

# TABLE OF CONTENTS

|  |                |      |
|--|----------------|------|
|  | <b>PREFACE</b> | — 03 |
|--|----------------|------|

|          |   |      |
|----------|---|------|
| <b>1</b> | <b>CREATION OF A CIRCULAR AND ECOLOGICAL ECONOMY</b>  | — 04 |
|          | (1) Sustainable community development through the creation of a Circular and Ecological Economy | — 05 |
|          | (2) Construction of a Circular and Ecological Economy   | — 06 |

|          |   |      |
|----------|---|------|
| <b>2</b> | <b>ADAPTING TO CLIMATE CHANGE</b>   | — 09 |
|          | (1) Extreme weather disasters in 2018                                     | — 10 |
|          | (2) Climate change observational evidence in Japan and future projections | — 11 |
|          | (3) Impact of climate change in Japan                                     | — 12 |
|          | (4) Long-term low greenhouse gas emission development strategy            | — 12 |
|          | (5) Adaptation initiatives by government organizations                    | — 13 |
|          | (6) Adaptation work by businesses   | — 14 |

|          |   |      |
|----------|---|------|
| <b>3</b> | <b>PLASTIC POLLUTION AND THE CONSTRUCTION OF RESOURCE CIRCULATION SYSTEMS FOR PLASTICS</b>      | — 16 |
|          | (1) Marine plastic litter – understanding and addressing the problem                            | — 17 |
|          | (2) Resource Circulation Strategy for Plastics  | — 18 |
|          | (3) Plastics Smart Campaign   | — 18 |
|          | (4) Promoting innovation toward the construction of a Resource Circulation Systems for Plastics | — 19 |

|          |   |      |
|----------|---|------|
| <b>4</b> | <b>RECONSTRUCTION AND ENVIRONMENTAL REMEDIATION AFTER THE GREAT EAST JAPAN EARTHQUAKE</b> | — 21 |
|          | (1) Air dose rates  | — 22 |
|          | (2) Environmental remediation in affected areas   | — 23 |

|  |   |      |
|--|---|------|
|  | <b>CIRCULAR AND ECOLOGICAL ECONOMY (JAPAN'S VISION TO REALIZE DECARBONIZATION AND SDGS)</b> | — 24 |
|--|---|------|

|  |  |      |
|--|--|------|
|  | <b>ADDITIONAL MATERIALS</b>                  | — 26 |
|  | - Decarbonized society                       | — 26 |
|  | - Biodiversity                               | — 28 |
|  | - Sound material-cycle society               | — 30 |
|  | - Atmospheric and water environments         | — 32 |
|  | - Environmental risks of chemical substances | — 34 |
