

## Progress of Disposal of Disaster Waste Directly Governed by the National Government in Designated Areas in Fukushima Prefecture

Temporary Incineration Facility in Okuma Town (December 2017)

Disaster waste has been disposed of based on the Treatment Plan on Waste within the Management Areas (partial revision on December 25, 2013).

[Amount of Waste within the Management Areas having been transported to Temporary Storage Sites]

○ As of the end of December 2020, a total of approx. 2.93 million tons of waste had been transported to Temporary Storage Sites (of which, approx. 510,000 tons were incinerated, approx. 1,840,000 tons were recycled), and approx. 170,000 tons were landfilled).

Amount of Waste within the Management Areas having been transported from designated areas to Temporary Storage Sites

[Removal of tsunami rubble]

○ Tsunami rubble in former Restricted Areas was all transported to Temporary Storage Sites in March 2016, except for such rubble left in Restricted Areas.

[Installation of Temporary Incineration Facilities]

| Now treating disaster waste, etc.    | Katsurao Village, Namie Town, Iitate Village (Warabidaira district), Futaba Town and Okuma Town    |
| Disposal of disaster waste completed | Kawauchi Village, Iitate Village (Komiya district), Tomioka Town, Naraha Town, and Minamisoma City |

Demolition of a damaged house, etc.

\*Tamura City and Kawamata Town use existing waste disposal facilities for disposing of disaster waste.  
\*Futaba Town has two Temporary Incineration Facilities.

Prepared by the Ministry of the Environment

Waste within the Management Areas in Fukushima Prefecture has been disposed of based on the Plan on Waste within the Management Areas, which was revised in December 2013.

Such waste, which includes tsunami rubble, debris of damaged houses, and waste from houses after cleaning-up, has been transported sequentially to Temporary Storage Sites. As of the end of December 2020, a total of approx. 2.93 million tons had already been transported. Transported waste is recycled as much as possible.

It was decided to incinerate inflammable waste to reduce volume at Temporary Incineration Facilities constructed at 11 locations in nine municipalities. As of the end of December 2020, six such facilities were in operation and waste is being steadily incinerated.
