

MoU for Cooperation in Regional Environmental Conservation

Overview

Urasoe City and Airai State have shared initiatives on environment and energy, exchanged opinions of environment related policies and confirmed the needs for de-carbonization promotion and proper waste management through visits to Urasoe City. This led to the signing of a Memorandum of Understanding with the following contents.

1. Both parties will provide each other with information that is advantageous for regional environmental conservation measures.
2. Utilizing the human resources and knowledge of both parties to work towards preserving the local environment.

The two parties will deepen exchanges to solve environmental issues online through the sharing of knowledge/experience mainly with the Urasoe City Officials.
