

Olfactory Measurement Method in Japan

Office of Odor, Noise and Vibration
Environmental Management Bureau
Ministry of the Environment

This manual summarizes the results of the "Investigation studies on olfactory measurement method in 1995", the "Investigation studies on the development of odor index measurement manual in 2000", and the "Investigation studies on the development of performance evaluation manual for odor control techniques in 2001 (II. Investigation studies on quality control and safety management of olfactory measurement method)" which the Office of Odor, Noise and Vibration of the Environmental Management Bureau of the Ministry of the Environment (MOE) commissioned to the Japan Association on Odor Environment.

Table of contents

Olfactory Measurement Method Manual

I	Olfactory Measurement Method in Japan	3
II	Explanation of the Environment Agency Notification, "Determination of odor index and odor emission rate"	4
	Chapter 1 Panel	4
	1. Standard odor solutions	4
	2. Panel screening method	7
	Chapter 2 Triangular odor bag method	11
	1. Equipment and apparatus	11
	1-1 Sampling equipment	11
	1-2 Equipment and apparatus for a sensory test	19
	2. Measurement methods	21
	2-1 Sampling	22
	2-2 Sensory test	29

Olfactory Measurement Method Quality Control Manual

Chapter 1	Purpose	53
Chapter 2	Overall Framework of Quality Control.....	54
Chapter 3	Organization/System for Quality Control	56
	3.1 Organization	56
	3.2 Education/Training	58
	3.3 Managing Documents/Records	58
Chapter 4	Quality Control When Implementing Measurement	59
	4.1 Creation of SOPs	59
	4.2 Panel	59
	4.3 Equipment and Apparatus	60
	4.4 Collecting Samples	65
	4.5 Sensory Test	66
	4.6 Evaluation and Report of Measurement Results	68
	4.7 Using the Checklist	69
Chapter 5	Quality Control Using Reference Material	70
	5.1 Overview	70
	5.2 Reference material	72
	5.3 Implementation of Quality Assessment Test	74
	5.4 Evaluation of results.....	76
	5.5 Frequency of Quality Assessment Tests	77
	5.6 Towards Establishing an External Quality Control System	78

Olfactory Measurement Method Safety Management Manual

Chapter 1	Purpose	83
Chapter 2	Range of Safety measures	84
2.1	Applicable Range of Safety Measures.....	84
2.2	Areas and Classifications of Safety (Hazard)	84
Chapter 3	System for Safety Management.....	86
3.1	Framework for Safety Management.....	86
3.2	Education and Training.....	86
3.3	Managing Documents and Records.....	86
Chapter 4	Safety Measures when Sampling.....	88
4.1	General Issues of Safety Measures.....	88
4.2	Checkpoints for Confirming Safety at Each Facility	97
4.3	Emergency Measures for Accidents.....	102
Chapter 5	Safety Measures at Time of Olfactory Measurement.....	108
5.1	About safety judgment standards	108
5.2	Safety Confirmation During Olfactory Measurement.....	111
5.3	Safety Management for the Triangular Odor Bag Method	112
Chapter 6	General overview	114
6.1	Summary of the Safety Management Flow	114
6.2	Supplying Information Related to Safety to the Examinee	115
6.3	About the Necessity of Follow-ups in the Future	115
