Promotion of a Zero-Carbon Smart City through City-to-City Collaboration between Ba Ria-Vung Tau Province and Sakai City

This project aims to develop a sustainable urban environment and a smart city in Ba Ria-Vung Tau Province, based on the City-to-City Collaboration Program with Sakai City. In response to the province's needs, foundational surveys and workshops are conducted, focusing on three key areas where Sakai City excels: decarbonization, circular economy, and smart city initiatives.

In addition to sharing knowledge and providing support for surveys and institutional framework development, the project considers a wide range of initiatives, such as renewable energy, energy efficiency, waste-to-energy systems, hydrogen-based decarbonized combustion technologies, and the utilization of biomass energy. Through these efforts, the project aims to comprehensively promote decarbonization of the urban environment in Ba Ria-Vung Tau Province, utilizing programs such as the JCM Model Project.
