

	1	THE PROBLEM OF CLIMATE CHANGE AND OTHER GLOBAL ENVIRONMENTAL CRISES	— 03
		(1) Climate change and extreme phenomena	— 04
		(2) Marine plastic pollution and loss of biodiversity	— 04
	2	ACTIONS BY THE NATIONAL GOVERNMENT, LOCAL GOVERNMENTS, BUSINESSES, ETC. TO BRING ABOUT SOCIAL CHANGE	— 05
		(1) Domestic trends regarding climate change, etc.	— 06
		(2) Actions by the national government focusing on climate change mitigation	— 09
		(3) Actions by non-government players toward development of a decarbonized society	— 10
		(4) Actions by the national government regarding marine plastic and biodiversity	— 12
		(5) Sustainable, decarbonized regional development – Creating a circular and ecological economy	— 13
		(6) Development of a circular and ecological economy now underway	— 14
		(7) Promotion of ESG financing for building a circular and ecological economy	— 16
	3	EFFORTS TO BRING ABOUT SOCIAL CHANGE THAT BEGIN WITH INDIVIDUALS	— 17
		(1) Lifestyle innovations for developing a sustainable, decarbonized society	— 18
		(2) Clothes, food, and housing	— 19
		(3) Travel, traffic, and transportation	— 20
		(4) Work	— 21
		(5) Leisure	— 22
	4	ACTIVITIES FOR RECONSTRUCTION AND ENVIRONMENTAL REMEDIATION AFTER THE GREAT EAST JAPAN EARTHQUAKE	— 23
		(1) Air dose rates	— 24
		(2) Initiatives for restoring the environment in disaster stricken areas	— 24
	5	ENVIRONMENTAL ADMINISTRATION RESPONSE TO CORONAVIRUS DISEASE 2019 (COVID-19)	— 26
		(1) Environmental administration actions regarding COVID-19 to date	— 27
		(2) Environmental administration response regarding COVID-19 emergency economic measures	— 27
		CIRCULAR AND ECOLOGICAL ECONOMY (JAPAN'S VISION TO REALIZE DECARBONIZATION AND SDGS)	— 28
		ADDITIONAL MATERIALS	
		- GHG Emissions in Japan	— 30
		- Biodiversity	— 32
		- Sound material-cycle society	— 34
		- Atmospheric and water environments	— 36
		- Environmental risks of chemical substances	— 38
