

Park Conservation Plans

National parks contain various land use types from wilderness to developed areas including local communities and tourist sites. Agricultural and forestry areas are also included within park boundaries. Therefore, zoning system is adopted to control land use within national parks. National Parks are classified into various areas for management purposes. The location of park facilities, roads and trails are carefully planned in advance according to the zoning. These zoning systems are known as park conservation plans.

Shikotsu-Toya National Park

A park plan

A park plan is formulated for each national park to ensure that it is protected and utilized appropriately.
