

(News Release)

The Results of Water Quality Surveys of Radioactive Materials at Bathing Areas

Thursday, August 22, 2013
Water Environment Division,
Environment Management Bureau,
Ministry of the Environment
Direct line: 03-5521-8316
Switchboard: 03-3581-3351
Director: Masanobu Miyazaki (ext. 6610)
Deputy Director: Saori Nagasawa (ext. 6614)
Coordinator: Katsuhiko Sato (ext. 6628)

Each local authority has conducted water quality surveys of radioactive materials at bathing areas this summer; the results reported to the Ministry of the Environment by each prefecture have been compiled and are released here.

1. Survey Overview

Number of surveys: Surveys conducted at 479 bathing areas, etc. in 29 prefectures.

Subject of survey: Water quality (radioactive materials) at bathing areas (radioactive iodine and radioactive cesium)
Spatial dose-rate of beaches at bathing areas

Survey period: Late April – Early July

2. Outline of Results

There were no reports of radioactive materials in excess of the general target (*) for water quality (radioactive materials) at bathing areas having been detected. (See attached for further details.)

*General target for water quality (radioactive materials) at bathing areas

Total for Cs-134 and Cs-137: 10Bq/L

It was reported that the spatial dose-rate of beaches was about the same as or less than that of surrounding areas.

The compiled results are available at <http://www.env.go.jp/jishin/rmp.html#monitoring>.

For details of the survey results for individual bathing areas, please contact the local authority, etc. where the bathing area in question is located.
