 | - | - | - | - | - | - | - | | |
| Manogawa River System | Hayamako Lake G (Mano Dam) | Fall 2012 | 420 | 92, 1,100 (2 species) | - | - | 193-5,400 (8 species) | - | 320 | | |
| | | Summer 2012 | 132 | 450 (10 species mixed) | - | - | 232-4,300 (9 species) | - | 740 | | |
| | Manogawa River D | Fall 2012 | 540 | 113-510 (3 species) | 224 | 440 | 1.1-800 (4 species) | 1,110 | 510 | | |
| | | Summer 2012 | 23-570 (3 species) | 460 (10 species mixed) | 147-660 (3 species) | 480 | 111-760 (7 species) | - | 420 | | |
| Niidagawa River E | | Fall 2012 | - | 165-1,770 (4 species) | 410 | 230 | 320-1,220 (8 species) | 1,620 | 890 | | |
| | | Summer 2012 | - | - | - | - | 199-1,620 (6 species) | - | - | | |
| Otagawa River F | | Fall 2012 | 182 | 530, 820 (2 species) | 1,320 | - | 450-2,440 (7 species) | - | 1,740 | | |
| | | Summer 2012 | - | - | - | - | - | - | - | | |
| Akimoto Lake H | | Fall 2012 | 16, 50 (2 species) | - | 144 | - | 54-380 (6 species) | - | 48 | | |
| | | Summer 2012 | 7.1-44 (3 species) | - | 156 | - | 63-310 (12 species) | 71-136 (4 species) | 156 | | |
| Inawashiroko Lake | Inawashiroko Lake I (North Shore) | Fall 2012 | 135 | - | - | - | 31-201 (6 species) | - | 390 | | |
| | | Summer 2012 | 42 | - | - | - | 9.1-330 (7 species) | - | 172 | | |
| | Inawashiroko Lake J (South Shore) | Fall 2012 | 3.0, 13 (2 species) | - | - | 9.0 | 39-181 (6 species) | 43 | - | | |
| | | Summer 2012 | 4.8-12 (3 species) | - | - | 62 | 11-178 (9 species) | 68 | - | | |

*As for monitored specimen, including fish, the entire organism is used.

Starting with the 2012 fall survey, the following 4 species (categorized by feeding habit and type) of aquatic insects have been sampled and analyzed.

- Odonata (Dragonfly larva, carnivore)
- Corydalidae (carnivore)
- Perlidae (carnivore)
- Stenopsyche (omnivorous, detritivorous)

(2) Sea Areas (lower row in each case shows the results of 2012 summer surveys)

There are variations between each body of water and the type of organism collected, but in general, the levels of radioactive cesium concentration are about the same as those of the summer survey. Furthermore, just as in previous surveys, the concentrations of radioactive cesium in sea areas are lower than in rivers and lakes.

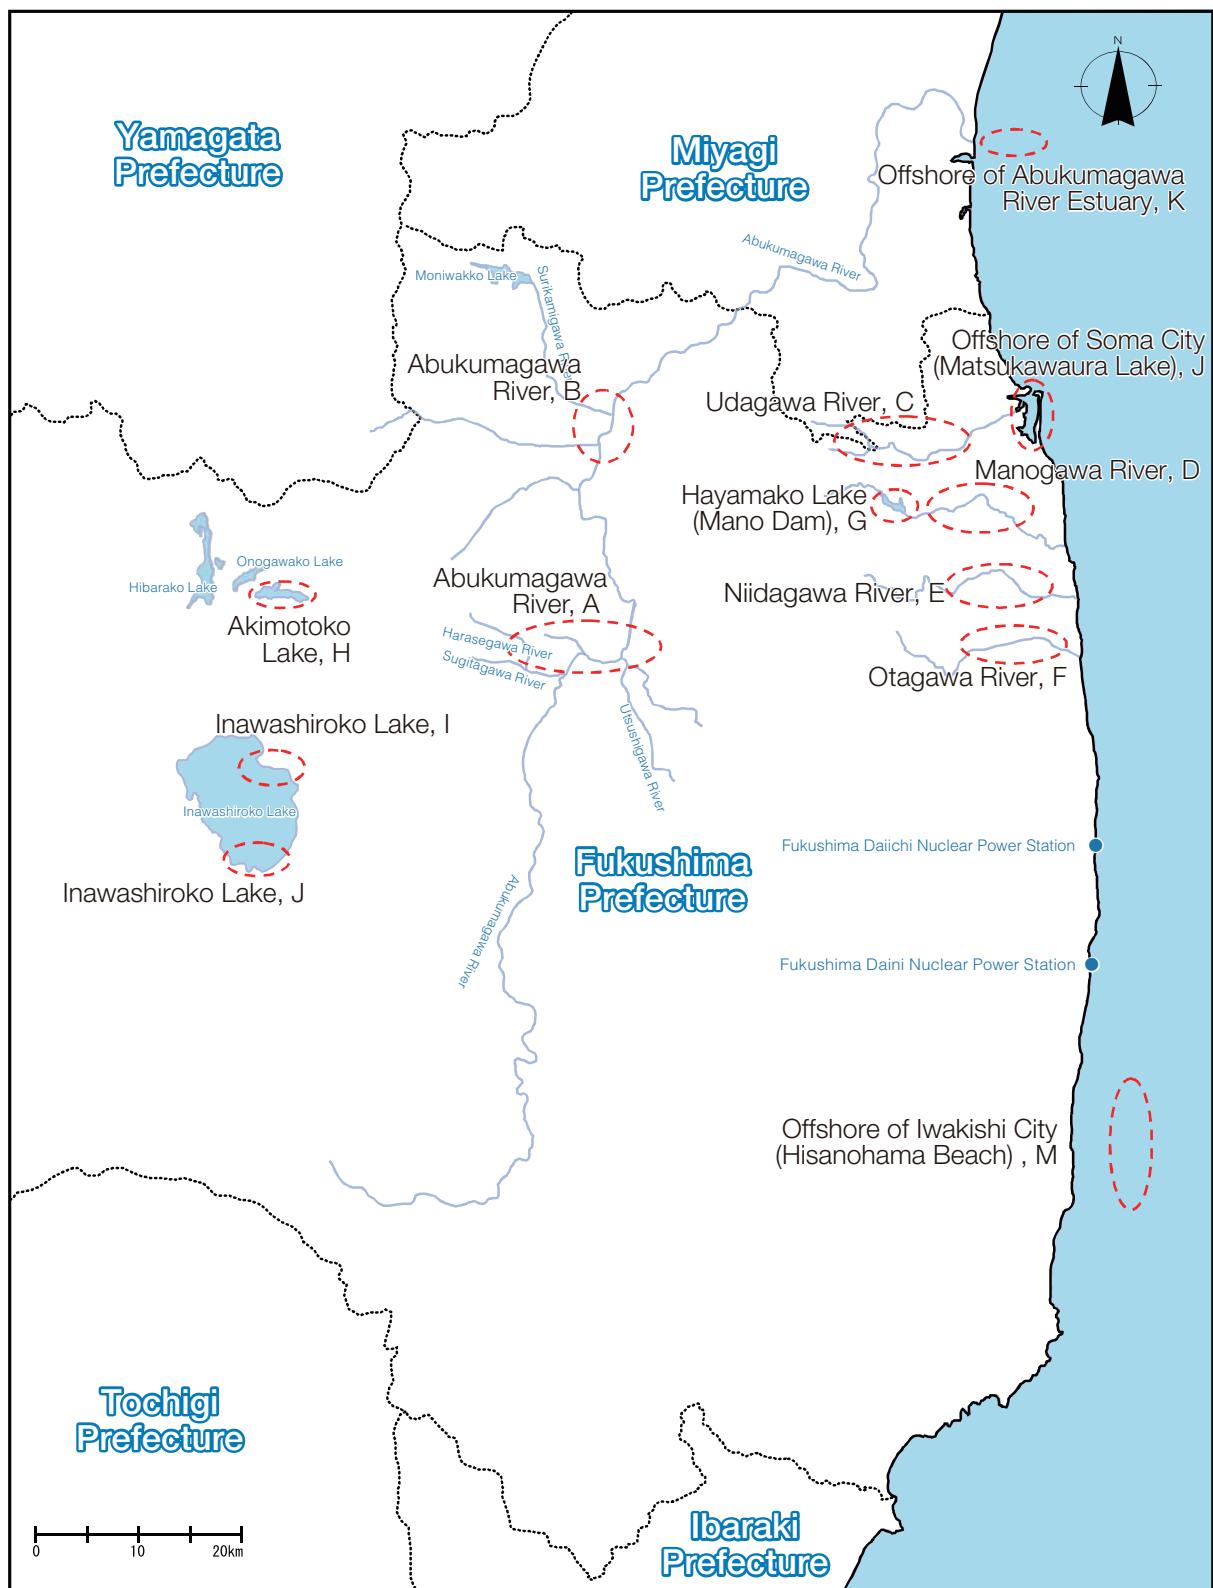

| | | Plants (algae) | Sea urchin, starfish, sea cucumber | Crustacean | Ragworms | Shellfish | | Squid, Octopus | Fishes |
|---|----------------|-------------------------|--|-----------------------|----------|-----------------------|------------------------|-------------------|------------------------|
| | | | | | | Without shell | Shell | | |
| Offshore of Abukumagawa River Estuary K | Fall 2012 | - | - | ND | - | - | - | - | 0.9-32 (7 species) |
| | Summer 2012 | - | - | 0.95 | - | - | - | - | ND-19 (7 specie) |
| Somashi City Offshore L (Matsukawaura Lake) | Fall 2012 | ND, 4.1 (2 species) | - | 13 | 6.4 | ND, 13 (2 species) | 1.9, 60 (2 species) | - | 7.5, 23 (2 species) |
| | Summer 2012 | 2.9, 3.0 (2 species) | - | 3.0-300 (4 specie) | 107 | 5.3, 8.9 (2specie) | 4.7, 29 (2specie) | - | 5.9-36 (7 species) |
| Iwakishi City Offshore M (Hisanonama Beach Offshore) | Fall 2012 | 8.7 | 12, 42 (2 species) | - | - | 5.1 | 16 | - | 6.7-118 (6 species) |
| | Summer 2012 | 25 | 26 50 (2 species) | - | - | 6.1 | 49 | 7.4 | 14-126 (10 species) |

*As for monitored specimen, including fish, the entire organism is used for measurement.

3. Future Plans

MOE will continue to measure the concentration of radioactive materials in aquatic organisms (organisms collection conducted 3-4 times each year).
