## Project title

Zero Carbon Development in Quezon City for the Realization of Carbon Neutral Society

## Project objectives

In line with the Enhanced Local Climate Change Action Plan 2021-2050 developed by Quezon City as a member of the C40, it will contribute to achieving carbon neutrality by the year 2050, through the formulation of JCM projects in the field of building sector which is a major source of GHG emissions.

## Planned activities in FY2023

- (1) Project formation through the introduction of Solar PV and energy management systems
- (2) Study on decarbonization measures in the transport sector
- (3) Initiatives for the development of potential JCM contractors and the formation of new projects

## Major achievements in FY2023 & previous years

- Holding mayor-level policy dialogue between the two cities
- Organize Business Needs Matching Seminar in collaboration with between the two cities
- Preparation for application for JCM project of rooftop solar power generation

Mayor-level policy dialogue in Quezon City

Rooftop solar at Quezon City Hall
