(to be continued)

Statistical analyses were made based on the total number of animals examined.

Fate: A, animals that impregnated a female; B, animals that unsuccessfully mated or did not impregnate a female; C, animals that died during the study; T, total (A+B+C).

a: Values represent the number of animals that showed abnormal findings.

b: Euthanized in treatment week 13 because of fracture of the nasal bone due to an accident in the cage.

-: Not applicable.

Statistical analyses were made based on the total number of animals examined.

Fate: A, animals that impregnated a female; B, animals that did not impregnate a female; C, animals that died during the study; T, total (A+B+C).

a: Values represent the number of animals that showed abnormal findings.

-: Not applicable.

\*: Significantly different from the control at  $p \leq 0.05$  by Fisher's exact probability test.

\*\* : Significantly different from the control at  $p \leq 0.01$  by Fisher's exact probability test.

(to be continued)

Fate: A, animals that impregnated a female; B, animals that unsuccessfully mated or did not impregnate a female; C, animals that died during the study; T, total (A+B+C).

a: Values represent the number of animals that showed abnormal findings.

b: Statistical analyses were made between the control and 15000 ppm groups, except for the thyroid between the control and all treated groups, based on the total number of animals examined.

c: Organs/tissues examined were the liver, thymus, thyroids, spleen, adrenals, bone marrow (femur), mesenteric lymph node, Peyer's patch, testis, epididymis, seminal vesicles, coagulating glands, prostate, mammary gland and pituitary gland.

d: Including the animal that was euthanized in treatment week 13 because of fracture of the nasal bone due to an accident in the cage.

e: The number of animals examined on the thyroids was 23 due to autolysis.

-: Not applicable.

\*: Significantly different from the control at  $p \leq 0.05$  by Fisher's exact probability test.

\*\* : Significantly different from the control at  $p \leq 0.01$  by Fisher's exact probability test.
