

Results of Radioactive Material Monitoring of Groundwater (June-August 2013)

Friday, November 1, 2013
Office of Groundwater and Ground Environment,
Soil Environment Division,
Environmental Management Bureau,
Ministry of the Environment
Direct line: 03-5521-8309
Switchboard: 03-3581-3351
Director: Hideo Kimura (ext. 6604)
Deputy Director: Kenji Kamita (ext. 6606)
Coordinators: Kenta Yamadate (ext. 6609)
Yuki Taniyama (ext. 6609)

In accordance with the Comprehensive Monitoring Plan determined by the Monitoring Coordination Meeting of the national government, the Ministry of the Environment (MOE) is continuing to monitor radioactive materials in groundwater.

The analysis results of the measurement of activity concentrations in groundwater samples collected in Iwate, Miyagi, Fukushima, Ibaraki, Tochigi, Gunma, and Chiba Prefectures are released here (for samples collected in Iwate from July 16 to 29, in Miyagi from July 17 to August 8, in Fukushima from July 16 to August 13, in Ibaraki from July 4 to 29, in Tochigi from June 25 to July 19, in Gunma from July 23 to 26, and in Chiba from June 27 to July 30).

○ Outline of Results

Measurement of I-131, Cs-134, and Cs-137 was conducted at all predetermined locations (324 locations). In Fukushima Prefecture, measurement of Sr-89 and Sr-90 was also conducted at 15 locations. (Detection limit for all these measurements: 1 Bq/L)

(1) Iwate Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 22 locations surveyed. (See Annex 1 for details.)

(2) Miyagi Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 24 locations surveyed. (See Annex 2 for details.)

(3) Fukushima Prefecture

I-131, Cs-134, and Cs-137, as well as Sr-89 and Sr-90, were not detectable at any of the 180 locations surveyed. (See Annex 3 for details.)

(4) Ibaraki Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 27 locations surveyed. (See Annex 4 for details.)

(5) Tochigi Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 27 locations surveyed. (See Annex 5 for details.)

(6) Gunma Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 21 locations surveyed. (See Annex 6 for details.)

(7) Chiba Prefecture

I-131, Cs-134, and Cs-137 were not detectable at any of the 23 locations surveyed. (See Annex 7 for details.)

* Specification and Standards for Food, Food Additives, etc. in Accordance with the Food Sanitation Act (Drinking Water) (Ministry of Health, Labour and Welfare Public Notice No.130, March 15, 2012)

Radioactive cesium (total for Cs-134+Cs-137): 10 Bq/kg

* Reference Values for Radioactive Materials in Tap Water (Management Target for Water Supply Facilities) (March 5, 2012; 0305 Notice No.1 from the Director of the Water Supply Division, Health Service Bureau, Ministry of Health, Labour and Welfare)

Radioactive cesium (total for Cs-134+Cs-137): 10 Bq/kg

○ Future Plans

In and around Fukushima Prefecture, MOE intends to continue monitoring activity concentrations in groundwater, in coordination with the prefectural government, municipalities, and other relevant organizations.

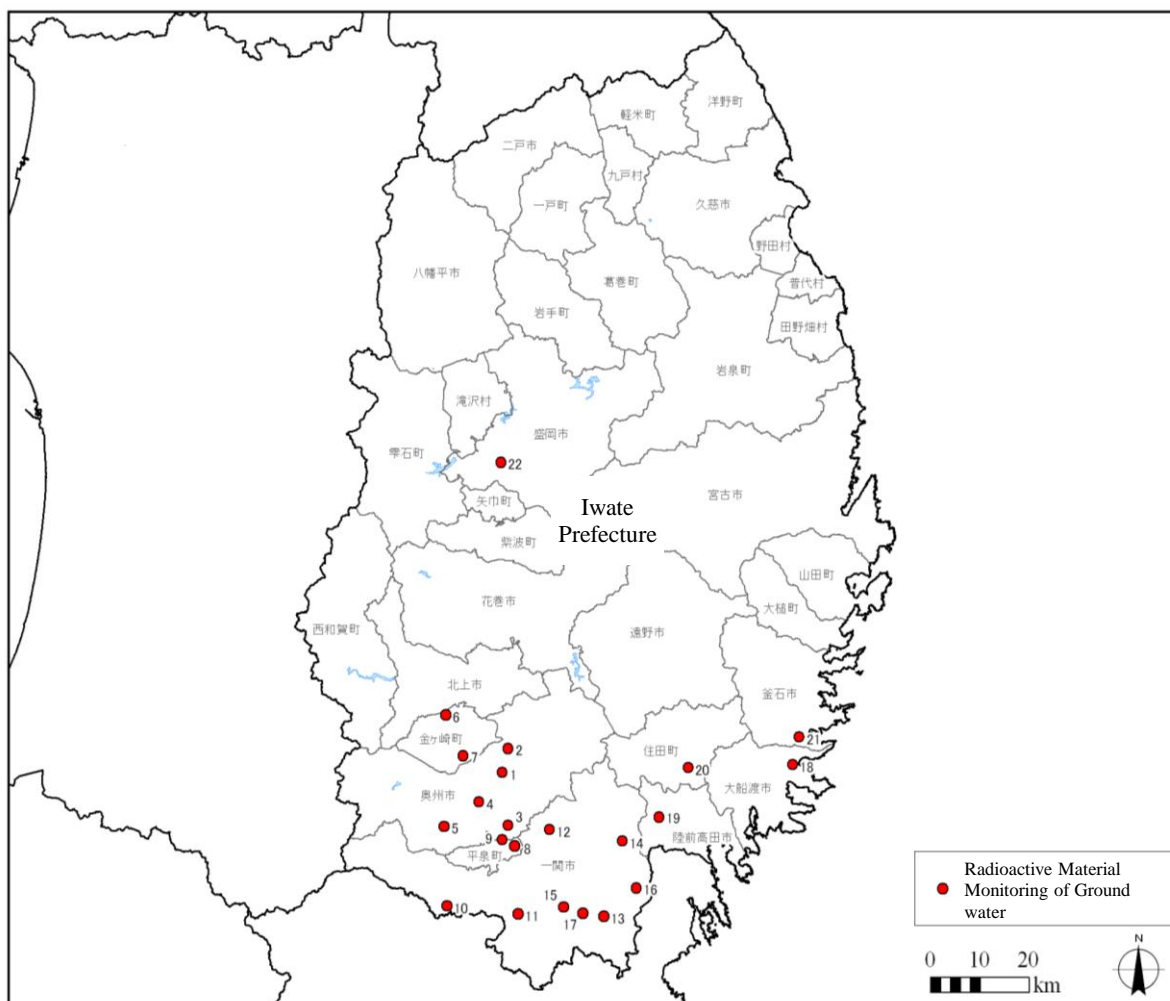

Results of Groundwater Monitoring [Iwate Prefecture]
