

## **Agenda for the Asian Pacific Regional Consultation Meeting under the Ad hoc Open-ended Expert Group (AHEG) of the United Nations Environment Assembly (UNEA)**

### **Background and Intended Outcomes of the Meeting**

Due to a catastrophic effect of the COVID-19 pandemic, the fourth meeting of the Ad hoc Open-ended Expert Group (AHEG 4) initially scheduled in May 2020 has been postponed. In light of this decision, and with a view to facilitate further progress and revision of the working documents ahead of the next expert group meeting, the Secretariat has prepared, at the request of and in close consultation with the Bureau of the expert group, the scenario note with intersessional roadmap attached, and has organized virtual meetings and other activities.

As Asia and the Pacific region has been seen as one of the major contributor to the global marine plastic pollution, the region's collective efforts - towards combatting marine plastic litter and microplastics by taking active part in the AHEG's intersessional work - is of global significance and merit. Many countries of Asia and Pacific region took part in the AHEG 3 (18-22 November 2019, Bangkok) and gained common understandings on issues, which are leading to greater engagement of the region in the intersessional work. This good momentum needs to be further strengthened and more countries must be encouraged to take part so that AHEG outcomes are of use and relevance to the region overall.

In light of the above, the Ministry of the Environment, Japan (MoEJ), as member of the Bureau of the AHEG as well as the Chair of the Asian Pacific regional group, propose to organize a virtual meeting of the AHEG for countries in Asia and the Pacific to: 1) Share information on the progress and ongoing work of the AHEG intersession work 2) Discuss possible regional coordination mechanisms and 3) Facilitate consultations of the Chair and Bureau with the regions.
