

City-to-City Collaboration between Ho Chi Minh City in Viet Nam and Osaka City

Osaka City Government and Ho Chi Minh City (HCMC) have been implementing City-to City Collaboration Project in the environmental field since 2011. In 2013, Osaka City and HCMC concluded "MOU on Formulation of Law-carbon City in HCMC" for comprehensive cooperation to realize steady urban development of HCMC, and the MOU was extended for five years in March 2021. **Through continuous discussions between two cities and JCM model projects formation by companies, three JCM model projects were selected in FY2021, which contributes to the promotion of zero-emission technology to industrial and public sectors in HCMC.**

City-to-City Collaboration between Ho Chi Minh City in Viet Nam and Osaka City

【Implementation Structure】

【Project Activities and Outcomes】

■ Activities :

- One Workshop/ Four meetings for City-to-City collaboration/ 13 meetings for JCM model projects formulation/ 3 meetings with MOEJ
- Information collection survey by local consultants
- Identification of the facilities with high energy consumption in HCMC and examination of the possibility of JCM model projects formulation
- Information collection and analysis of CCAP 2021-2030 in HCMC
- Implementation of basic survey on new Thu Duc City

■ Outcomes :

• **3 JCM model projects were adopted in FY2021**

- ① Introduction of High Efficiency LED Lighting with Dimming and Tunable Function to Office Building in HCMC
- ② Introduction of 9.8 MW Rooftop Solar Power System in Industrial Park
- ③ Introduction of High Efficiency Chiller and High Efficiency LED Lighting with Dimming Function to Shopping Center

- **CCAP 2021-2030 policy review**
- **Implementation of workshop [and planning of activities for decarbonization from FY2022**
