

The above figures show the contaminated regions due to the Chornobyl NPS Accident as of December 1989 and those due to Tokyo Electric Power Company (TEPCO)'s Fukushima Daiichi NPS Accident as of November 2011 on the same scale. The table shows areas of the contaminated regions shown in the figures.

The region affected by the Fukushima Daiichi NPS Accident is about 6% of that affected by the Chornobyl NPS Accident in terms of the total area contaminated with Cs-137. (Related to p.32 of Vol. 1, "Comparison of Estimated Amounts of Released Radionuclides between the Chornobyl NPS Accident and the TEPCO's Fukushima Daiichi NPS Accidents")
