Project title

Zero Carbon Society Development in Bandung City through Energy Saving of Infrastructure System and Transportation Improvement

Project objectives

This project will contribute to the promotion of the realization of a decarbonized society by providing support mainly for high-priority projects with significant greenhouse gas reduction potential, targeting the city of Bandung.

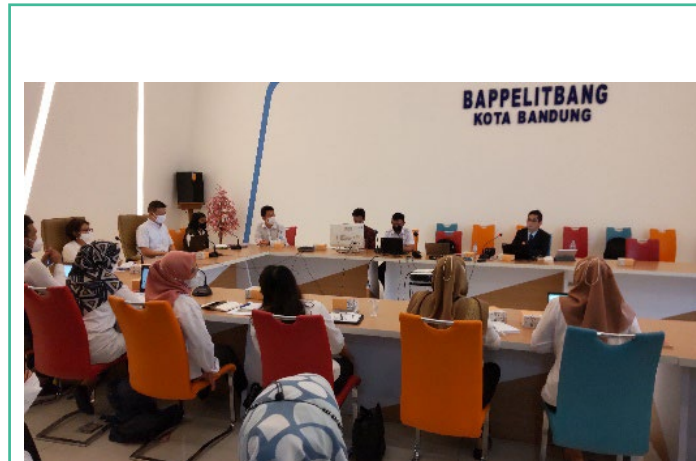

The project will conduct a detailed study of candidate facilities and formulate a model project in the building sector and consider to formulate the JCM Model project. In the transportation sector, we will examine initiatives combining energy conservation and air quality management through smart LED street lighting.

Planned activities in FY2023

- (1) Promotion of energy-saving in building sector
- (2) Study of decarbonization initiatives through transportation improvements

Major achievements in FY2023 & previous years

- Plan of roadmap to JCM project implementation of BEMS and smart LED lighting will be considered.

Workshop in Bandung City
