

Japanese City	Partner City	Implementation Body
Sakai city	Ba Ria – Vung Tau province	Nippon Koei Co., Ltd.

Project title

Promotion of Zero-Carbon Smart City through City-to-City Collaboration between Ba Ria-Vung Tau Province and Sakai City

Project objectives

Promote a smart city and sustainable urban environment in Ba Ria-Vung Tau province, by sharing the administrative experience of Sakai city, as well as disseminating and deploying advanced environmental technologies

Planned activities in FY2023

- Exchange opinions and sharing of knowledge and initiatives between two cities in the areas of environment and carbon neutrality
- Enhance business matching and networking with local enterprises/developers

Major achievements in FY2023 & previous years

- **Concluded MOU in the field of environment, towards building zero-carbon city and circular economy and possibility of developing JCM project** between two cities in C2P2 seminar at COP28 in Dec. 2023
- Identified needs and conditions of local enterprise for installation of promoted technologies such as **renewable energy, energy saving, hydrogen combustion and biomass utilization**
- Hold the meeting with local enterprises, Chamber of Commerce and Industry and other stakeholders to disseminate zero carbon technologies and enhance partnerships
