

City-to-City Collaboration between Ba Ria-Vung Tau Province, Vietnam and Sakai City

- Taking advantage of the commonalities between the two cities, such as being an industrial city with an international trading port, we will implement city-to-city collaboration to achieve zero-carbon and environmental improvement of industrial parks and urban areas.
- By sharing the administrative experience of Sakai City, which is an “Eco-Model City” and “SDGs Future City”, as well as disseminating and deploying advanced environmental technologies, the Project will promote a smart city and sustainable urban environment in Ba Ria-Vung Tau Province

Ba Ria – Vung Tau province, Socialist Republic of Vietnam

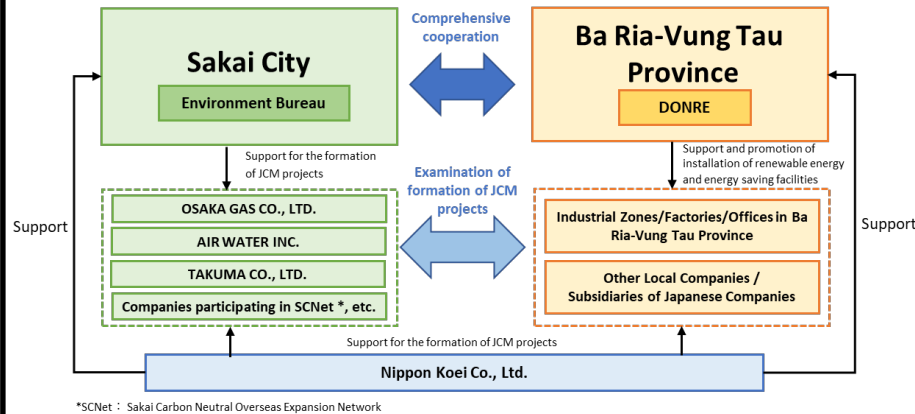

- Developed provincial Climate Change Action Plan in 2021
 - Reduce GHG emissions by 8% by 2030
 - Priority industries: petrochemicals, steel, manufacturing, etc.
 - Promote **sorting, recycling, and energy recovery of general solid waste, large-scale renewable energy projects, development of smart environmental resource management services**, etc.
- 

Sakai city

- Announced in 2021 “Aiming for Zero-Carbon City”
 - Aiming to become a world-leading environmentally advanced city with the keyword of **four "Cs" (Carbon Neutral, Circular, Comfortable, and Cooperation)**
 - Selected by Ministry of the Environment as a “**Decarbonization Leading Area**” in 2021
- 

City-to-City Collaboration between Ba Ria-Vung Tau Province, Vietnam and Sakai City

【 Organization Chart 】

【 Activities and Outcomes 】

❖ Activities :

- Two meetings between the cities to share knowledge and initiatives in the areas of decarbonization and solid waste management
- Needs survey and information collection for photovoltaic power generation, utilization of biomass resources, waste management and others
- Online seminar introducing renewable energy and energy saving technologies
- Local workshop to promote decarbonization
- Business matching

❖ Outcomes :

- Preparation of MOU between cities (to be concluded in 2023)
- Networking with industrial parks
- Identifying candidate site for JCM Model Project
- Finding one more Sakai-city-based company intending to newly participate in the Project
