<sup>(</sup>Note 1) "Others" under medium are precipitation and indoor air.

<sup>(</sup>Note 2) The number of target chemicals in each fiscal year indicates the number of chemicals surveyed in the concerned year; the total does not agree with the simple sum of the figures in each medium column because some chemicals were surveyed in several media.

<sup>(</sup>Note 3) "Number of new chemicals" indicates the number of chemicals designated as target chemicals for the first time in the concerned fiscal year among the number of chemicals in the "total" column.

<sup>(</sup>Note 4) "Total number of target chemicals for each medium" indicates the number of chemicals surveyed for the concerned medium, and does not agree with the simple sum of the figures in each fiscal year because some chemicals were surveyed over several fiscal years. The simple sum is given in parentheses.

<sup>(</sup>Note 5) The total number of chemicals detected ("900") is the number of chemicals detected in one or more media as a result of the survey.

<sup>(</sup>Note 6) "Percentage of detected chemicals" is percentage of number of chemicals detected to total number of chemicals surveyed.
