

Introducing C3P Activity and Japanese Technology at the International Exhibition of Energy and Environment Technology in Hanoi City

Overview

Hanoi City and Fukuoka Prefecture have had a friendly partnership since 2008. Since 2021 they have been conducting city-to-city collaboration projects for zero carbon society.

In June 2025, the International Exhibition of Energy and Environment Technology (ENTECH) was held which hosted by Hanoi City. This event is normally held once a year with more than 200 participants.

Four Fukuoka Prefecture companies participating in this event and set up a joint booth, displaying technical posters, distributing technical guidebook, and holding demonstrations of energy-saving products. More than 40 people visited the booth. Negotiations are underway with several companies regarding installation and purchasing process. The introduction of these decarbonization and environmental technologies is expected in near future.
