FY2017 Radioactive Material Monitoring of Aquatic Organisms (December)

1. Survey Overview

Samples of aquatic organisms (algae, aquatic insects, crustaceans, shellfishes, fishes, and amphibians, etc.) were mainly collected in Fukushima Prefecture and concentrations of radioactive cesiums and radioactive strontium in the samples were measured (survey period: December 1 to 7, 2017).

In order to clarify the environment of the water areas where aquatic organisms live, surveys were also conducted on general items concerning water and sediments and activity concentrations in these water areas.

The following water areas were selected based on the results of the past Radioactive Material Monitoring of Aquatic Organisms and Radioactive Material Monitoring in the Water Environment in and around Fukushima Prefecture, as well as the results of the measurement of radioactive materials in fisheries products conducted by other relevant organizations and interviews with local fishermen.

(i) Rivers: Abukuma River, Uda River, Mano River, Niida River, and Ota River

(ii) Lakes: Lake Hayama, Lake Akimoto, and Lake Inawashiro

(iii) Sea areas: Off the mouth of the Abukuma River, off Soma City, and off Iwaki City

○ Survey locations and dates

Area		Targeted water areas	Zone	Item	Survey dates	Remarks
River area	A	Abukuma River	Around Shinfuna Bridge; Harase River (a tributary)	Aquatic organisms sampling	December 2, 2017	Algae/Plants, Aquatic insects, Amphibians
				Water/sediment sampling	December 8, 2017	(Water sampling) A-1,A-2 (Sediment sampling) A-1,A-2
	B		Confluence with the Surikami River (a tributary) to Taisho Bridge;Surikami River (a tributary)	Aquatic organisms sampling	December 2, and 7, 2017	Algae/Plants, Aquatic insects, Shellfishes, Fishes, Amphibians
				Water/sediment sampling	December 8, 2017	(Water sampling) B-2,B-3 (Sediment sampling) B-2,B-3
	C	Uda River	Around Horisaka Bridge	Aquatic organisms sampling	December 2, 2017	Algae/Plants, Aquatic insects, Crustanceans, Fishes
				Water/sediment sampling	December 5, 2017	(Water sampling) C-6 (Sediment sampling) C-6
	D	Mano River	Oyama Bridge to Sakurada Bridge	Aquatic organisms sampling	December 5, and 6, 2017	Algae/Plants, Aquatic insects, Crustanceans, Fishes, Amphibians
				Water/sediment sampling	December 5, 2017	(Water sampling) D-4a (Sediment sampling) D-4a
	E	Niida River	Around Monzen Bridge	Aquatic organisms sampling	December 3, 2017	Algae/Plants, Aquatic insects, Crustanceans, Shellfishes, Fishes
				Water/sediment sampling	December 6, 2017	(Water sampling) E-2a (Sediment sampling) E-2a
	F	Ota River	Yaigomesaka Bridge to Daimonji Bridge	Aquatic organisms sampling	December 6, 2017	Algae/Plants, Aquatic insects, Crustanceans, Fishes, Amphibians
				Water/sediment sampling	December 6, 2017	(Water sampling) F-1 (Sediment sampling) F-1
Lake area	G	Lake Hayama		Aquatic organisms sampling	December 4, and 7, 2017	Algae/Plants, Aquatic insects, Fishes, Amphibians
				Water/sediment sampling	December 4, 2017	(Water sampling) G-1,G-4 (Sediment sampling) G-1,G-4
	H	Lake Akimoto		Aquatic organisms sampling	December 1, 2017	Algae/Plants, Crustanceans, Fishes
				Water/sediment sampling	December 1, 2017	(Water sampling) H-1 (Sediment sampling) H-1
	I	Lake Inawashiro	North lakeside	Aquatic organisms sampling	December 1, 2017	Fallen leaves, etc.
	J		South lakeside	Aquatic organisms sampling	December 1, 2017	Algae/Plants, Shellfishes, Fishes, Amphibians
				Water/sediment sampling	December 1, 2017	(Water sampling) J-1 (Sediment sampling) J-1
Sea area	K	Off the mouth of the Abukuma River	Sea area in front of the Abukuma River Estuary	Aquatic organisms sampling	December 4, 2017	Crustanceans, Fishes
				Water/sediment sampling	December 7, 2017	(Water sampling) K-3 (Sediment sampling) K-3
	L	Off Soma City	Matsukawaura Lagoon	Aquatic organisms sampling	December 3, 4, 5, and 7, 2017	Seaweeds/Algae, Crustanceans, Fishes, Shellfishes
				Water/sediment sampling	December 7, 2017	(Water sampling) L-2 (Sediment sampling) L-2
	M	Off Iwaki City	Offshore of Hisanohama	Aquatic organisms sampling	December 2, 2017	Sea urchins, Octopuses, Fishes
				Water/sediment sampling	December 2, 2017	(Water sampling) M-2 (Sediment sampling) M-2

2. Survey Items and Locations, etc.

2.1 Survey Items

For all samples of aquatic organisms, analysis of radioactive cesiums (Cs-134, Cs-137) was conducted. Additionally, for samples of large fish, etc. analysis of radioactive strontium (Sr-90) was also conducted.

With regard to surveys of water and sediments, locations where aquatic organism samples were scheduled to be collected and where clay particles and coarse particulate organic matters (Fallen leaves at the bottom, etc.: hereinafter called "CPOMs") are supposed to accumulate due to inflows from the surrounding environment, etc. were selected for the analysis of radioactive materials and general survey items.

Survey items and samples for aquatic organisms, water, and sediments are as shown in the following table.

○ Survey targets and items

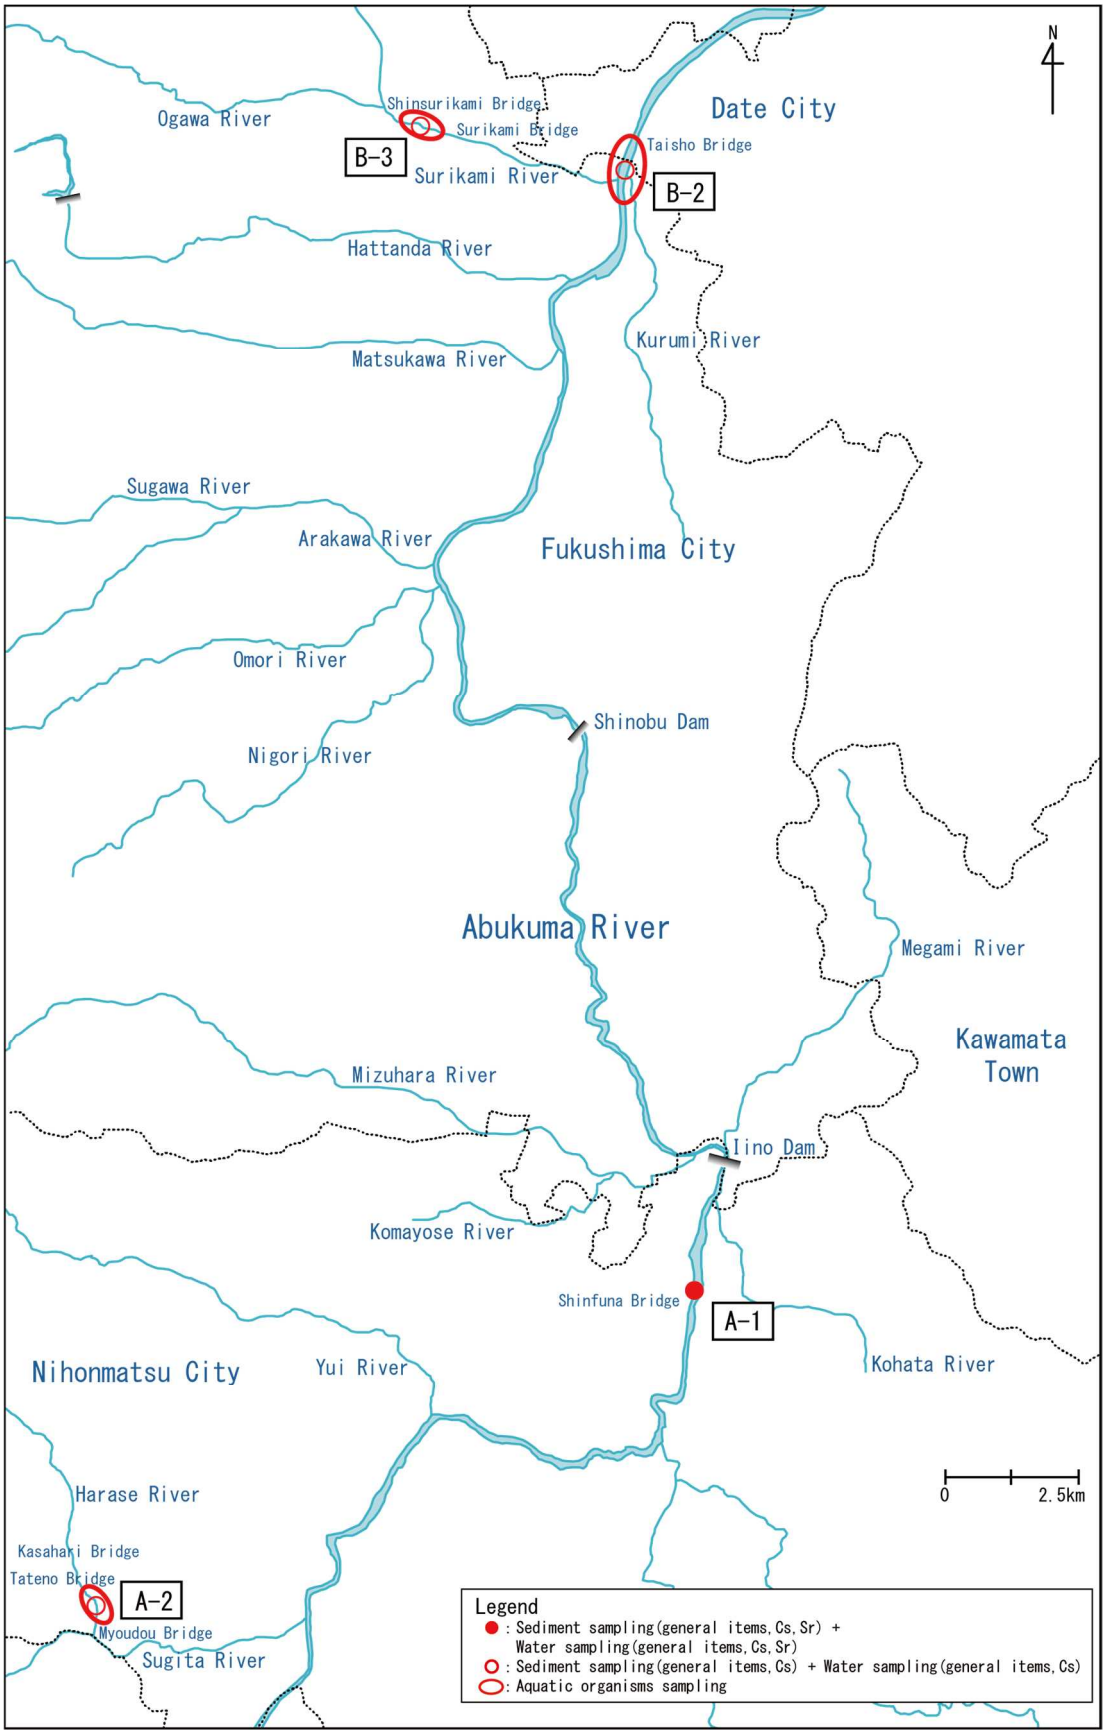
Target	Measurement item		Analyzed samples
Aquatic Organisms	Radioactive materials	Radioactive cesiums (Cs-134,Cs-137)	All samples
		Radioactive strontium (Sr-90)	Large fish, etc.
Water	Radioactive materials	Radioactive cesiums (Cs-134,Cs-137)	Samples collected at one to four locations for each water area
		Radioactive strontium (Sr-90)	Samples collected at one location for each water area
	General items	pH	Samples collected at one to four locations for each water area
		BOD (Biochemical oxygen demand)	
		COD (Chemical oxygen demand)	
		DO (Dissolved oxygen level)	
		Electric conductivity	
		Salinity	
		TOC (Total organic carbon)	
		SS (Suspended solids)	
		Turbidity	
Sediments	Radioactive materials	Radioactive cesiums (Cs-134,Cs-137)	Samples collected at one to four locations for each water area
		Radioactive strontium (Sr-90)	Samples collected at one location for each water area
	General items	pH	Samples collected at one to four locations for each water area
		Oxidation-reduction potential	
		Water content	
		IL (Ignition loss)	
		TOC (Total organic carbon)	
		Soil particle density	
		Grain size distribution	

2.2 Survey Locations at Respective Water Areas

(1) Tributaries of the Abukuma River (Location A along the Abukuma River; Location B along the Abukuma River; Location K off the mouth of the Abukuma River).

As water areas where clay particles and CPOMs are supposed to accumulate topographically, Location A along the Abukuma River was set the Harase River (a tributary of the Abukuma River) and around Shinfuna Bridge (Nihonmatsu City, Fukushima Prefecture), and Location B along the Abukuma River was set from the confluence with the Surikami River to Taisho Bridge (Date City, Fukushima Prefecture) as well as the zone where a tributary of the Surikami River inflows. Additionally, Location K was set off the mouth of the Abukuma River in order to survey the sea area in front of the mouth of the Abukuma River, where the outflow of radioactive materials through the Abukuma River is suspected.

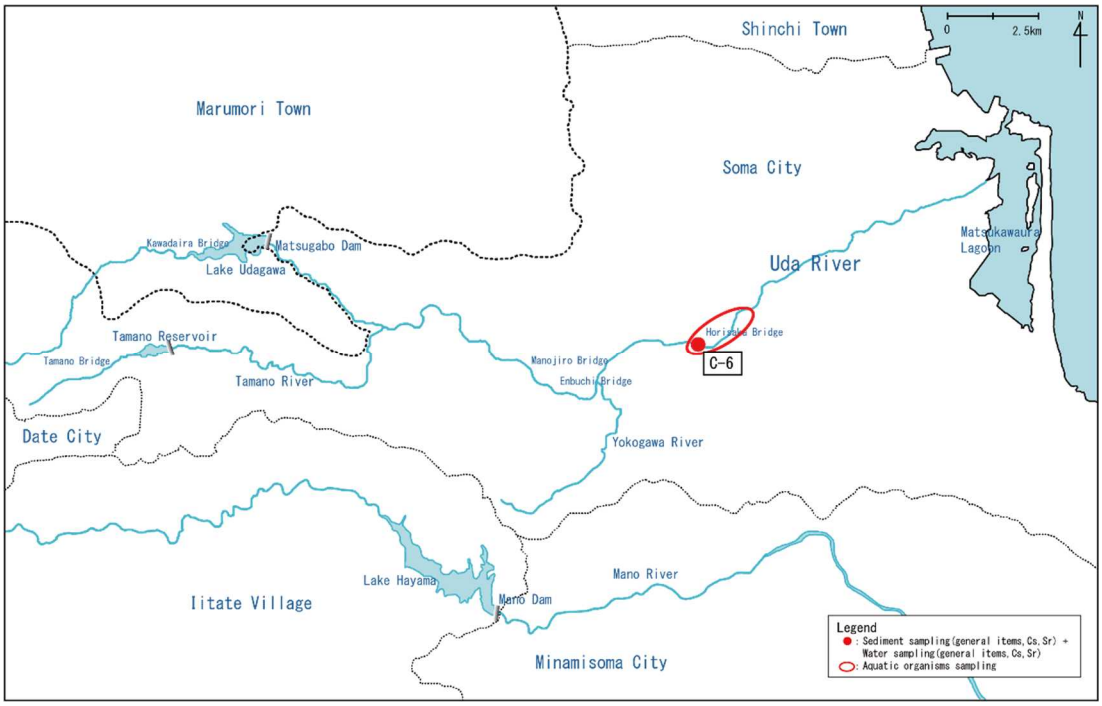
Detailed map showing Location K off the mouth of the Abukuma River



Map showing Location A and Location B along the Abukuma River

(2) Location C along the Uda River

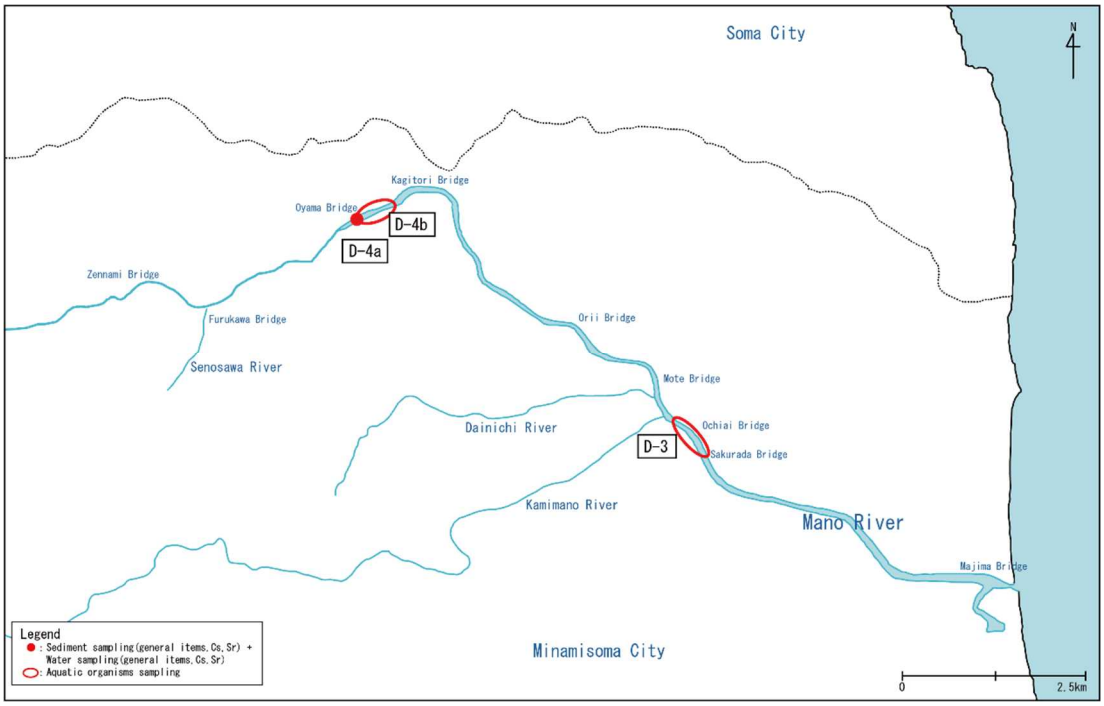
Surveys were started in the autumn term of FY2012 and conducted around Horisaka Bridge in 2017.



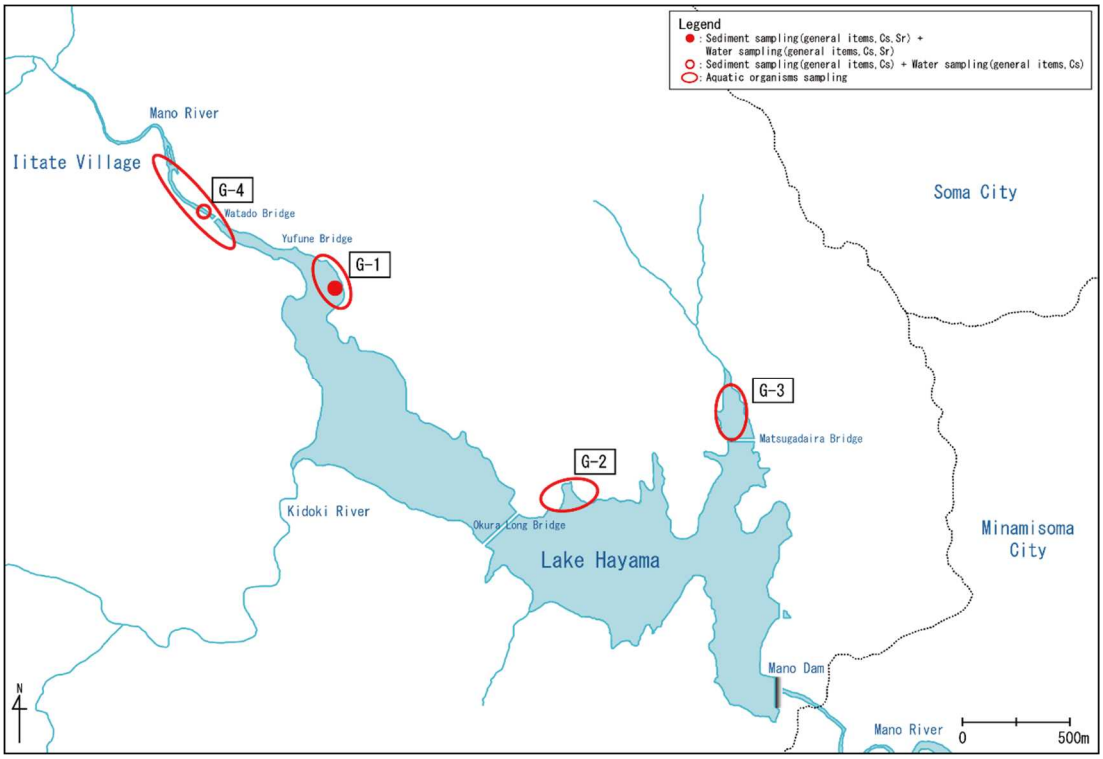
Detailed map showing Location C along the Uda River

(3) Tributaries of the Mano River (Location D along the Mano River; Location G in Lake Hayama)

Surveys were conducted at Location D along the Mano River, which covers from Oyama Bridge to Sakurada Bridge (Kashima Ward, Minamisoma City, Fukushima Prefecture), and at Location G in Lake Hayama (Mano Dam), which covers the lake as a whole and inflow points.



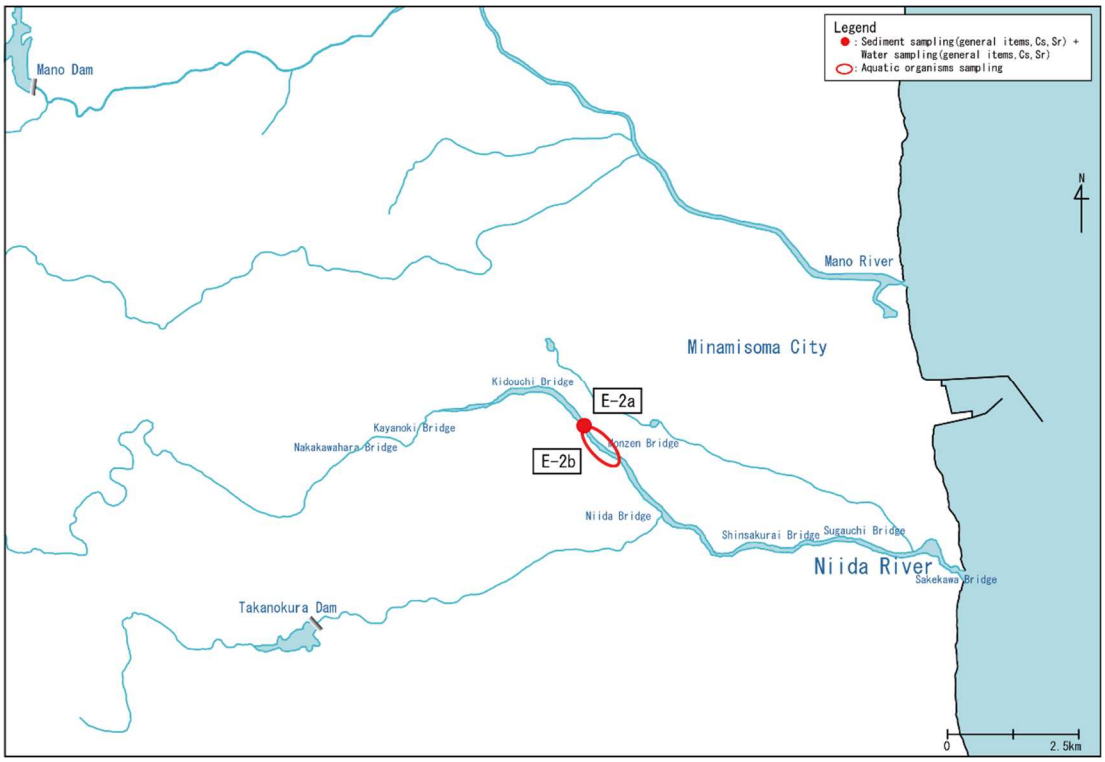
Detailed map showing Location D along the Mano River



Detailed map showing Location G in Lake Hayama (Mano Dam)

(4) Location E along the Niida River

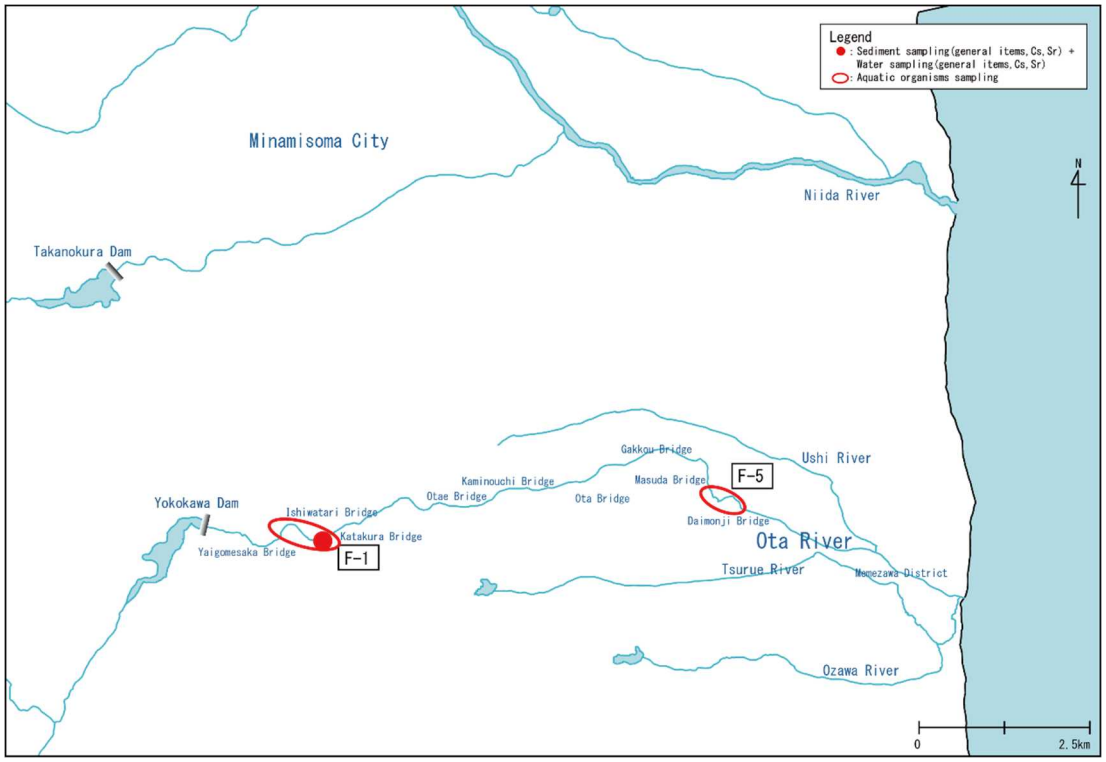
Surveys were conducted around Monzen Bridge.



Detailed map showing Location E along the Niida River

(5) Location F along the Ota River

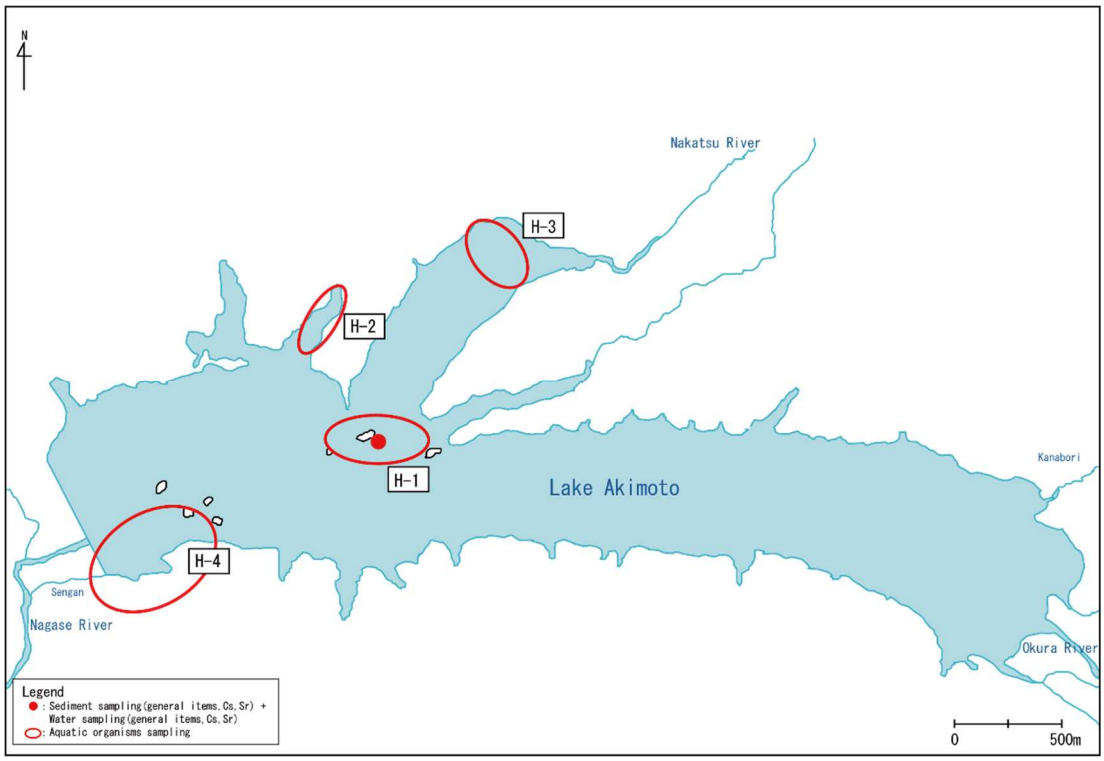
Surveys were started in the autumn term of FY2012 and conducted in between Yaigomesaka Bridge and Daimonji Bridge in 2017.



Detailed map showing Location F along the Ota River

(6) Location H in Lake Akimoto

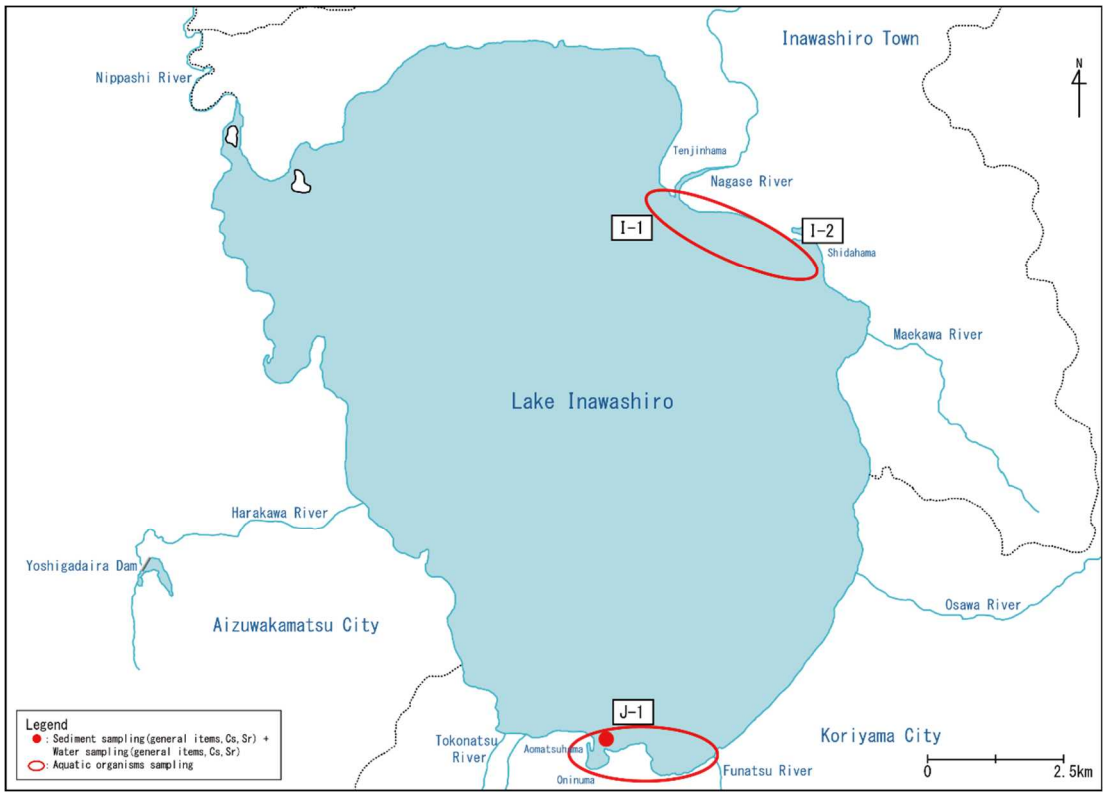
Surveys were conducted over the whole area of Lake Akimoto, and around Lake Akimoto.



Detailed map showing Location H in Lake Akimoto

(7) Location I (North Lakeside) and Location J (South Lakeside) in Lake Inawashiro

Surveys were conducted at around the point where the Nagase River flows into Lake Inawashiro and at the south lakeside.

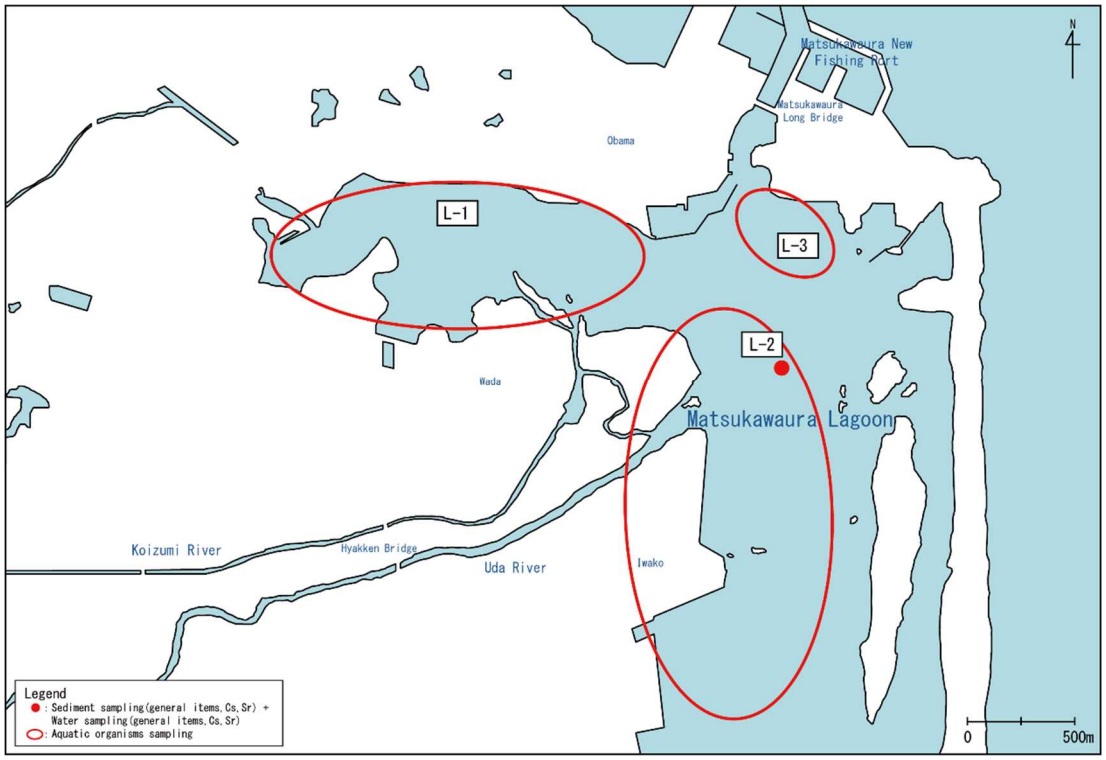


Detailed map showing Location I (north lakeside) and Location J (south lakeside) in Lake Inawashiro

(8) Location L off Soma City

Surveys were conducted within the Matsukawaura Lagoon, centering on the estuary region of the Uda River.

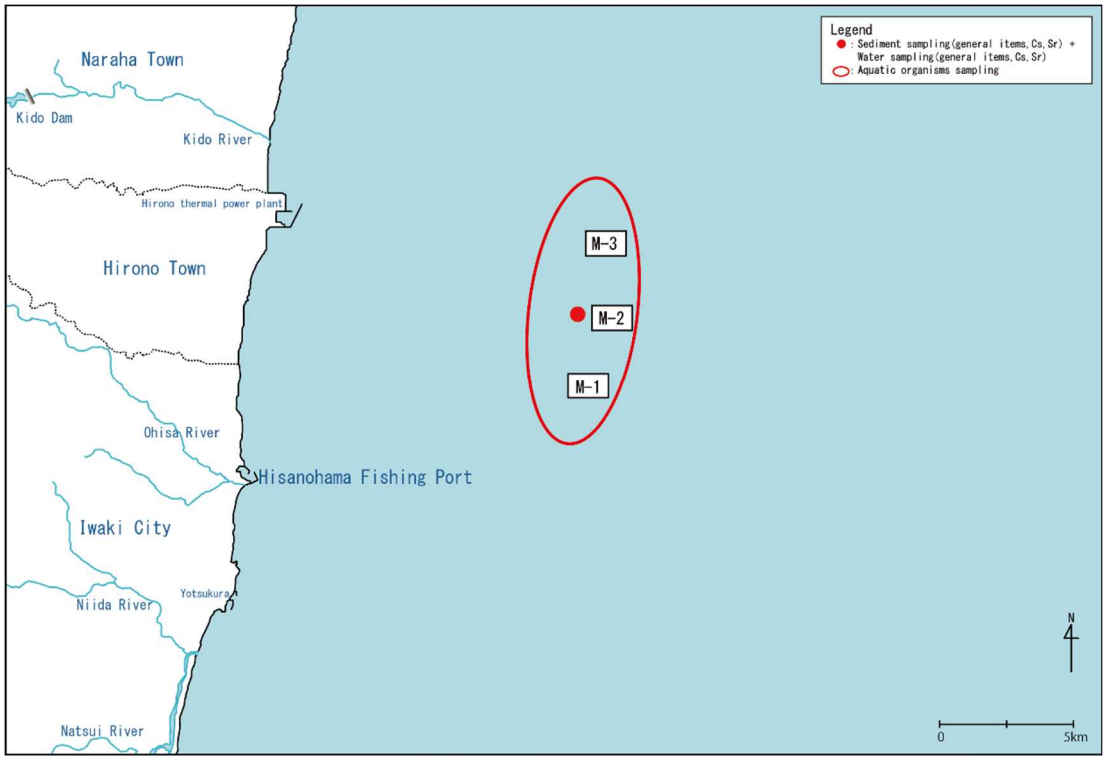
Sampling point in Location L-2 was expanded to the south in the FY2015 survey because sampling was impossible at the conventional point due to bank protection work.



Detailed map showing Location L off Soma City (Matsukawaura Lagoon)

(9) Location M off Iwaki City

Surveys were conducted at offshore of the Hisanohama Fishing Port.



Detailed map showing Location M off Iwaki City

3. Results

Survey results are shown in the table.

The outline of the measurement results of radioactive cesiums (the total of Cs-134 and Cs-137) .

(i) Rivers and lakes

* N.D. means to be below the detection limit.

* Organisms were collected in or around the targeted water areas.

* Basically, measurements was conducted for all targeted samples, and not limited to edible parts.

*Since the autumn term of FY2012, sampling and analysis of aquatic insects had been conducted separately for four categories (Plecoptera, Trichoptera, Odonata, and Megaloptera) (by feeding habit and type). Since the FY2014 June-July survey, Ephemeroptera was added and sampling and analysis were conducted for five categories.
