Measures to Ensure Safety of Mushrooms and Non-Wood Forest Products

- ☐ Introduce safe production materials in order to reduce radioactive contamination
- ☐ Provide information on gathering of wild plants and mushrooms

Specific measures

- Secure safe mushroom logs (Support for the purchase of mushroom logs and bed logs, matching of supply and demand of mushroom logs)
- Decontaminate mushroom logs and bed logs and introduce makeshift greenhouses, etc.
- Disseminate cultivation management in line with the guideline and give guidance therefor
- 4. Disseminate cultivation technology to reduce radioactive contamination
- 5. Provide information using the website and pamphlets and conduct guidance tours

Provisional Safety Standards for Mushroom Logs, etc. [Reference]

- Mushroom logs and beds may be distributed nationwide.
- In order to ensure the safety of supplied mushrooms, provisional safety standards for radioactive cesium concentrations for mushroom logs and beds were established.

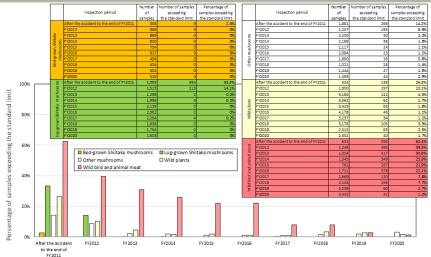

Provisional safety standards (from April 2012)	
Mushroom logs and bed logs	50 Bq/kg
Culture media for beds and mushroom beds	200 Bq/kg

Bed logs: Mushroom logs wherein mushroom fungi are planted

 $\label{thm:mushroom-beds:culture-media-mixed-with-sawdust-and-nutrients-wherein-mushroom-fungiare-planted$

Mushrooms and Wild Plants

Mushrooms, Wild Plants and Wild Bird and Animal Meat

^{*} Coverage: 17 prefectures including the Tokyo Metropolis designated as inspection targets in the "Concepts of Inspection Planning and Establishment and Cancellation of Items and Areas to which Restriction of Distribution and/or Consumption of Foods Concerned Applies," which compiles basic approaches concerning radioactive materials in foods

Prepared based on the "Inspection Results Concerning Radioactive Cesium Concentrations in Agricultural Products" by the Ministry of Agriculture, Forestry and Fisheries and the "Inspection Results Concerning Radioactive Materials in Foods" by the Ministry of Health. Labour and Welfare
