

Japanese City	Partner City	Implementation Body
Kitakyushu City	Koror State(Palau)	ATGREEN Co., Ltd

Project title

City to City collaboration project for the promotion of decarbonized cities and realization of co-benefits in Koror State, Republic of Palau. (Project Phase 2)

Project objectives

Promoting decarbonized society and resource circulation in the State of Koror, Republic of Palau, through both technology and policy approaches.

Planned activities in FY2023

Feasibility Study of introducing boilers for decarbonization and co-benefit generation using woody biomass.

Major achievements in FY2023 & previous years

- ① We have a discussions with the various international organization (eg. ADB's Public-Private Partnerships Department) to get the budget for EV vehicles for waste collection and transportation.
- ② There is a plan to introduce recycled wood decking materials made by Kitakyushu City's company. We discuss with the Embassy and JICA local office to make a project(ex. grassroots project).

Use of wood fuel mainly in resort hotels (Intensive Model)
