

Public Comments invited regarding the designation of *Anolis angusticeps* as an "Invasive Alien Species".

With the designation of *Anolis carolinensis* (green anole) and *A. sagrei* (brown anole) as "Invasive Alien Species (IAS)" based on the "Invasive Alien Species Act" in June 2005, all the other species of *Anolis* and all species of *Norops* were designated as "Uncategorized Alien Species (UAS)." It is prohibited to import UAS without the pertinent ministers' judgment that the species in question does not have the likelihood of causing adverse effects on ecosystems.

On receiving the notification of importing *A. angusticeps*, the meeting concluded that *A. angusticeps* should be designated as an IAS.
