

## Results of Radioactive Material Monitoring at Bathing Areas (July-August, 2014)

Friday, September 26, 2014  
Water Environment Division,  
Environmental Management Bureau  
Ministry of the Environment  
Direct line: 03-5521-8316  
Switchboard: 03-3581-3351  
Director: Takashi Omura (ext. 6610)  
Coordinator: Saori Nagasawa (ext. 6614)

Each local authority conducted radioactive material monitoring at bathing areas this summer. The Ministry of the Environment compiled the results reported from each prefecture and found that radioactive materials were not detectable at any of the locations surveyed. MOE here announces that there were no reports of radioactive materials in excess of the reference values for water at bathing areas having been detected.

### 1. Survey Overview

Number of locations: Surveys conducted at 162 bathing areas, etc. in 9 prefectures

Survey items: Activity concentrations (radioactive iodine and radioactive cesium) in water at bathing areas  
Ambient dose rates at beach bathing areas

Survey period: Early July to late August

### 2. Outline of Results

- Radioactive materials were not detectable at any of the locations surveyed. Radioactive materials in excess of the reference values<sup>(\*)</sup> for water at bathing areas were not detected (see the Annex for details).

\* Reference value for radioactive materials in water at bathing areas  
Total for Cs-134 + Cs-137: 10 Bq/L

- It was reported that ambient dose rates at beaches were about the same as or less than those in surrounding areas.

The results of the water quality surveys of radioactive materials at bathing areas, which each local authority conducted from early April to early July, and the results compiled by MOE are available at [http://www.env.go.jp/jishin/monitoring/results\\_r-ba.html](http://www.env.go.jp/jishin/monitoring/results_r-ba.html).

For details of the survey results for individual bathing areas, please contact the local authority, etc. where the bathing area in question is located.

## Results of FY2014 Radioactive Material Monitoring of Water at Bathing Area

Prefecture	Municipality	Bathing area name	Surveyed bathing area*	Sampling Date	Measured values (Bq/L)					Lower detection limit	Remarks
