

CIRCULAR and ECOLOGICAL ECONOMY (Japan's vision to realize decarbonization and SDGs)

- The life-based ecosystem draws potential of people and nature in local communities by integrating the cyber and physical space -

[Self-reliance & decentralization] × [Mutual cooperation] × [Circulation & symbiosis]

Ownership

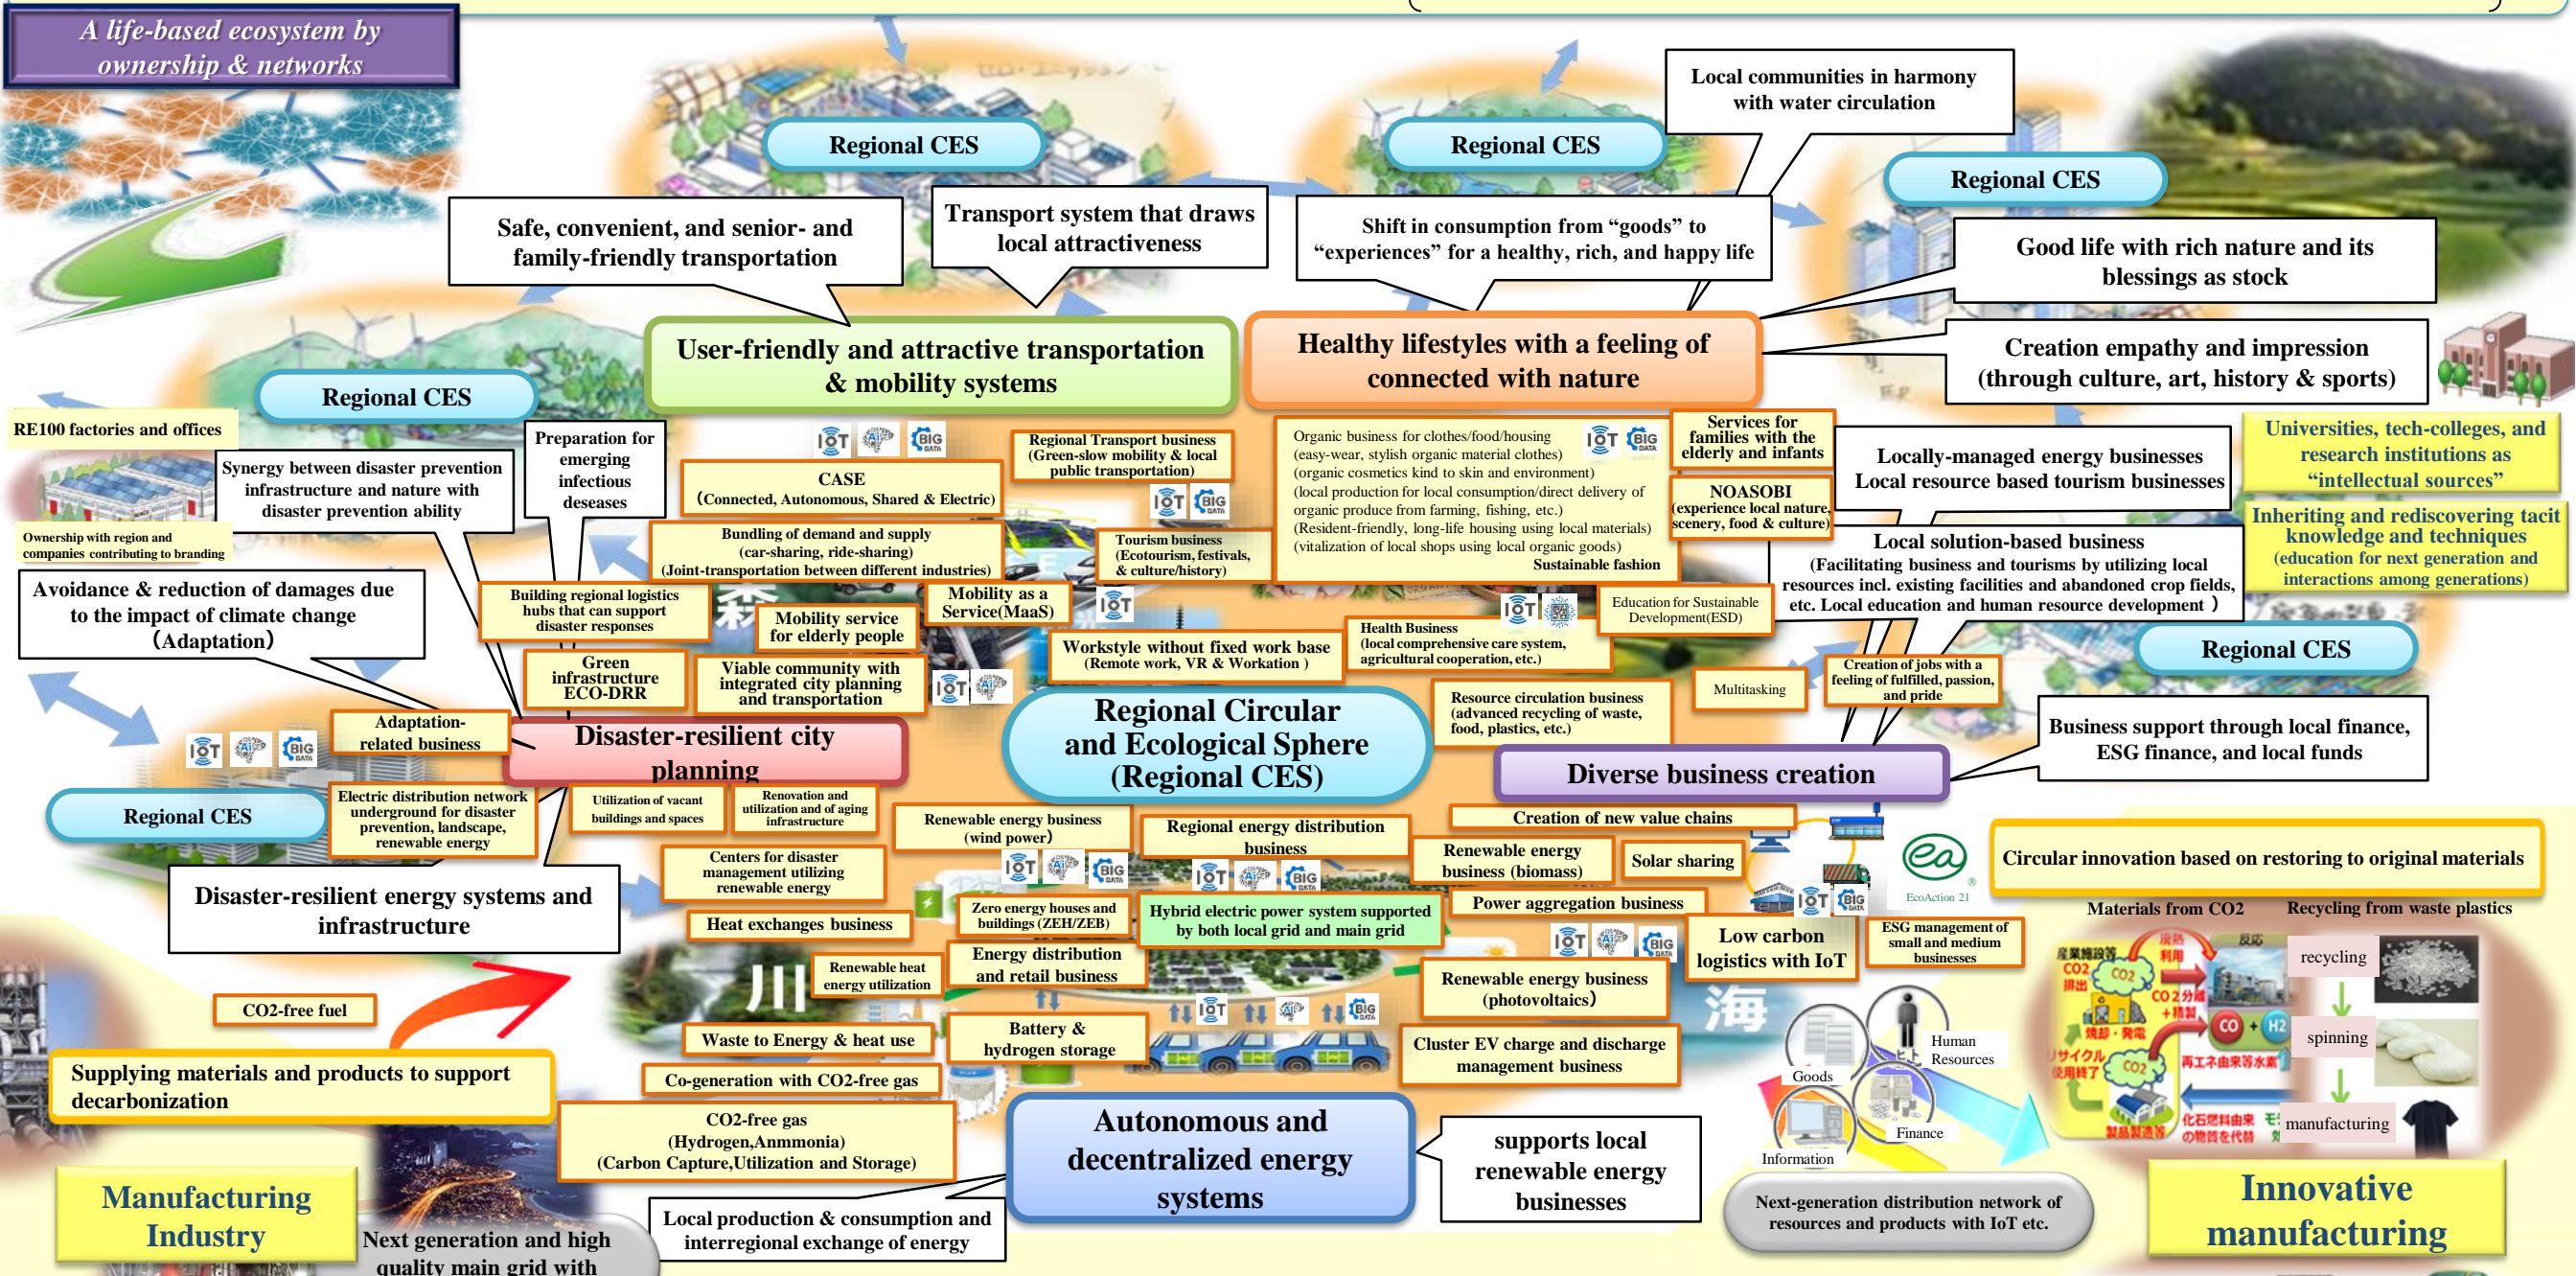

Networks

Sustainability

= Vital **Circular and Ecological Economy** ⇒ Achieving decarbonization & SDGs, and to the world human security and youth & women's empowerment as a basis

➔ The basis for local communities that leads growth by creating new values and businesses (Richness can be spread out nationwide as a self-reliant region having organic linkages with other regions enables people to live a healthy and lively life with happiness and pride)

A life-based ecosystem by ownership & networks

“Society 5.0” and improved productivity create “Circular and Ecological Economy”
