

Result of the Fourth Verification Tests for the Incineration of Low-contaminated PCB Wastes

The Ministry of the Environment (MOE) carried out the fourth verification tests for the incineration of condensers with dielectric oil containing low concentrations of PCBs in March 2008, in collaboration with Ehime Prefecture and the Toyo Plant of Foundation Ehime Prefecture Waste Treatment Center. With the results, MOE confirmed that low-contaminated PCB Wastes were decomposed safely without hazardously affecting the surrounding areas.
