

Premises of the Fukushima Daiichi NPS

Provided by Japan Space Imaging Corporation and (c) Digital Globe
Prepared by the Ministry of Economy, Trade and Industry based on the materials of Tokyo Electric Power Company

In order to improve safety and workability by reducing workers' load, efforts to improve the working environment, such as debris retrieval and facing, have been made at Tokyo Electric Power Company (TEPCO)'s Fukushima Daiichi NPS. As a result, areas where workers can work in ordinary work clothes expanded to approx. 95% of the entire premises in March 2017.

In May 2015, a large rest house was opened and workers are served with hot meals prepared at the food service center and can take a shower and buy things at a convenience store. They can thus work under normal working conditions at present.
