	Food	6	6	6	6	6	1	1	9	0	2	6	2	0	0	0	0	0	27 (80)
	Others <sup>1)</sup>	6	6	6	6	6	6	6	0	0	1	2	0	0	0	0	0	0	26 (92)
Total <sup>2)</sup>		107	116	85	101	95	99	98	80	93	91	171	252	128	141	110	101	93	1,231 (3,870) <sup>5)</sup>
Number of new chemicals <sup>3)</sup>		15	6	7	16	7	37	16	20	20	13	50	136	27	16	25	14	9	
(of monitoring series)		0	0	0	8	0	20	0	0	4	0	0	15	0	0	8	2	5	
Cumulative number of target chemicals		812	818	825	841	848	885	901	921	941	954	1,004	1,140	1,167	1,183	1,208	1,222	1,231	

(Note 1) "Others" under medium are precipitation and indoor air.

(Note 2) The number of target chemicals in each fiscal year indicates the number of chemicals surveyed in the concerned year; the total does not agree with the simple sum of the figures in each medium column because some chemicals were surveyed in several media.

(Note 3) "Number of new chemicals" indicates the number of chemicals designated as target chemicals for the first time in the concerned fiscal year among the number of chemicals in the "total" column.

(Note 4) "Total number of target chemicals for each medium" indicates the number of chemicals surveyed for the concerned medium, and does not agree with the simple sum of the figures in each fiscal year because some chemicals were surveyed over several fiscal years. The simple sum is given in parentheses.

(Note 5) The total "1,231" is the total number of chemicals surveyed from FY 1974 to FY 2011, and does not agree with the simple sum of the figures in each column because some chemicals were surveyed in several media over several fiscal years. The simple sum is given in parentheses.
