

International Symposium on Environmental Endocrine Disrupters 2000 Report

Contents

I . International Symposium on Environmental Endocrine Disrupters 2000 Report

Record Photographs	3
Program	15
List of Speakers	25

Lecture

Saturday, December 16, 2000 (Sessions Open to Public)

Welcome Address

Yoriko Kawaguchi (Minister of State, Director-General of the Environment Agency)	44
Nobuo Mizuguchi (Vice Governor, Kanagawa Prefectural Government)	47

Special Lecture

Endocrine Disruption Testing: Toward a Better Understanding of Inner Space

Theo COLBORN (Senior Scientist and Program Director, World Wildlife Fund)	60
---	----

Part 1 Current Strategy

How the Liberal Democratic Party Takes Measures for the Problem of Chemical Substances and Future Issues

Hiroshi HASE (Member of the House of Representatives, Japan)	74
--	----

How New Komeito Takes Measures for the Problem of Endocrine Disrupters (3)

Shuichi KATO (Member of the House of Councilors, Japan)	80
---	----

U.S. Strategy on Endocrine Disrupters

Gary E. TIMM (Environmental Protection Agency (EPA), U.S.A.)	86
--	----

Government Policies Related to Endocrine Disrupters in Korea

Geum-Su SEOG (Ministry of Environment, Republic of Korea)	95
---	----

Current Strategies against Environmental Endocrine Disrupters by Environment Agency, Government of Japan

Hirozo UEDA (Director, Environmental Health and Safety Division, Environmental Health Department, Environment Agency, Government of Japan)	104
--	-----

Part 2 Panel Discussion

“What Have We Found about Environmental Endocrine Disrupters?”

General Comment

Noboru TAKASUGI (The Chair, Yokohama City Board of Education, Japan)	112
--	-----

Contamination and Toxic Effects of Endocrine Disrupting Chemicals in Wildlife

Shinsuke TANABE (Center for Marine Environmental Studies (CMES), Ehime University, Japan)	116
---	-----

Environmental Signals: A New Way to Understand Endocrine Disruption

John A. McLACHLAN (Tulane and Xavier Universities, U.S.A.)	122
--	-----

Environmental Hormones and Reproductive Medicine

Osamu TSUTSUMI (University of Tokyo, Japan)	127
---	-----

Industry Perspective: “To What Extent Have We Known About Endocrine Disruption Chemicals?”

Angelina Joy Serio DUGGAN (American Crop Protection Association, U.S.A.)	136
--	-----

A Discussion on Risk of Endocrine Disruptors

Jun SEKIZAWA (National Institute of Health Sciences, Division of Chemo-Bio Informatics, Japan)	143
--	-----

Discussion	153
------------	-----

Sunday, December 17, 2000

Session 1 Effects on Wildlife

Endocrine Disrupting Contaminants: Lessons from Wildlife Louis J. GUILLETTE Jr. (University of Florida, U.S.A.)	168
Endocrine Disruption in Mollusks: Case Studies on the Rock Shell, the Ivory Shell and the Giant Abalone, Linking with Organotin Contamination in Korea and Japan Hyeon-Seo CHO (Yosu National University, Korea)	179
Intersex in a Japanese Freshwater Crab Koji ARIZONO (Prefectural University of Kumamoto, Japan)	187
Sexual Disruption of U.K. Wild Fish.What Does It All Mean? Susan JOBLING (Brunel University, U.K.)	194
Detection of Thyroid Hormone Disrupting Effects Using Frogs and a Molecular Toolbox Caren Christiane HELBING (University of Victoria, Canada)	201
Use of Chemistry and Biology to Assess Endocrine Disrupters in the Environment John P. GIESY (Michigan State University, U.S.A.)	215
Review of Present Knowledge Concerning Endocrine Disrupters and Wildlife Peter MATTHIESSEN (Centre for Environment, Fisheries and Aquaculture Science (CEFAS), U.K.)	226

Session 2 Potential Effects on Human Health

Epidemiologic Evidence for Endocrine Disruption: Studies in North Carolina, U.S.A. and Mexico Walter J. ROGAN (National Institute of Environmental Health Sciences (NIEHS), U.S.A.)	239
Environmental Exposure to Polychlorinated Biphenyls (PCBs) and Dioxins. Consequences for Lactation and Long Term Brain Development of the Child. A Review of the Longitudinal Dutch PCB/dioxin Study Ernst Rudolf BOERSMA (University Hospital Groningen, the Netherlands)	254
Thyroid Status, Frequency of Selected Autoantibodies and Biomarkers in the Population Exposed to PCB and Other Organochlorines Pavel LANGER (Slovak Academy of Sciences, Slovakia)	273
Evidence of Endocrine Disruption in Yucheng People Exposed Polychlorinated Biphenyls and Dibenzodioxins Yue-Liang Leon GUO (National Cheng Kung University Medical College, Taiwan)	286
Dioxin and Human Health: 20 Years of Data from "Seveso", Italy Paolo MOCARELLI (University Milano-Bicocca, Italy)	293

Session 3 Testing Methodology

Ecotoxicology Test Methods for Endocrine Disrupters and Ecological Risk Assessment Thomas H. HUTCHINSON (AstraZeneca Global Safety, Health and Environment, Brixham Environmental Laboratory, U.K.)	310
A Comparison of the Reproduction and Full Life-Cycle Tests with Medaka for Hazard Evaluation of Endocrine Disrupters Hirofumi YOKOTA (Chemicals Evaluation and Research Institute (CERI), Japan)	323
Screening of Estrogenic Chemicals Using Uterotrophic Assay Jun KANNO (National Institute of Health Sciences, Japan)	334
Screening Strategies for Androgen Active Compounds Paul Matthew David FOSTER (Chemical Industry Institute of Toxicology (CIIT), U.S.A.)	345
Tier 2 Testing for Endocrine Active Chemicals: Is the Current Multigeneration Study Design Adequate? Paul Matthew David FOSTER (Chemical Industry Institute of Toxicology (CIIT), U.S.A.)	361

Monday, December 18, 2000

Session 4 Mechanisms of Action

Gonadal Sex Differentiation in Fish and the Effects of Environment Endocrine Disrupters

Masaru NAKAMURA (University of The Ryukyus, Tropical Biosphere Research Center, Japan) 383

Transcription Factors Supporting Gonad Sex Differentiation

Ken-ichirou MOROHASHI (National Institute for Basic Biology, Japan)..... 400

The Effects of Endocrine Disrupters on Steroidogenesis and StAR Protein

Douglas Michael STOCCO (Texas Tech University Health Sciences Center, U.S.A.) 413

Transcription Factors and Cofactors with Endocrine Disrupters

Hajime NAWATA (Graduate School of Medical Sciences, Kyushu University, Japan) 430

Endocrine Disrupter Action and Toxicology: Studies in ER Knock-Out Mice

Kenneth S. KORACH (National Institute of Environmental Health Sciences (NIEHS), U.S.A.) 443

Session 5 Low Dose Issue in the ED-Reaction

On Low Dose Issues in the ED Reaction

Robert J. KAVLOCK (Environmental Protection Agency (EPA), U.S.A.) 455

Summary of the NTP/NIEHS Endocrine Disrupters Low-Dose Peer Review

Ronald L. MELNICK (National Institute of Environmental Health Sciences (NIEHS), U.S.A.) 462

Three-Generation Reproductive Toxicity Evaluation of Bisphenol A (BPA) Administered in the Feed to CD® (Sprague-Dawley) Rats

Rochelle W. TYL (Center for Life Sciences and Toxicology, Research Triangle Institute, U.S.A.) 472

***In vivo* Effects of Nonylphenols on Reproductive Development in Pre-Adolescent Rats: Dose Response Considerations.**

Ping C. LEE (Medical College of Wisconsin, U.S.A.) 483

Commentators:

Chiharu TOHYAMA (National Institute for Environmental Studies, Japan) 491

James C. LAMB IV (BBL Sciences, U.S.A.) 497

Bisphenol A Alters Development in Mice at Human Exposure Levels

Frederick S. vom SAAL (University of Missouri-Columbia, U.S.A.) 508

Two-Generation Reproduction Study of Bisphenol A in Rats

Makoto EMA (National Institute of Health Sciences, Osaka Branch, Japan) 519

Commentators:

Osamu TSUTSUMI (University of Tokyo, Japan) 526

Jun KANNO (Biological Safety Research Center, National Institute of Health Sciences, Japan) 530

James P. KARIYA (Environmental Protection Agency, U.S.A.) 535

Session 6 Risk Management

Material Cycles Society and Controlling Persistent Chemicals

Shinichi SAKAI (Environment Preservation Center, Kyoto University, Japan) 550

UK Government Activities on Endocrine Disrupting Chemicals

Kathleen CAMERON (Department of the Environment, Transport and the Regions (DETR), U.K.)..... 561

Current US Practice in Assessing Risk of Endocrine Disrupters

Gary E. TIMM (Environmental Protection Agency (EPA), U.S.A.) 574

Strategic Programs on Environmental Endocrine Disrupters- SPEED'98

Masatoshi KANAI (Director, Office of Environmental Risk Assessment, Environmental Health and Safety Division, Environmental Health Department, Environment Agency, Government of Japan) 585

Closing Address

Tetsushige Nishio (Director-General, Environmental Health Department, Environment Agency, Government of Japan) 590

II . The 3rd Annual Meeting of Japan Society of Endocrine Disrupters Research

Program and Abstracts 591
