

Manufacturing multi-fuel biomass boilers and expanding business for domestic and international sales

Overview

MIS Co., Ltd., which has been participating in the city-to-city collaboration project between Hanoi City and Fukuoka Prefecture. It has been considering business promotion of its highly efficient biomass burner in domestic/overseas markets. After holding discussions with a manufacturer in Hanoi during a field study last year, a prototype of a small biomass hot water boiler was completed in June 2025.

As inspection results confirmed, MIS plans to start full-scale production in Hanoi and then carry out testing and sales in Japan.

Furthermore, MIS and the manufacturer also discussed regarding the manufacture of biomass burners and control panels in October 2025, and plan to manufacture all related equipment in Hanoi near future.
