

# Pregnancy and Birth Survey: Achievement and Content of Support

## [Changes in coverage]

Out of all respondents, for those who were judged to be in need of support from the content of their responses, support has been offered by full-time midwives, etc. by phone or mail.

Fiscal year	Number of people who received support by phone	Percentage of those who received support among all respondents	Number of people who received support by phone	Percentage of those who received support among all respondents	Number of people who received support by phone	Percentage of those who received support among all respondents
FY2011	1,401 people	15.0%	375 people	14.7%	421 people	17.9%
FY2012	1,104 people	15.4%	256 people	12.7%		
FY2013	1,101 people	15.2%	393 people	14.5%		
FY2014	830 people	11.6%	380 people	14.0%		
FY2015	913 people	13.0%				
FY2016	951 people	13.0%				
FY2017	799 people	12.4%				
FY2018	711 people	10.7%				
FY2019	668 people	10.6%				

## [Topics of the consultations by phone]

Main survey					First follow-up survey			Second follow-up survey
FY2011	FY2012	FY2013	FY2014 to FY2017 (the same ranking for both years)	FY2018 to FY2019 (the same ranking for both years)	FY2015 FY2011 survey respondents	FY2016 FY2012 survey respondents	FY2017 to FY2018 FY2013-201 survey respondents	FY2019 FY2011 survey respondents
1st Worries over radiation and its effects	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health	Mothers' mental and physical health
2nd Mothers' mental and physical health	Matters concerning childrearing	Matters concerning childrearing	Matters concerning childrearing	Matters concerning childrearing	Worries over radiation and its effects	Matters concerning childrearing	Matters concerning childrearing	Matters concerning childrearing
3rd Matters concerning childrearing	Worries over radiation and its effects	Children's mental and physical health	Matters concerning family life	Children's mental and physical health	Matters concerning childrearing	Children's mental and physical health	Matters concerning family life	Children's mental and physical health

Matters concerning child rearing include concerns about baby food, night crying, constipation, vaccination, etc.

Prepared based on the material for the 41st Prefectural Oversight Committee Meeting for Fukushima Health Management Survey

Immediately after the earthquake, the most frequent topic was worries over radiation and its effects, but the percentage of such consultations is declining over time. Since FY2012, consultations on mothers' mental and physical health and matters concerning child rearing have increased and now rank high.

The percentage of people requiring support found in the main survey has been gradually decreasing.

From the follow-up surveys in FY2013 onward, support was expanded to cover those considered to be in need of support based on the content of their free comments. Accordingly, the percentage of those requiring support found in the first follow-up survey continued to be around 14%.

The percentage of those requiring support found in the second follow-up survey was the highest.
