

A Memorandum of Understanding was signed between Kobe City and Dong Nai Province, Vietnam.

Overview

Kobe City and Dong Nai Province launched a City-to-City Collaboration Program in 2024. In September 2024, they signed a Memorandum of Understanding at the Embassy of Vietnam in Japan to promote Green Growth in Dong Nai Province. Moving forward, both cities will exchange information on system development and planning to support the realization of Dong Nai Province's Green Growth strategy for decarbonization. Additionally, they will support the formation of private sector projects, considering the utilization of the Joint Crediting Mechanism (JCM), in both existing and new industrial parks in Dong Nai Province. These projects will focus on promoting renewable energy and energy efficiency, improving wastewater treatment efficiency, and enhancing waste management and waste-to-energy initiatives.
